

Public Protection (food & safety)

Food Premises Inspection Report

Name of business:	O Yes
Address of food business:	560B Dereham Road Norwich, NR5 8TU
Date of inspection:	21/07/2026
Risk rating reference:	26/00562/FOOD
Premises reference:	26/00178/FD_HS
Type of premises:	Food take away premises
Areas inspected:	All
Records examined:	SFBB, Temperature Control Records, Training Certificates/records, Pest Control Report
Details of samples procured:	None
Summary of action taken:	Informal
General description of business:	Takeaway

Relevant Legislation

Food Safety Act 1990 (as amended)
 Regulation (EC) No 178/2002 applied by The General Food Regulations 2004 (as amended)
 Regulation (EC) No 852/2004 and No 853/2004 applied by Regulation 19 (1) of the Food
 Safety and Hygiene (England) Regulations 2013
 Health and Safety at Work etc. Act 1974 and related regulations
 Food Information Regulations 2014

What you must do to comply with the law

The report may include **Contraventions** - matters which do not comply with the law. You must address all of the contraventions identified; failure to do so could result in legal action being taken against you.

As a guide, contraventions relating to cleaning, temperature control and poor practice, should be dealt with straight away.

Contraventions relating to structural repairs, your food safety management system and staff training, should be completed within the next 2 months.

Health and safety contraventions should be dealt with within 3 months unless otherwise stated.

To assist you the report may also include **Observations** of current practice, useful **Information, Recommendations** of good practice and reminders of **Legal Requirements**.

My inspection was not intended to identify every contravention of the law and only covers those areas, practices and procedures examined at the time of the inspection. If the report fails to mention a particular matter this does not mean you have necessarily complied with the law.

FOOD SAFETY

How we calculate your Food Hygiene Rating:

The food safety section has been divided into the three areas which you are scored against for the hygiene rating: 1. food hygiene and safety procedures, 2. structural requirements and 3. confidence in management/control procedures. Each section begins with a summary of what was observed and the score you have been given. Details of how these scores combine to produce your overall food hygiene rating are shown in the table.

Compliance Area	You Score					
Food Hygiene and Safety	0	5	10	15	20	25
Structure and Cleaning	0	5	10	15	20	25
Confidence in management & control systems	0	5	10	15	20	30
Your Total score	0 - 15	20	25 - 30	35 - 40	45 - 50	> 50
Your Worst score	5	10	10	15	20	-
Your Rating is	5	4	3	2	1	0

Your Food Hygiene Rating is 5 - a very good standard

1. Food Hygiene and Safety

Food hygiene standards are high. You demonstrated a very good standard of compliance with legal requirements. You have safe food handling practices and procedures and all the necessary control measures to prevent cross-contamination are in place. Some minor contraventions require your attention. **(5)**

Contamination risks

Contravention The following exposed food to the general risk of cross-contamination with bacteria or allergens or its physical contamination with dirt, foreign objects or chemicals:

- scoops left in dry goods where handle could cause contamination

Guidance The FSA (visit www.food.gov.uk for more information) has issued guidance on controlling E. coli 0157 through:

- the complete separation of raw and ready-to-eat food
- the correct use of wash-hand basins and thorough hand washing
- having dedicated equipment (including complex equipment) for raw and ready-to-eat foods
- thorough 2-stage cleaning and the correct use of sanitisers
- and by controlling the risks posed by soily vegetables.

For further details please read the guidance available at:<https://www.gov.uk/government/publications/e-coli-cross-contamination-guidance/e-coli-o157-cross-contamination-guidance>

Guidance If equipment and utensils (for example chopping boards, containers and tongs) are to be used for raw and RTE foods, they should be disinfected by heat or an adequate dishwasher cycle (able to reach 82_degrees C for 15 seconds) between uses.

Observation I was pleased to see you were able to demonstrate effective controls to prevent cross-contamination.

Handwashing

Information If not used properly gloves are likely to give rise to a risk of cross contamination. Ensure that hands are always washed thoroughly before putting gloves on and after taking them off. Gloves should be disposable and should always be changed between the handling of raw and ready-to-eat foods. Gloves should also be changed before handling ready-to-eat food if they have come in contact with any surface or objects not designated as clean (e.g. money), and also at every break.

Guidance Proper hand-washing is essential to prevent cross-contamination of E.coli 0157 and other harmful bacteria onto food and food contact surfaces. Hand washing should include the following steps:

- * wet hands before applying soap
- * good hand rubbing technique
- * rinsing of hands
- * hygienic drying

Recommendation After washing hands food handlers should turn the taps off using paper towel to prevent them from re contaminating their hands

Observation I was pleased to see hand washing was well managed.

Personal Hygiene

Observation I was pleased to see that standards of personal hygiene were high.

Temperature Control

Guidance Serving less than thoroughly cooked (LTTC) burgers carries a greater risk of harmful bacteria not all being killed during the lower-temperature cooking (if, for instance, a burger meat patty were to become contaminated with harmful bacteria or if bacteria were allowed to grow on it).

