# **Food Premises Inspection Report**

Name of business: Chiswick House Address of food business: Chiswick House

3 Christchurch Road

Norwich

NR2 2AD

Date of inspection: 20/06/2018
Risk rating reference: 18/00747/FOOD
Premises reference: 03600/0003/0/000

Type of premises: Residential home

Areas inspected: Main Kitchen, Storeroom

Records examined: FSMS, Cleaning schedule, Temperature control records

Details of samples procured: None Summary of action taken: Informal

General description of business: Residential home

# **Relevant Legislation**

Food Safety Act 1990 (as amended)

Regulation (EC) No 178/2002 applied by The General Food Regulations 2004 (as amended)

Regulation (EC) No 852/2004 and No 853/2004 applied by Regulation 19 (1) of the Food

Safety and Hygiene (England) Regulations 2013

Health and Safety at Work etc. Act 1974 and related regulations

Food Information Regulations 2014

### What you must do to comply with the law

The report may include **Contraventions** - matters which do not comply with the law . You must address all of the contraventions identified; failure to do so could result in legal action being taken against you.

As a guide, contraventions relating to cleaning, temperature control and poor practice, should be dealt with <u>straight away</u>.

Contraventions relating to structural repairs, your food safety management system and staff training, should be completed within the next <u>2 months</u>.

Health and safety contraventions should be dealt with within 3 months unless otherwise stated.

To assist you the report may also include **Observations** of current practice, useful **Information**, **Recommendations** of good practice and reminders of **Legal Requirements**.

My inspection was not intended to identify every contravention of the law and only covers those areas, practices and procedures examined at the time of the inspection. If the report fails to mention a particular matter this does not mean you have necessarily complied with the law.

### **FOOD SAFETY**

# How we calculate your Food Hygiene Rating:

The food safety section has been divided into the three areas which you are scored against for the hygiene rating: 1. food hygiene and safety procedures, 2. structural requirements and 3. confidence in management/control procedures. Each section begins with a summary of what was observed and the score you have been given. Details of how these scores combine to produce your overall food hygiene rating are shown in the table.

Compliance Area				You Score					
Food Hygiene and Safety				0	5	10	15	20	25
Structure and Cleaning				0	5	10	15	20	25
Confidence in management & control systems				0	<b>5</b> 10		15	20	30
Your Total score	0 - 15	20	25 - 30		35 - 40		45 - 50		> 50
Your Worst score	5	10	10		15		20		-
Vous Detinerie	F								0
Your Rating is	5	4	3		2		1		

Your Food Hygiene Rating is 5 - a very good standard

## 1. Food Hygiene and Safety

Food hygiene standards are high. You demonstrated a very good standard of compliance with legal requirements. You have safe food handling practices and procedures and all the necessary control measures to prevent cross-contamination are in place. Some minor contraventions require your attention. (Score 5)

### Contamination risks

**Contravention** The following exposed food to the general risk of cross-contamination with bacteria or allergens or its physical contamination with dirt or foreign objects:

• no probe wipes were available. These had run out.

**Information** The FSA (visit www.food.gov.uk for more information) has issued guidance on controlling E.coli 0157 through:

- the complete separation of raw and ready-to-eat food
- the correct use of wash-hand basins and thorough handwashing
- having dedicated equipment (including complex equipment) for raw and ready-to-eat foods
- through 2-stage cleaning and the correct use of sanitisers
- and by controlling the risks posed by soily vegetables.

**Guidance** If equipment and utensils (for example chopping boards, containers and tongs) are to be used for raw and RTE foods, they should be disinfected by heat or an adequate dishwasher cycle (able to reach 80°C for 15 seconds) between uses.

**Observation** I was pleased to see contamination risks were controlled.

**Observation** I was pleased you could demonstrate effective E.coli 0157 control through the complete separation of raw and ready-to-eat food, the correct use of wash-hand basins and thorough handwashing, having dedicated equipment (including complex equipment) for raw and ready-to-eat foods, through 2-stage cleaning and the correct use of sanitisers, and by controlling the risks posed by soily vegetables.

### **Observation** I noted:

- your cook seemed very aware of these issues.
- you have a dishwasher and use a 2 stage sink wash up method too.
- · you use colour coded boards and a rack.

## Hand-washing

**Observation** Hand washing was managed well and wash-hand basins were well stocked with hand cleaning material.

**Observation** You were aware of good hand wash technique and have elbow operable taps.

### Personal Hygiene

**Observation** I was pleased to see that standards of personal hygiene were high.

## **Temperature Control**

**Observation** I was pleased to see you were able to limit bacterial growth and/or survival by applying appropriate temperature controls at points critical to food safety and that you were diligently monitoring temperatures.

### **Recommendation** To aid cooling:

- try and size reduce by portioning, putting hot food in flat trays and removing from hot pans.
- cover with a food grade net rather than covering with cling film.

