

**Public Protection (food & safety)**

**Food Premises Inspection Report**

Name of business:	The Banger Stop
Address of food business:	Stall 80 Market Place Norwich NR2 1ND
Date of inspection:	10/01/2019
Risk rating reference:	19/00016/FOOD
Premises reference:	18/00277/FD_HS
Type of premises:	Food take away premises
Areas inspected:	Market stall
Records examined:	SFBB
Details of samples procured:	None
Summary of action taken:	Informal
General description of business:	Market stall

**Relevant Legislation**

Food Safety Act 1990 (as amended)

Regulation (EC) No 178/2002 applied by The General Food Regulations 2004 (as amended)

Regulation (EC) No 852/2004 and No 853/2004 applied by Regulation 19 (1) of the Food Safety and Hygiene (England) Regulations 2013

Health and Safety at Work etc. Act 1974 and related regulations

Food Information Regulations 2014

**What you must do to comply with the law**

The report may include **Contraventions** - matters which do not comply with the law . You must address all of the contraventions identified; failure to do so could result in legal action being taken against you.

As a guide, contraventions relating to cleaning, temperature control and poor practice, should be dealt with straight away.

Contraventions relating to structural repairs, your food safety management system and staff training, should be completed within the next 2 months.

Health and safety contraventions should be dealt with within 3 months unless otherwise stated.

To assist you the report may also include **Observations** of current practice, useful **Information, Recommendations** of good practice and reminders of **Legal Requirements** .

My inspection was not intended to identify every contravention of the law and only covers those areas, practices and procedures examined at the time of the inspection. If the report fails to mention a particular matter this does not mean you have necessarily complied with the law.

## FOOD SAFETY

### How we calculate your Food Hygiene Rating:

The food safety section has been divided into the three areas which you are scored against for the hygiene rating: 1. food hygiene and safety procedures, 2. structural requirements and 3. confidence in management/control procedures. Each section begins with a summary of what was observed and the score you have been given. Details of how these scores combine to produce your overall food hygiene rating are shown in the table.

Compliance Area	You Score					
Food Hygiene and Safety	0	5	10	15	20	25
Structure and Cleaning	0	5	10	15	20	25
Confidence in management & control systems	0	5	10	15	20	30

  

Your Total score	0 - 15	20	25 - 30	35 - 40	45 - 50	> 50
Your Worst score	5	10	10	15	20	-

  

Your Rating is	5	4	3	2	1	0
----------------	---	---	---	---	---	---

Your Food Hygiene Rating is 4 - a good standard

### 1. Food Hygiene and Safety

Food hygiene standards are high. You demonstrated a very good standard of compliance with legal requirements. You have safe food handling practices and procedures and all the necessary control measures to prevent cross-contamination are in place. Some minor contraventions require your attention. **(Score 5)**

#### Contamination risks

**Contravention** The following exposed ready-to-eat food and/or its packaging to the risk of cross-contamination with foodborne bacteria from raw meat or unwashed fruits and vegetables:

- the same tongs were being used for raw foods i.e sausages and cooked i.e sausages on the griddle. You informed me that you had another set of tongs, ensure that you use separate tongs for raw and ready-to-eat foods at all times.

**Information** The FSA has issued guidance on controlling *E.coli* 0157 through:

- the complete separation of raw and ready-to-eat food
- the correct use of wash-hand basins and thorough handwashing
- having dedicated equipment (including complex equipment) for raw and ready-to-eat foods

- thorough 2-stage cleaning and the correct use of sanitisers
  - and by controlling the risks posed by soil contaminated vegetables.
- Visit: [www.food.gov.uk](http://www.food.gov.uk) for more information

### Hand-washing

**Contravention** the wash-hand basin was not in regular use. Regular hand washing is important for personal cleanliness. Remind all food handlers of the need to wash their hands before starting or returning to work, and specifically:

- After using the toilet;
- After handling rubbish;
- After smoking;
- After taking a break;
- After handling raw food

### Personal Hygiene

**Observation** The following are examples of poor personal hygiene or where it was made difficult for food handlers to maintain sufficiently high standards of personal cleanliness:

- a food handler was seen not wearing protective over clothing. However an apron was then put on.

**Legal requirement** All persons in food handling areas must wear suitable, clean, and where appropriate protective clothing.

### Temperature Control

**Guidance** It is essential to know that your probe thermometer is working properly. A simple way to check a digital probe is to put it in iced water and boiling water:

- The readings in iced water should be between -1°C and 1°C.
- The readings in boiling water should be between 99°C and 101°C.

If the reading is outside this range you should replace your probe or return it to the manufacturer to be calibrated.

## **2. Structure and Cleaning**

The structure facilities and standard of cleaning and maintenance are all of a good standard and only minor repairs and/or improvements are required. Pest control and waste disposal provisions are adequate. The minor contraventions require your attention. **(Score 5)**

### Cleaning of Structure

**Contravention** The following items were dirty and require more frequent and thorough cleaning:

- pipe work to the sinks
- rear wall underneath the sinks

## Cleaning Chemicals / Materials / Equipment and Methods

**Observation** I was pleased to see that the premises was kept clean and that your cleaning materials, methods and equipment were able to minimise the spread of harmful bacteria between surfaces.

## Facilities and Structural provision

**Observation** I was pleased to see the premises had been well maintained and that adequate facilities had been provided.

## **3. Confidence in Management**

There are generally satisfactory food safety controls in place although there is evidence of some non-compliance with the law. Your records are appropriate and generally maintained but some deficiencies were identified. Some minor issues were identified relating to staff supervision and training. The contraventions require your attention; although not critical to food safety they may become so if not addressed. **(Score 10)**

## Food Hazard Identification and Control

**Contravention** The following matters demonstrated that you have not identified hazards to food (such as bacteria growing on food, bacteria surviving in cooked food and cross-contamination) or the methods of control at critical points in your operation::

- using the same tongs for use with raw and cooked foods.

## Proving Your Arrangements are Working Well

**Contravention** The MANAGEMENT sections in your Safer food Better Business pack are intended to demonstrate you are in day-to-day control of the hazards to food. The following MANAGEMENT sections were either missing, incomplete or not up-to-date:

- The 4 WEEKLY review
- Your Contacts lists
- Staff training records
- You need to fill in the methods of cleaning to your cleaning schedule.

**Contravention** You are not working to the following safe methods in your Food Safety Management system:

- it states in your pack that watches and jewellery are removed before preparing food. These had not been.

## Traceability

**Observation** Your records were such that food could easily be traced back to its supplier.

## Waste Food and other Refuse

**Observation** You had measures in place to dispose of waste food appropriately and were employing the services of a registered waste carrier.

### Training

**Observation** I was pleased to see that food handlers had been trained to an appropriate level and evidence of their training was made available.

### Infection Control / Sickness / Exclusion Policy

**Guidance** Public Health England recommends that food handlers known or suspected to be suffering from a food-borne infection or gastro intestinal illness stay away from work until symptom-free for 48 hours.

### Allergens

**Observation** You had identified the presence of allergens in your non-prepacked food and had brought this to the attention of your customers.
