Food Premises Inspection Report

Name of business:	Tool Box @ The Garage
Address of food business:	14 Chapel Field North, Norwich, NR2 1NY
Date of inspection:	27/04/2026
Risk rating reference:	26/00345/FOOD
Premises reference:	24/00201/FD_HS
Type of premises:	Restaurant or cafe
Areas inspected:	All
Records examined:	FSMS, Training Certificates/records, Temperature Control Records
Details of samples procured:	None
Summary of action taken:	Informal
General description of business:	Bar at performance venue

Relevant Legislation

Food Safety Act 1990 (as amended)

Regulation (EC) No 178/2002 applied by The General Food Regulations 2004 (as amended)

Regulation (EC) No 852/2004 and No 853/2004 applied by Regulation 19 (1) of the Food Safety and Hygiene (England) Regulations 2013

Health and Safety at Work etc. Act 1974 and related regulations

Food Information Regulations 2014

What you must do to comply with the law

The report may include **Contraventions** - matters which do not comply with the law. You must address all of the contraventions identified; failure to do so could result in legal action being taken against you.

As a guide, contraventions relating to cleaning, temperature control and poor practice, should be dealt with straight away.

Contraventions relating to structural repairs, your food safety management system and staff training, should be completed within the next 2 months.

Health and safety contraventions should be dealt with within 3 months unless otherwise stated.

To assist you the report may also include **Observations** of current practice, useful **Information, Recommendations** of good practice and reminders of **Legal Requirements**.

My inspection was not intended to identify every contravention of the law and only covers those areas, practices and procedures examined at the time of the inspection. If the report fails to mention a particular matter this does not mean you have necessarily complied with the law.

FOOD SAFETY

How we calculate your Food Hygiene Rating:

The food safety section has been divided into the three areas which you are scored against for the hygiene rating: 1. food hygiene and safety procedures, 2. structural requirements and 3. confidence in management/control procedures. Each section begins with a summary of what was observed and the score you have been given. Details of how these scores combine to produce your overall food hygiene rating are shown in the table.

Compliance Area	You Score					
Food Hygiene and Safety	0	5	10	15	20	25
Structure and Cleaning	0	5	10	15	20	25
Confidence in management & control systems	0	5	10	15	20	30
Your Total score	0 - 15	20	25 - 30	35 - 40	45 - 50	> 50
Your Worst score	5	10	10	15	20	-
Your Rating is	5	4	3	2	1	0

Your Food Hygiene Rating is 4 - a good standard

1. Food Hygiene and Safety

Food hygiene standards are high. You demonstrated a very good standard of compliance with legal requirements. You have safe food handling practices and procedures and all the necessary control measures to prevent cross-contamination are in place. Some minor contraventions require your attention. **(5)**

Contamination risks

Contravention The following exposed food to the general risk of cross-contamination with bacteria or allergens or its physical contamination with dirt, foreign objects or chemicals:

- food on the counter display at the servery was not covered. Sneeze guards would reduce risk of contamination of food at the point of purchase.

Hand washing

Legal Requirement An adequate number of wash hand basins must be available for use, they must be suitably located and designated for hand washing only.

Observation I was pleased to see hand washing was generally well managed.

Temperature Control

Contravention The following evidence indicated there was a risk of bacteria growing on food:

- sausage rolls were cooling on display at room temperature.

Recommendation The core temperature of cooked and reheated foods should reach 75° for 30 seconds or an equivalent time and temperature combination.

Recommendation Infrared thermometers can be used as a simple and speedy way of checking the surface temperatures of hot and cold food. When using them you need to remember that they measure the surface temperature of the food or wrapping rather than the core temperature of the food.

Poor Practices

Guidance It is permitted to sell food after its BEST BEFORE date but becomes an offence if it is not of the nature, substance or quality demanded by the consumer. You must check the food and make sure your customers are aware that it is past the BEST BEFORE date.

2. Structure and Cleaning

The structure facilities and standard of cleaning and maintenance are of a generally satisfactory standard but there are some repairs and/or improvements which are required in order for you to comply with the law. Pest control and waste disposal provisions are adequate. The contraventions require your attention; although not critical to food safety they may become so if not addressed. **(10)**

Cleaning of Structure

Contravention The following items could not be effectively cleaned and must be covered, made non-absorbent or replaced:

- wall covering not sealed to wall
- exposed areas of bare and unfinished plaster on walls and/or ceilings
- rawl plugs and drill holes in wall not effectively smoothed over and sealed
- exposed MDF or chipboard on shelves in use in the kitchen and servery area.

In rooms where open food is prepared or processed all surfaces must be smooth and non-absorbent. Painting with a light coloured washable (or gloss) paint would be suitable but you should consider potential deterioration from abrasive impact and commercial cleaning chemicals where other more robust surfaces finishes may be required

Cleaning Chemicals / Materials / Equipment and Methods

Information You must ensure that the sanitisers you use are effective against bacteria. Ensure that they meet the following standards BS EN 1276:1997 and 13697:2001.

Information A surface sanitiser may be rendered ineffective if you are not following the correct dilutions or allowing a sufficient time for the product to work (CONTACT TIME). Always follow the instructions on the product label.

Observation I was pleased to see that the premises was kept clean and that your cleaning materials, methods and equipment were able to minimise the spread of harmful bacteria between surfaces.

Maintenance

Contravention The following had not been suitably maintained and must be repaired or replaced:

- paint work worn, damaged and/or peeling
- wall surfaces covering not effectively sealed to the wall in the kitchen

Facilities and Structural provision

Observation I was pleased to see the premises had been generally well maintained and that adequate facilities had been provided.

Pest Control

Observation I was pleased to see that the premises was proofed against the entry of pests and that pest control procedures were in place.

Observation You have a pest control contract in place and there is no evidence of pest activity on the premises.

3. Confidence in Management

A food safety management system is in place and you comply fully with the law. Hazards to food are understood properly controlled managed and reviewed. Your records are appropriate and being maintained. All your staff are suitably supervised and trained. You have a very good track record. **(0)**

Type of Food Safety Management System Required

Legal Requirement Ensure that your food safety management system is available on site so your staff can refer to your procedures and so that daily records of checks can be completed.

Recommendation Limit time that high risk food on display room temperature so that you can demonstrate that the amount of time within limits to prevent harmful bacteria multiplying to levels that could cause illness in customers

Observation You were monitoring (and recording) the temperatures of your fridges and freezers as well as the temperature of cooked/hot-held food and could demonstrate effective systems for controlling bacterial growth and survival.

Observation Your SFBB/food safety management system was in place and working well. I was confident you had effective control over hazards to food.

Traceability

Observation Your records were such that food could easily be traced back to its supplier.

Infection Control / Sickness / Exclusion Policy

Guidance UK Health Security Agency recommends that food handlers known or suspected to be suffering from a food-borne infection or gastrointestinal illness stay away from work until symptom-free for 48 hours.

Observation Policies were in place to prevent any infected food handler from contaminating food.

Waste Food and other Refuse

Observation You had measures in place to dispose of waste food appropriately and were employing the services of an approved waste contractor.

Training

Legal Requirement Food business operators must ensure that food handlers are supervised and instructed and/or trained in food hygiene matters to an appropriate level for the work they do.

Observation I was pleased to see that food handlers had been trained to an appropriate level and evidence of their training was made available.

Allergens

Observation You had identified the presence of allergens in your non-prepacked food and had brought this to the attention of your customers.

Observation You had devised a chart listing all the food you provide with the allergens present in each and had brought this to the attention of your staff and customers.