### **Observation** I was pleased to note:

- most food is cooked fresh, except joints which are reheated.
- you monitor chill, frozen and cook/reheat temperatures with independent thermometers and record these.
- the main kitchen fridge temperature was a little high, possibly because it was at peak of use. Records showed temperatures to be satisfactory. Please monitor this closely.

# 2. Structure and Cleaning

The structure facilities and standard of cleaning and maintenance are all of a good standard and only minor repairs and/or improvements are required. Pest control and waste disposal provisions are adequate. The minor contraventions require your attention. (Score 5)

# Cleaning of Structure

**Contravention** The following structural items were dirty and require more frequent and thorough cleaning:

• underside to the tin opener

**Observation** The kitchen had been well maintained and the standard of cleaning was exceptionally high.

## Cleaning of Equipment and Food Contact Surfaces

**Observation** You had dedicated equipment for the preparation of raw and ready-to-eat foods.

**Observation** You had colour-coded equipment on which to prepare food.

### Cleaning Chemicals / Materials / Equipment and Methods

**Information** Ensure you use a surface sanitiser that conforms to BS EN 1276:1997 or BS EN 13697:2001. This information should be available on the label or by contacting the manufacturer.

**Information** A surface sanitiser may be rendered ineffective if you are not following the correct dilutions or allowing a sufficient time for the product to work (contact time). Always follow the instructions on the product label.

**Observation** I was pleased to see that the premises was kept clean and that your cleaning materials, methods and equipment were able to minimise the spread of harmful bacteria between surfaces.

### <u>Maintenance</u>

**Contravention** The following items had not been suitably maintained and must be repaired or replaced:

- door seal split to kitchen chiller
- seal gap to rear of wash hand basin

**Observation** I was pleased to see the kitchen had recently been refurbished.

## Facilities and Structural provision

**Observation** I was pleased to see the premises had been well maintained and that adequate facilities had been provided.

**Observation** You had fly screens to the windows, but these were not in use, and a fly was seen. Please ensure these are used.

## 3. Confidence in Management

A food safety management system is in place and you demonstrate a very good standard of compliance with the law. Food hazards are understood properly controlled managed and reviewed. Your records are appropriate and generally maintained. Your staff are suitably supervised and trained. You have a good track record. There are some minor contraventions which require your attention. (Score 5)

## Type of Food Safety Management System Required

**Observation** Your SFBB/food safety management system was in place and working well. I was confident you had effective control over hazards to food.

**Observation** You were date labelling perishable foods appropriately and could demonstrate effective control over food spoilage organisms.

**Observation** You had colour-coded equipment and effective separation between raw and ready-to-eat food at all stages in your operation.

**Observation** You were monitoring (and recording) the temperatures of your fridges and freezers well as the temperature of cooked/hot-held food and could demonstrate effective systems for controlling bacterial growth and survival.

## Proving Your Arrangements are Working Well

**Contravention** The Management sections in your Safer food Better Business (SFBB) pack are intended to demonstrate you are in day-to-day control of the hazards to food. The following Management sections were either missing, incomplete or not up-to-date:

• your temperature records have space for recording probe thermometer calibration. This was not being done.

### **Traceability**

**Observation** Your records were such that food could easily be traced back to its supplier.

### Waste Food and other Refuse

**Observation** You had measures in place to dispose of waste food appropriately and were employing the services of an approved waste contractor.

# **Training**

**Observation** I was pleased to see that food handlers and/or managers had been trained to an appropriate level and evidence of their training was made available.

# Infection Control / Sickness / Exclusion Policy

**Observation** Policies were in place to prevent any infected food handler from contaminating food.

## Allergens

**Contravention** You have not yet identified the allergens present in the food you prepare.

You have not properly informed your customers about the presence of allergens in the food you prepare.

You have not warned your customers about the potential for cross-contamination with allergens.

You have not done an allergen assessment based on the standard menu served, but have been reliant on resident assessment as to whether they have any allergies. You should fully assess your menu.

You have got allergy stickers but these were not used.

**Legal Requirement** Caterers must provide allergy information on all unpackaged food they sell. Catering businesses include restaurants, takeaways, deli counters, bakeries and sandwich bars etc. The potential for cross-contamination by allergens must also be made known to consumers. In addition food manufacturers must now label allergy causing ingredients on their pre-packed foods. You can obtain more information from the Trading Standards website www.norfolk.gov.uk/abc

## **Information** The 14 allergens are:

- cereals containing gluten
- crustaceans, for example prawns, crabs, lobster and crayfish
- eggs
- fish
- peanuts
- soybeans
- milk
- nuts, such as almonds, hazelnuts, walnuts, pecan nuts, Brazil nuts, pistachio, cashew and macadamia (Queensland) nuts
- celery (and celeriac)
- mustard
- sesame
- sulphur dioxide, which is a preservative found in some dried fruit

- lupin
- molluscs, for example clams, mussels, whelks, oysters, snails and squid

**Recommendation** Make a chart listing all your meals together with the 14 allergens (if present). Bring the chart to the attention of your customers and your staff.
