

## Public Protection (food & safety)

### **Food Premises Inspection Report**

Name of Business: Looses Cafe

Address of food business: 23 - 25 Magdalen Street, Norwich. NR3 1LE

Date of Inspection: 29/03/2017
Risk Rating Reference 17/00153/FOOD
Premises Reference 17/00088/FD HS

Type of Premises: Restaurant or cafe

Areas Inspected:
Records Examined:
Details of Samples Procured:
None
Summary of Action Taken:
Informal
General Description of business
Local cafe

## **Relevant Legislation**

Food Safety Act 1990 (as amended)

Regulation (EC) No 178/2002 applied by The General Food Regulations 2004 (as amended) Regulation (EC) No 852/2004 and No 853/2004 applied by Regulation 19(1) of the Food Safety and Hygiene (England) Regulations 2013

Health and Safety at Work etc. Act 1974 and related regulations

#### What you must do to comply with the law

The report may include **Contraventions** - matters which do not comply with the law . You must address all of the contraventions identified; failure to do so could result in legal action being taken against you.

As a guide, contraventions relating to cleaning, temperature control and poor practice, should be dealt with <u>straight away</u>.

Contraventions relating to structural repairs, your food safety management system and staff training, should be completed within the next <u>2 months</u>.

Health and safety contraventions should be dealt with within 3 months unless otherwise stated.

To assist you the report may also include **Observations** of current practice, useful **Information**, **Recommendations** of good practice and reminders of **Legal Requirements**.

My inspection was not intended to identify every contravention of the law and only covers those areas, practices and procedures examined at the time of the inspection. If the report fails to mention a particular matter this does not mean you have necessarily complied with the law.

### **FOOD SAFETY**

# How we calculate your Food Hygiene Rating:

The food safety section has been divided into the three areas which you are scored against for the hygiene rating: 1.food hygiene and safety procedures, 2. structural requirements and 3. confidence in management/control procedures. Each section begins with a summary of what was observed and the score you have been given. Details of how these scores combine to produce your overall food hygiene rating are shown in the table.

| Compliance Area                            |        |    |    | You Score |         |    |         |    |      |
|--|--------|----|----|-----------|---------|----|---------|----|------|
| Food Hygiene and Safety                    |        |    |    | 0         | 5       | 10 | 15      | 20 | 25   |
| Structure and Cleaning                     |        |    |    | 0         | 5       | 10 | 15      | 20 | 25   |
| Confidence in management & control systems |        |    |    | 0         | 5       | 10 |         | 20 | 30   |
|  |        |    |    |           |         |    |         |    |      |
| Your Total score                           | 0 - 15 | 20 | 25 | - 30      | 35 - 40 |    | 45 - 50 |    | > 50 |
| Your Worst score                           | 5      | 10 | 10 |           | 15      |    | 20      |    | -    |
|  |        |    |    |           |         |    |         |    |      |
| Your Rating is                             | 5      | 4  |    | 3         | 2       | 2  | 1       |    | 0    |

Your Food Hygiene Rating is 3 - a generally satisfactory standard 0 1 2 3 4 5

#### 1. Food Hygiene and Safety

Food hygiene standards are generally satisfactory and maintained. There is evidence of some non-compliance with legal requirements. Some lapses are evident however generally you have satisfactory food handling practices and procedures and adequate control measures to prevent cross-contamination are in place. The contraventions require your attention; although not critical to food safety they may become so if not addressed. (Score 10)

## Personal Hygiene

**Recommendation** To further improve personal hygiene I suggest:

long sleaved protective overall be worn

#### Temperature Control

Contravention The following evidence indicated there was a risk of bacteria growing on food:

The display cabinet was running at an air temperature of 10 °C with your thermometer and 9.5°C with mine. Your upright fridge was reading 11.7°C. Refrigerated food temperature should ideally be between 0-5°C, with a legal maximum of 8°C. This was not known and was not being monitored. I left you lowering the temperatures of the equipment. This needs monitoring and

recording in your opening and closing checks.

**Legal Requirement** If you rely on selling cold food (displayed over 8°C) within four hours you must be able to demonstrate your system for ensuring food is either sold, placed under refrigeration, or discarded, before the four hours have elapsed.

**Recommendation** Purchase a probe thermometer as discussed to monitor air and actual temperature of the interior of the food.

## 2. Structure and Cleaning

The structure facilities and standard of cleaning and maintenance are all of a good standard and only minor repairs and/or improvements are required. Pest control and waste disposal provisions are adequate. The minor contraventions require your attention. (Score 5)

## Cleaning Chemicals / Materials / Equipment and Methods

**Information** Proper cleaning and disinfection is essential in preventing the spread of E.coli 0157 and other harmful bacteria onto food and food contact surfaces.

**Information** Ensure you use a surface sanitiser that conforms to BS EN 1276:1997 or BS EN 13697:2001. This information should be available on the label or by contacting the manufacturer.

**Guidance** Even when using a surface sanitiser you should be following the 'two-stage' cleaning method. Apply the sanitiser once to remove visible dirt and food debris and then a second time to ensure effective disinfection. Make sure you follow the correct contact time for the product.

#### Maintenance

**Recommendation** Repair the small area of damaged mastic seal between the sink and surface.

## 3. Confidence in Management

There are generally satisfactory food safety controls in place although there is evidence of some non-compliance with the law. You are progressing towards a written food safety management system. The contraventions require your attention; although not critical to food safety they may become so if not addressed. (**Score 10**)

#### Type of Food Safety Management System Required

**Contravention** You currently do not have a food safety management system or what you have in place is not suitable given the food risks associated with your

business. Provide a simple documented system such as 'Cook Safe' or Safer Food Better Business (SFBB).

**Contravention** Your documented Food Safety Management System or Safer Food Better Business pack was not available for inspection. As a consequence you could not demonstrate an effective system for managing food safety hazards.

### Food Hazard Identification and Control

**Contravention** The following matters demonstrated that you have not identified hazards to food (such as bacteria growing on food, bacteria surviving in cooked food and cross-contamination) or the methods of control at critical points in your operation:

 Temperature control of your fridges was not adequate and is not being monitored. You immediately took steps to reduce the temperatures in your equipment and undertook to monitor that these are reached and maintained.

## **Training**

**Observation** It was good to see that your manageress has undertaken a Level 2 Award in Food Safety in Catering. There was some confusion with fridge temperatures but is now aware of a good fridge temperature range and the legal maximum.

## Allergens

**Contravention** You have not properly informed your customers about the presence of allergens in the food you sell.

**Information** Allergen information could be written down on a chalk board or chart, or provided orally by a member of staff. Where the specific allergen information is not provided up-front, clear sign-posting to where this information could be obtained must be provided.

#### **Information** The 14 allergens are:

- cereals containing gluten
- crustaceans, for example prawns, crabs, lobster and crayfish
- eggs
- fish
- peanuts
- soybeans
- milk
- nuts, such as almonds, hazelnuts, walnuts, pecan nuts, Brazil nuts, pistachio, cashew and macadamia (Queensland) nuts
- celery (and celeriac)
- mustard
- sesame
- sulphur dioxide, which is a preservative found in some dried fruit

- lupin
- molluscs, for example clams, mussels, whelks, oysters, snails and squid

**Information** The Food Information Regulations require that you know what allergens are in the food you provide. You can no longer claim you don't know what allergens are present. Neither can you simply state that all the foods you serve might contain an allergen.

**Legal Requirement** Ensure you have all the appropriate information from your suppliers to pass onto your customers.
