Relevant Legislation

Food Safety Act 1990 (as amended)
 Regulation (EC) No 178/2002 applied by The General Food Regulations 2004 (as amended)
 Regulation (EC) No 852/2004 and No 853/2004 applied by Regulation 19 (1) of the Food Safety and Hygiene (England) Regulations 2013
 Health and Safety at Work etc. Act 1974 and related regulations
 Food Information Regulations 2014

What you must do to comply with the law

The report may include **Contraventions** - matters which do not comply with the law . You must address all of the contraventions identified; failure to do so could result in legal action being taken against you.

As a guide, contraventions relating to cleaning, temperature control and poor practice, should be dealt with straight away.

Contraventions relating to structural repairs, your food safety management system and staff training, should be completed within the next 2 months.

Health and safety contraventions should be dealt with within 3 months unless otherwise stated.

To assist you the report may also include **Observations** of current practice, useful **Information, Recommendations** of good practice and reminders of **Legal Requirements** .

My inspection was not intended to identify every contravention of the law and only covers those areas, practices and procedures examined at the time of the inspection. If the report fails to mention a particular matter this does not mean you have necessarily complied with the law.

FOOD SAFETY

How we calculate your Food Hygiene Rating:

The food safety section has been divided into the three areas which you are scored against for the hygiene rating: 1. food hygiene and safety procedures, 2. structural requirements and 3. confidence in management/control procedures. Each section begins with a summary of what was observed and the score you have been given. Details of how these scores combine to produce your overall food hygiene rating are shown in the table.

Compliance Area	You Score					
Food Hygiene and Safety	0	5	10	15	20	25
Structure and Cleaning	0	5	10	15	20	25
Confidence in management & control systems	0	5	10	15	20	30
Your Total score	0 - 15	20	25 - 30	35 - 40	45 - 50	> 50
Your Worst score	5	10	10	15	20	-
Your Rating is	5	4	3	2	1	0

Your Food Hygiene Rating is 4 - a good standard

1. Food Hygiene and Safety

Food hygiene standards are high. You demonstrated a very good standard of compliance with legal requirements. You have safe food handling practices and procedures and all the necessary control measures to prevent cross-contamination are in place. Some minor contraventions require your attention. **(Score 5)**

Contamination risks

Contravention The following exposed food to the general risk of cross-contamination with bacteria or allergens::

- you were storing your domestic food stuffs in your commercial fridge's. Some of your personal foods contained allergens. I acknowledge that you have just moved into the property and were temporarily using your commercial fridges. You should not be storing domestic food with the business food. You informed me you are in the process of storing your domestic foods in dedicated separate wall units in rear kitchen area and will use a dedicated fridge which will be clearly indicated as your own food.

Observation Contamination risks were generally controlled

Hand-washing

Observation Hand washing was managed well and wash-hand basins were well stocked with hand cleaning material.

Personal Hygiene

Observation I was pleased to see that standards of personal hygiene were high.

Temperature Control

Observation I was pleased to see you were able to limit bacterial growth and/or survival by applying appropriate temperature controls at points critical to food safety and that you were diligently monitoring temperatures.

2. Structure and Cleaning

The structure facilities and standard of cleaning and maintenance are all of a good standard and only minor repairs and/or improvements are required. Pest control and waste disposal provisions are adequate. The minor contraventions require your attention. **(Score 5)**

Cleaning of Structure

Observation The kitchen had been well maintained and the standard of cleaning was exceptionally high.

Cleaning of Equipment and Food Contact Surfaces

Contravention The following surfaces and equipment in contact with food were dirty and/or could not be cleaned and require cleaning or discarding:

- cardboard was used as a floor covering behind pressurised chicken cooker. Cardboard is not suitable in a food room as it can harbour bacteria and difficult to easily keep clean.

Maintenance

Contravention The following items had not been suitably maintained and must be repaired or replaced:

- missing wall tiles to section of wall in rear kitchen area.

3. Confidence in Management

There are generally satisfactory food safety controls in place although there is evidence of some non-compliance with the law. All the significant food hazards are understood and controls are in place. You are progressing towards a written food safety management system. The contraventions require your attention; although not critical to food safety they may become so if not addressed. **(Score 10)**

Information As you are a new business you have been given the benefit of the doubt despite your food safety management system not fully complying with the law. You must act on this now as your hygiene rating score will be reduced to a maximum of 1 if there is a similar situation at the next visit

Proving Your Arrangements are Working Well

Contravention The Management sections in your Safer food Better Business (SFBB) pack are intended to demonstrate you are in day-to-day control of the hazards to food. The following Management sections were either missing, incomplete or not up-to-date:

- the daily diary and or four-weekly reviews
- your Suppliers and/or Contacts lists
- staff training records

Contravention The following matters are needed in order to demonstrate your Food Safety management system is working as it should:

- although you were filling in some daily diary pages there was no proper written date in the majority of the completed pages. In order to have supporting written records that you had been following your food safety practises the daily diary pages must be filled in properly with a clear date, name and a signature or initials.
- you need to complete all Safe Methods in the Safer Food Better Business pack. You informed me that the SFBB pack that you have used at your previous food business. Many sections were blank and need completing. If a Safer Method is not relevant you need to indicate this by writing N/A, 'not relevant' or write 'we do not do this'.

Traceability

Observation Your records were such that food could easily be traced back to its supplier.

Waste Food and other Refuse

Observation You had measures in place to dispose of waste food appropriately and were employing the services of an approved waste contractor.

Training

Observation I was pleased to see that food handlers and/or managers had been trained to an appropriate level and evidence of their training was made available.

Infection Control / Sickness / Exclusion Policy

Observation Policies were in place to prevent any infected food handler from contaminating food.

Allergens

Contravention You have not yet identified the allergens present in the food you prepare and therefore cannot inform customers

Contravention You have not warned your customers about the potential for cross-contamination with allergens.:

Legal Requirement Caterers must provide allergy information on all unpackaged food they sell. Catering businesses include restaurants, takeaways, deli counters, bakeries and sandwich bars etc. The potential for cross-contamination by allergens must also be made known to consumers. In addition food manufacturers must now label allergy causing ingredients on their pre-packed foods. You can obtain more information from the Trading Standards website www.norfolk.gov.uk/abc

Information Loose (also called non pre-packed) foods are:

- foods served at restaurants and canteens.
- take-away foods that are placed into containers and sold at the same premises.
- any foods sold loose, e.g. meat or cheese at a deli counter, unpackaged bread or pick and mix sweets (including individually wrapped sweets)

Information The 14 allergens are:

- cereals containing gluten
- crustaceans, for example prawns, crabs, lobster and crayfish
- eggs
- fish
- peanuts
- soybeans
- milk
- nuts, such as almonds, hazelnuts, walnuts, pecan nuts, Brazil nuts, pistachio, cashew and macadamia (Queensland) nuts
- celery (and celeriac)
- mustard
- sesame
- sulphur dioxide, which is a preservative found in some dried fruit
- lupin
- molluscs, for example clams, mussels, whelks, oysters, snails and squid

Information The Food Information Regulations require that you know what allergens are in the food you provide. You can no longer claim you don't know what allergens are present. Neither can you simply state that all the foods you serve might contain an allergen.

Recommendation Make a chart listing all your meals together with the 14 allergens (if present). Bring the chart to the attention of your customers and your staff.
