

**Public Protection (food & safety)**

**Food Premises Inspection Report**

Name of business:	Ron's Fish & Chips
Address of food business:	Stalls 94 - 95 Market Place Norwich NR2 1ND
Date of inspection:	25/09/2018
Risk rating reference:	18/00903/FOOD
Premises reference:	06/00035/FD_HS
Type of premises:	CHECK - Premises requiring review
Areas inspected:	All
Records examined:	SFBB, Temperature control records
Details of samples procured:	None
Summary of action taken:	Informal
General description of business:	Fish and chip stall on Norwich Market

**Relevant Legislation**

Food Safety Act 1990 (as amended)  
Regulation (EC) No 178/2002 applied by The General Food Regulations 2004 (as amended)  
Regulation (EC) No 852/2004 and No 853/2004 applied by Regulation 19 (1) of the Food Safety and Hygiene (England) Regulations 2013  
Health and Safety at Work etc. Act 1974 and related regulations  
Food Information Regulations 2014

**What you must do to comply with the law**

The report may include **Contraventions** - matters which do not comply with the law . You must address all of the contraventions identified; failure to do so could result in legal action being taken against you.

As a guide, contraventions relating to cleaning, temperature control and poor practice, should be dealt with straight away.

Contraventions relating to structural repairs, your food safety management system and staff training, should be completed within the next 2 months.

Health and safety contraventions should be dealt with within 3 months unless otherwise stated.

To assist you the report may also include **Observations** of current practice, useful **Information, Recommendations** of good practice and reminders of **Legal Requirements** .

My inspection was not intended to identify every contravention of the law and only covers those areas, practices and procedures examined at the time of the inspection. If the report fails to mention a particular matter this does not mean you have necessarily complied with the law.

## FOOD SAFETY

### How we calculate your Food Hygiene Rating:

The food safety section has been divided into the three areas which you are scored against for the hygiene rating: 1. food hygiene and safety procedures, 2. structural requirements and 3. confidence in management/control procedures. Each section begins with a summary of what was observed and the score you have been given. Details of how these scores combine to produce your overall food hygiene rating are shown in the table.

Compliance Area	You Score					
Food Hygiene and Safety	0	5	10	15	20	25
Structure and Cleaning	0	5	10	15	20	25
Confidence in management & control systems	0	5	10	15	20	30

  

Your Total score	0 - 15	20	25 - 30	35 - 40	45 - 50	> 50
Your Worst score	5	10	10	15	20	-

  

Your Rating is	5	4	3	2	1	0
----------------	---	---	---	---	---	---

Your Food Hygiene Rating is 4 - a good standard

### 1. Food Hygiene and Safety

Food hygiene standards are high. You demonstrated a very good standard of compliance with legal requirements. You have safe food handling practices and procedures and all the necessary control measures to prevent cross-contamination are in place. Some minor contraventions require your attention. **(Score 5)**

#### Contamination risks

**Contravention** The following exposed food to the general risk of cross-contamination with bacteria or allergens or its physical contamination with dirt or foreign objects:

- you had recently changed bread roll supplier and was not aware an allergen was used in its production.

**Legal Requirement** At all stages of production, processing and distribution, food must be protected from any contamination likely to render it unfit for human consumption, injurious to health or contaminated in such a way that it would be unreasonable to expect it to be consumed in that state.

**Observation** Contamination risks were generally controlled

**Observation** I was pleased you could demonstrate effective E.coli 0157 control through the complete separation of raw and ready-to-eat food, the correct use of

wash-hand basins and thorough hand washing, having dedicated equipment (including complex equipment) for raw and ready-to-eat foods, through 2-stage cleaning and the correct use of sanitisers, and by controlling the risks posed by soily vegetables.

**Observation** Observation I was pleased to see that you had dedicated work surfaces/areas for different food preparation i.e raw meat

#### Hand-washing

**Observation** Hand washing was managed well and wash-hand basins were well stocked with hand cleaning material.

#### Personal Hygiene

**Recommendation** staff also wear hats to help prevent physical contamination

### **2. Structure and Cleaning**

The structure facilities and standard of cleaning and maintenance are all of a good standard and only minor repairs and/or improvements are required. Pest control and waste disposal provisions are adequate. The minor contraventions require your attention. **(Score 5)**

#### Cleaning of Structure

**Observation** The kitchen had been well maintained and the standard of cleaning was very good .

#### Maintenance

**Contravention** The following items had not been suitably maintained and must be repaired or replaced:

- damaged end trim to shelving supporting vinegar dispenser. This was also exposing the melamine core which is difficult to keep clean.