Guidance The Food Standards Agency has produced guidance on less than thoroughly cooked (LTTC) burgers which you can link to here:
<https://www.food.gov.uk/business-guidance/introduction-less-than-thoroughly-cooked-beef-burgers-guidance>

Guidance It is essential to know that your probe thermometer is working properly. If the reading is outside these ranges, you should replace your probe or return it to the manufacturer to be calibrated. A simple way to check a digital probe is to put it in iced water and boiling water:

- The readings in iced water should be between -1 degrees C and 1_degrees C
- The readings in boiling water should be between 99_degrees C and 101_degrees C.

Observation I was pleased to see you were able to limit bacterial growth and/or survival by applying appropriate temperature controls at points critical to food safety and that you were monitoring temperatures.

Unfit food

Guidance If you freeze high risk foods you must ensure that you freeze them before the USE BY date has passed. You must also have a good system to manage the food when you have defrosted it to ensure it is used before it becomes unsafe. In practice foods should be frozen at least a week before the USE BY date and when defrosted labelled with a date so that it is used within 2 days.

Recommendation You should have a system to identify when open or prepared foods need to be used by or discarded, to ensure the food is fit for consumption. I recommend you apply labels which give a date that is 2 days after the day of production e.g. if food is opened on Monday, it should be used by the end of Wednesday (an exception is cooked rice which should not be kept longer than 24 hours)

Poor Practices

Guidance It is permitted to sell food after its BEST BEFORE date but becomes an offence if it is not of the nature, substance or quality demanded by the consumer. You must check the food and make sure your customers are aware that it is past the BEST BEFORE date.

2. Structure and Cleaning

The structure facilities and standard of cleaning and maintenance are all of a good standard and only minor repairs and/or improvements are required. Pest control and waste disposal provisions are adequate. The minor contraventions require your attention. **(5)**

Cleaning of Structure

Contravention The following items were dirty and require more frequent and thorough cleaning:

- hand contact surfaces to doors

Observation The premises had been well maintained, and the standard of cleaning was good.

Cleaning of Equipment and Food Contact Surfaces

Observation You had dedicated equipment for the preparation of raw and for ready-to-eat foods.

Cleaning Chemicals / Materials / Equipment and Methods

Contravention The following evidence demonstrated your cleaning materials, equipment and methods were not sufficient to control the spread of harmful bacteria between surfaces:

- the sanitisers are not to BS EN 1276:1997 13697:2001 standards but have now been changed for correct ones.

Maintenance

Observation You are maintaining the premises in good condition.

Facilities and Structural provision

Observation I was pleased to see the premises had been well maintained and that adequate facilities had been provided.

Pest Control

Contravention Pest proofing is inadequate particularly in the following areas:

- no pest proof door screen (required if you leave the external door open)

Observation You have a pest control contract.

3. Confidence in Management

A food safety management system is in place, and you demonstrate a very good standard of compliance with the law. You have a good track record. There are some minor contraventions which require your attention. **(5)**

Food Hazard Identification and Control

Contravention Some safe methods had not been completed in your SFBB pack, but you are obtaining a new pack and completing as you have recently taken over.

Infection Control / Sickness / Exclusion Policy

Guidance UK Health Security Agency recommends that food handlers known or suspected to be suffering from a food-borne infection or gastrointestinal illness stay away from work until symptom-free for 48 hours.

Observation Policies were in place to prevent any infected food handler from contaminating food.

Waste Food and other Refuse

Information There are a number of companies that collect waste oil either at no charge or indeed pay you for it. When you find a company ensure that they are registered as a waste carrier and that they provide you with a waste transfer note

Observation You had measures in place to dispose of waste food appropriately and were employing the services of an approved waste contractor. Ensure you have documentation to support this.

Training

Recommendation A Level 2 Award in Food Safety in Catering or its equivalent (a 6-hour course leading to the award of a recognised certificate in food hygiene) would be appropriate for your food handlers. Booking details for the equivalent CIEH course are on our website: www.norwich.gov.uk

Recommendation Catering staff should refresh their food hygiene knowledge every 3 years so that they stay up to date with current legislation and good practice. Booking details for this course are on our website: www.norwich.gov.uk

Recommendation A Level 3 Award for Supervising Food Safety in Catering would be appropriate for your supervisory staff and those with managerial responsibility.

Observation I was pleased to see that food handlers had been trained to an appropriate level and evidence of their training was made available.

Allergens

Contravention You are failing to manage allergens properly:

- You have not adequately labelled the foods you are prepacking for direct sale to your customers. The label must include the name of the food and an ingredients list with the 14 allergens emphasised. This has been implemented.

Guidance Prepacked for direct sale or PPDS is food that is packaged at the same place it is offered or sold to consumers and is in this packaging before it is ordered or selected. It can include food that consumers select themselves, as well as products kept behind a counter and some food sold at mobile or temporary outlets.
