

# **Public Protection (food & safety)**

# **Food Premises Inspection Report**

Name of Business: St Stephens Coffee Centre

Address of food business: St Stephen's Church, Rampant horse St, Norwich

NR2 1QP

Date of Inspection: 22/08/2017
Risk Rating Reference 17/00482/FOOD
Premises Reference 15/00115/FD\_HS

Type of Premises: Restaurant or cafe Areas Inspected: Main Kitchen

Records Examined: SFBB, Cleaning schedule, Temperature control records

Details of Samples Procured: None Summary of Action Taken: Informal

## **Relevant Legislation**

Food Safety Act 1990 (as amended)

Regulation (EC) No 178/2002 applied by The General Food Regulations 2004 (as amended) Regulation (EC) No 852/2004 and No 853/2004 applied by Regulation 19(1) of the Food Safety and Hygiene (England) Regulations 2013

Health and Safety at Work etc. Act 1974 and related regulations

Food Information Regulations 2014

### What you must do to comply with the law

The report may include **Contraventions** - matters which do not comply with the law . You must address all of the contraventions identified; failure to do so could result in legal action being taken against you.

As a guide, contraventions relating to cleaning, temperature control and poor practice, should be dealt with straight away.

Contraventions relating to structural repairs, your food safety management system and staff training, should be completed within the next <u>2 months</u>.

Health and safety contraventions should be dealt with within 3 months unless otherwise stated.

To assist you the report may also include **Observations** of current practice, useful **Information**, **Recommendations** of good practice and reminders of **Legal Requirements**.

My inspection was not intended to identify every contravention of the law and only covers those areas, practices and procedures examined at the time of the inspection. If the report fails to mention a particular matter this does not mean you have necessarily complied with the law.

### **FOOD SAFETY**

# How we calculate your Food Hygiene Rating:

The food safety section has been divided into the three areas which you are scored against for the hygiene rating: 1.food hygiene and safety procedures, 2. structural requirements and 3. confidence in management/control procedures. Each section begins with a summary of what was observed and the score you have been given. Details of how these scores combine to produce your overall food hygiene rating are shown in the table.

Compliance Area				You Score					
Food Hygiene and Safety				0	5	10	15	20	25
Structure and Cleaning				0	5	10	15	20	25
Confidence in management & control systems				0	5	10	15	20	30
Your Total score	0 - 15	20	25	- 30	35 - 40		45 - 50		> 50
Your Worst score	5	10	10		15		20		-
		·							
Your Rating is	5	4		3	2	2	1		0

Your Food Hygiene Rating is 3 - a generally satisfactory standard

## 1. Food Hygiene and Safety

Food hygiene standards are generally satisfactory and maintained. There is evidence of some non-compliance with legal requirements. Some lapses are evident however generally you have satisfactory food handling practices and procedures and adequate control measures to prevent cross-contamination are in place. The contraventions require your attention; although not critical to food safety they may become so if not addressed. (Score 10)

## Hand-washing

**Observation** Hand washing was managed well and wash-hand basins were well stocked with hand cleaning material.

## Personal Hygiene

**Contravention** The following are examples of poor personal hygiene or where it was made difficult for food handlers to maintain sufficiently high standards of personal cleanliness:

 food handlers were seen wearing watches. Food handlers should not wear jewellery or watches as this could be a source of contamination.

#### Temperature Control

**Contravention** The following evidence indicated there was a risk of bacteria growing on food:

- the fridge temperature was reading 11.9°C
- you informed me that the generators were being turned off at night which meant that the fridges were also being turned off during the night.

Legal Requirement Foods which must be kept chilled should be stored at or below 8°C.

**Legal Requirement** If you do not store foods which need to be kept chilled, at or below 8°C, you can only keep it out of temperature control for a maximum of four hours. If you choose to follow this method you need to be able to demonstrate your system for ensuring food is either sold, placed under refrigeration, or discarded, before the four hours have elapsed.

## Unfit food

**Contravention** The following food was unfit (and was seized or destroyed in my presence) because it was either; past its use by date; did not conform to food safety requirements; was not produced, prepared or processed in accordance with the regulations; or, in the case of fresh meat, its origin could not be determined:

 cooked chicken was being stored in the fridge where temperature was not being controlled.

**Recommendation** You should have a system to identify when open or prepared foods need to be used by or discarded, to ensure the food is fit for consumption. I recommend you apply labels which give a day or date that is 2 days after the day of production e.g. if food is opened on Monday it should be used by the end of Wednesday.

#### **Poor Practices**

**Observation** The following matters represented poor practice and if allowed to continue may cause food to become contaminated or lead to its deterioration

storing food out of temperature control.

#### Hand washing

**Contravention** The following evidence indicated hand-washing was not suitably managed:

• the hand wash basin had food debris in it.

**Legal requirement** The hand wash basin must only be used for washing hands. Equipment and or food should be washed in separate sink.

# 2. Structure and Cleaning

The structure facilities and standard of cleaning and maintenance are all of a good standard and only minor repairs and/or improvements are required. Pest control and waste disposal provisions are adequate. The minor contraventions require your attention. (Score 5)

#### Cleaning of Structure

**Contravention** The following structural items were dirty and require more frequent and thorough cleaning:

• the hand wash basin had food debris in it.

### Cleaning of Equipment and Food Contact Surfaces

**Contravention** The following surfaces and equipment in contact with food were dirty and/or could not be cleaned and require cleaning or discarding:

• seals to the Hoover fridge.

## <u>Cleaning Chemicals / Materials / Equipment and Methods</u>

**Information** Ensure you use a surface sanitiser that conforms to BS EN 1276:1997 or BS EN 13697:2001. This information should be available on the label or by contacting the manufacturer.

### <u>Maintenance</u>

**Contravention** The following items had not been suitably maintained and must be repaired or replaced:

• split seals on the door of the Hoover fridge.

## 3. Confidence in Management

There are generally satisfactory food safety controls in place although there is evidence of some non-compliance with the law. Your records are appropriate and generally maintained but some deficiencies were identified. The contraventions require your attention; although not critical to food safety they may become so if not addressed. (**Score 10**)

## Food Hazard Identification and Control

**Contravention** The following matters demonstrated that you have not identified hazards to food (such as bacteria growing on food, bacteria surviving in cooked food and cross-contamination) or the methods of control at critical points in your operation:

• you are failing to keep high risk food at the correct temperature control of the food in the fridges as the generators were being switched off at 16.30.

# Proving Your Arrangements are Working Well

**Contravention** The following are examples of where the documented Safe Methods in your SFBB pack said one thing but you were doing another. Follow your plan or change it -but ensure hazards are adequately controlled if you do:

- The daily diary and or four-weekly reviews
- Your Suppliers and/or Contacts lists
- Staff training records
- Fridge temperatures
- It states in your pack that food handlers remove watches and jewellery before preparing food.

### Waste Food and other Refuse

**Observation** You had measures in place to dispose of waste food appropriately and were employing the services of a registered waste carrier.

## Training

**Recommendation** A Level 2 Award in Food Safety in Catering or its equivalent (a 6-hour course leading to the award of a recognised certificate in food hygiene) would be appropriate for your food handlers. Booking details for this course are on our website: www.norwich.gov.uk

**Recommendation** Catering staff should refresh their food hygiene knowledge every 3 years so that they stay up to date with current legislation and good practice. Booking details for this course are on our website: www.norwich.gov.uk

## Infection Control / Sickness / Exclusion Policy

**Guidance** Public Health England recommends that food handlers known or suspected to be suffering from a food-borne infection or gastro-intestinal illness stay away from work until symptom-free for 48 hours.