### **3. Confidence in Management**

There are generally satisfactory food safety controls in place although there is evidence of some non-compliance with the law. All the significant food hazards are understood and controls are in place. Your records are appropriate and generally maintained but some deficiencies were identified. Some minor issues were identified relating to staff supervision and training. You are progressing towards a written food safety management system. You have a satisfactory track record. The contraventions require your attention; although not critical to food safety they may become so if not addressed. **(Score 10)**

#### Type of Food Safety Management System Required

**Legal Requirement** Food business operators must put in place, implement and maintain a permanent procedure or procedures based on HACCP principles:

- Identify hazards to food.
- Identify the critical limits (what is acceptable and unacceptable).
- Monitor critical control points to ensure critical limits are met.
- Keep appropriate records to demonstrate control measures are effective.

### Food Hazard Identification and Control

**Contravention** The Safe Methods in your Safer Food Better Business (SFBB) pack are intended to show you have identified the hazards to food and what you must do to control them. The following Safe Methods were either missing from your SFBB pack or had not been completed appropriately:

- cross-contamination
- chilling

### Proving Your Arrangements are Working Well

**Contravention** The Management sections in your Safer food Better Business (SFBB) pack are intended to demonstrate you are in day-to-day control of the hazards to food. The following Management sections were either missing, incomplete or not up-to-date:

- your Suppliers and/or Contacts lists
- staff training records

**Contravention** The following matters are needed in order to demonstrate you Food Safety management system is working as it should:

- there were numerous safe methods in the SFBB pack where you had written n/a not applicable. However, this is not the case in some circumstances in your business operation i.e. you should check that food deliveries are contamination free i.e. fish deliveries. You also have foods with a 'Use by date' i.e.cheese. Again you should check these foods are in date and you should have not written n/a. You should also check for signs of pests and record this in the appropriate Safe Method.
- you also need to regularly audit your SFBB pack. According to the pack the safe methods were done in 2005 and not reviewed since then.

### Training

**Contravention** The following evidence indicated there was a staff training need:

- you have no evidence that you have any food hygiene training.

**Legal Requirement** Food business operators must ensure that food handlers are supervised and instructed and/or trained in food hygiene matters to an appropriate level for the work they do

**Legal Requirement** Those responsible for the development and maintenance of food safety management procedures (or for the operation of relevant guides) must receive adequate training in the application of HACCP principles.

**Information** You can obtain a list of the training courses we provide on our website [www.norwich.gov.uk](http://www.norwich.gov.uk)

**Recommendation** A Level 2 Award in Food Safety in Catering or its equivalent (a 6-hour course leading to the award of a recognised certificate in food hygiene) would be appropriate for your food handlers. Booking details for this course are on our website: [www.norwich.gov.uk](http://www.norwich.gov.uk)

**Recommendation** A Level 3 Award for Supervising Food Safety in Catering would be appropriate for your supervisory staff and those with managerial responsibility. Booking details for this course are on our website: [www.norwich.gov.uk](http://www.norwich.gov.uk)

**Recommendation** Catering staff should refresh their food hygiene knowledge every 3 years so that they stay up to date with current legislation and good practice. Booking details for this course are on our website: [www.norwich.gov.uk](http://www.norwich.gov.uk)

## Allergens

**Contravention** You have not yet identified the allergens present in the food you handle or prepare. i.e. bread rolls contained an allergen.

**Legal Requirement** Caterers must provide allergy information on all unpackaged food they sell. Catering businesses include restaurants, takeaways, deli counters, bakeries and sandwich bars etc. The potential for cross-contamination by allergens must also be made known to consumers. In addition food manufacturers must now label allergy causing ingredients on their pre-packed foods. You can obtain more information from the Trading Standards website [www.norfolk.gov.uk/abc](http://www.norfolk.gov.uk/abc)

**Legal Requirement** Food manufacturers must now label allergy causing ingredients on their pre-packed foods. If you use pre-packed foods as ingredients you need to include the allergens listed on them within your own list of allergens. For example, some pre-packed spices you use will contain mustard which your customers will need to be made aware of.

**Information** Loose (also called non pre-packed) foods are:

- foods served at restaurants and canteens.
- takeaway foods that are placed into containers and sold at the same premises.
- any foods sold loose, e.g. meat or cheese at a deli counter, unpackaged bread or pick and mix sweets (including individually wrapped sweets)

**Information** The 14 allergens are:

- cereals containing gluten
- crustaceans, for example prawns, crabs, lobster and crayfish
- eggs
- fish
- peanuts
- soybeans
- milk

- nuts, such as almonds, hazelnuts, walnuts, pecan nuts, Brazil nuts, pistachio, cashew and macadamia (Queensland) nuts
- celery (and celeriac)
- mustard
- sesame
- sulphur dioxide, which is a preservative found in some dried fruit
- lupin
- molluscs, for example clams, mussels, whelks, oysters, snails and squid

**Information** The Food Information Regulations require that you know what allergens are in the food you provide. You can no longer claim you don't know what allergens are present. Neither can you simply state that all the foods you serve might contain an allergen.

**Observation** You had identified the presence of allergens in your non-prepacked food and had brought this to the attention of your customers.
