Regulation (EC) No 178/2002 applied by The General Food Regulations 2004 (as amended)

Regulation (EC) No 852/2004 and No 853/2004 applied by Regulation 19(1) of the Food Safety and Hygiene (England) Regulations 2013

Health and Safety at Work etc. Act 1974 and related regulations

Food Information Regulations 2014

What you must do to comply with the law

The report may include **Contraventions** - matters which do not comply with the law . You must address all of the contraventions identified; failure to do so could result in legal action being taken against you.

As a guide, contraventions relating to cleaning, temperature control and poor practice, should be dealt with straight away.

Contraventions relating to structural repairs, your food safety management system and staff training, should be completed within the next 2 months.

Health and safety contraventions should be dealt with within 3 months unless otherwise stated.

To assist you the report may also include **Observations** of current practice, useful **Information, Recommendations** of good practice and reminders of **Legal Requirements** .

My inspection was not intended to identify every contravention of the law and only covers those areas, practices and procedures examined at the time of the inspection. If the report fails to mention a particular matter this does not mean you have necessarily complied with the law.

FOOD SAFETY

How we calculate your Food Hygiene Rating:

The food safety section has been divided into the three areas which you are scored against for the hygiene rating: 1. food hygiene and safety procedures, 2. structural requirements and 3. confidence in management/control procedures. Each section begins with a summary of what was observed and the score you have been given. Details of how these scores combine to produce your overall food hygiene rating are shown in the table.

Compliance Area	You Score					
Food Hygiene and Safety	0	5	10	15	20	25
Structure and Cleaning	0	5	10	15	20	25
Confidence in management & control systems	0	5	10	15	20	30
Your Total score	0 - 15	20	25 - 30	35 - 40	45 - 50	> 50
Your Worst score	5	10	10	15	20	-
Your Rating is	5	4	3	2	1	0

Your Food Hygiene Rating is 1 - major improvement is necessary

1. Food Hygiene and Safety

Food hygiene standards are high. You demonstrated a very good standard of compliance with legal requirements. You have safe food handling practices and procedures and all the necessary control measures to prevent cross-contamination are in place. Some minor contraventions require your attention. **(Score 5)**

Contamination risks

Contravention The following exposed ready-to-eat food and/or its packaging to the risk of cross-contamination with E.coli 0157 and/or other pathogenic bacteria from raw meat or unwashed raw vegetables :

- raw foods i.e sausages and bacon were being stored next to ready-to-eat foods i.e cooked meats in the display chiller

Hand-washing

Contravention The following evidence indicated hand-washing was not suitably managed:

- there was no hygienic towel to the wash hand basin

Legal Requirement Wash hand basins must be provided with soap and hygienic hand drying facilities.

Temperature Control

Observation I was pleased to see you were able to limit bacterial growth and/or survival by applying appropriate temperature controls at points critical to food safety and that you were diligently monitoring temperatures.

Poor Practices

Observation The following matters represented poor practice and if allowed to continue may cause food to become contaminated or lead to its deterioration

- smoking evidence ash behind wc door & smell

2. Structure and Cleaning

The structure facilities and standard of cleaning and maintenance are of a generally satisfactory standard but there are some repairs and/or improvements which are required in order for you to comply with the law. Pest control and waste disposal provisions are adequate. The contraventions require your attention; although not critical to food safety they may become so if not addressed. **(Score 10)**

Cleaning of Structure

Contravention The following structural items were dirty and require more frequent and thorough cleaning:

- cobwebs were seen to high levels in the wc
- shelves behind the cereals were dusty

Cleaning of Equipment and Food Contact Surfaces

Contravention The following surfaces and equipment in contact with food were dirty and/or could not be cleaned and require cleaning or discarding:

- interior to all of the chest freezers
- interior rim around the top of the chest freezers

Maintenance

Contravention The following items had not been suitably maintained and must be repaired or replaced:

- wooden shelves in the storeroom

- floor to the storeroom
- flooring next to where the potatoes are stored in the shop (see photo below)
- bare brick above where the soft drinks are stored in the shop

Information you need to seal/treat/paint the wood to leave a smooth impervious surface that can be easily cleaned

3. Confidence in Management

There is major non-compliance with legal requirements. Your food safety management system was not written down. You have a varying track record. The contraventions require your urgent attention. A revisit is planned and formal enforcement action is likely. **(Score 20)**

Type of Food Safety Management System Required

Contravention You currently do not have a food safety management system or what you have in place is not suitable given the food risks associated with your business. Although your business is low risk you still require a minimum amount of documentation. This might include your hygiene rules, pest control reports, a staff illness and exclusion policy, a cleaning schedule, date coding, temperature checks of display chillers, and handover diary etc.:

Contravention Your documented Food Safety Management System or Safer Food Better Business pack was not available for inspection. As a consequence you could not demonstrate an effective system for managing food safety hazards.

Legal Requirement Food business operators must put in place, implement and maintain a permanent procedure or procedures based on HACCP principles:

- Identify hazards to food.
- Identify the critical limits (what is acceptable and unacceptable).
- Monitor critical control points to ensure critical limits are met.
- Keep appropriate records to demonstrate control measures are effective.

Information You can download a Safer Food Better Business pack and refill diary pages from the FSA website: www.food.gov.uk/business-industry/caterers/sfbb

Infection Control / Sickness / Exclusion Policy

Guidance Public Health England recommends that food handlers known or suspected to be suffering from a food-borne infection or gastrointestinal illness stay away from work until symptom-free for 48 hours.
