

Public Protection (food & safety)

Food Premises Inspection Report

Name of business:	Limelight Studios - The Green Room Cafe
Address of food business:	113 Aylsham Road Norwich NR3 2HY
Date of inspection:	26/03/2019
Risk rating reference:	19/00289/FOOD
Premises reference:	16/00316/HASAWA
Type of premises:	Restaurant/cafe
Areas inspected:	Main Kitchen
Records examined:	SFBB
Details of samples procured:	None
Summary of action taken:	Formal
General description of business:	Small cafe only serving those attending studio.

Relevant Legislation

Food Safety Act 1990 (as amended)
 Regulation (EC) No 178/2002 applied by The General Food Regulations 2004 (as amended)
 Regulation (EC) No 852/2004 and No 853/2004 applied by Regulation 19 (1) of the Food Safety and Hygiene (England) Regulations 2013
 Health and Safety at Work etc. Act 1974 and related regulations
 Food Information Regulations 2014

What you must do to comply with the law

The report may include **Contraventions** - matters which do not comply with the law . You must address all of the contraventions identified; failure to do so could result in legal action being taken against you.

As a guide, contraventions relating to cleaning, temperature control and poor practice, should be dealt with straight away.

Contraventions relating to structural repairs, your food safety management system and staff training, should be completed within the next 2 months.

Health and safety contraventions should be dealt with within 3 months unless otherwise stated.

To assist you the report may also include **Observations** of current practice, useful **Information, Recommendations** of good practice and reminders of **Legal Requirements** .

My inspection was not intended to identify every contravention of the law and only covers those areas, practices and procedures examined at the time of the inspection. If the report fails to mention a particular matter this does not mean you have necessarily complied with the law.

FOOD SAFETY

How we calculate your Food Hygiene Rating:

The food safety section has been divided into the three areas which you are scored against for the hygiene rating: 1. food hygiene and safety procedures, 2. structural requirements and 3. confidence in management/control procedures. Each section begins with a summary of what was observed and the score you have been given. Details of how these scores combine to produce your overall food hygiene rating are shown in the table.

Compliance Area	You Score					
Food Hygiene and Safety	0	5	10	15	20	25
Structure and Cleaning	0	5	10	15	20	25
Confidence in management & control systems	0	5	10	15	20	30
Your Total score	0 - 15	20	25 - 30	35 - 40	45 - 50	> 50
Your Worst score	5	10	10	15	20	-
Your Rating is	5	4	3	2	1	0

Your Food Hygiene Rating is 5 - a very good standard

1. Food Hygiene and Safety

Food hygiene standards are high. You demonstrated a very good standard of compliance with legal requirements. You have safe food handling practices and procedures and all the necessary control measures to prevent cross-contamination are in place. Some minor contraventions require your attention. **(Score 5)**

Contamination risks

Contravention The following exposed ready-to-eat food and or its packaging to the risk of cross-contamination :

- Eggs stored at top of fridge.

Legal Requirement At all stages of production, processing and distribution, food must be protected from any contamination likely to render it unfit for human consumption, injurious to health or contaminated in such a way that it would be unreasonable to expect it to be consumed in that state.

Guidance The FSA (visit www.food.gov.uk for more information) has issued guidance on controlling E.coli 0157 through:

- * the complete separation of raw and ready-to-eat food
- * the correct use of wash-hand basins and thorough hand washing
- * having dedicated equipment for raw and ready-to-eat foods
- * through 2-stage cleaning and the correct use of sanitisers
- * and by controlling the risks posed by soily vegetables.

Recommendation Provide separate equipment and utensils designated for use with either raw or ready-to-eat foods, which can be easily identified (e.g. colour coded) and stored and washed separately.

Observation I was pleased to see you were able to demonstrate effective controls to prevent cross-contamination.

Observation I was pleased to note that you have separate tongs for raw and ready to eat foods.

You use your domestic dishwasher for equipment, but will soon have one on site.

Hand-washing

Legal Requirement An adequate number of wash hand basins must be available for use, they must be suitably located and designated for cleaning hands.

Information Handwashing is required:

- * before handling ready-to-eat food
- * after touching raw food and its packaging, including unwashed fruit and vegetables
- * after a break/smoking
- * after going to the toilet
- * after cleaning
- * after removing waste

* after blowing your nose

Recommendation For extra protection against cross contamination use a liquid soap with disinfectant properties conforming to the European standard BS EN 1499: 1997. This information should be available on the product label or may be obtained from the supplier or manufacturer.

Observation I was pleased to see hand washing was well managed.

Personal Hygiene

Legal Requirement All persons in food handling areas must wear suitable, clean, and where appropriate protective clothing.

Observation I was pleased to see that standards of personal hygiene were high.

Observation The kitchen was not in use at my visit, but you have advised staff wear tabards.

Temperature Control

Legal Requirement Raw materials, ingredients, intermediate products and finished products likely to support the reproduction of pathogenic micro-organisms or the formation of toxins must not be kept at temperatures that might result in a risk to health.

Legal Requirement Food which has been cooked or reheated and is intended to be kept hot until it is sold, must either be held at or above 63°C or it can be kept for service or on display for sale for a single period of less than 2 hours; at the end of the 2 hour period the food should be cooled as quickly as possible and kept at or below 8°C or discarded.

Guidance It is essential to know that your probe thermometer is working properly. If the reading is outside these ranges you should replace your probe or return it to the manufacturer to be calibrated. A simple way to check a digital probe is to put it in iced water and boiling water:

- The readings in iced water should be between -1°C and 1°C.
- The readings in boiling water should be between 99°C and 101°C.

Recommendation The core temperature of cooked and reheated foods should reach 75° C for 30 seconds or an equivalent time and temperature combination.

Recommendation/Observation Provide independent fridge thermometers. The digital readout are not always accurate. Please check whether you have a probe thermometer and wipes available.

Observation I was pleased to see you were able to limit bacterial growth and/or survival by applying appropriate temperature controls at points critical to food safety and that you were monitoring temperatures.

Observation You are monitoring and recording fridge temperatures well. However one entry showed a temperature of 10 degrees C. You are advised to record follow up action when a problem has been identified.

Unfit food

Recommendation You should have a system to identify when open or prepared foods need to be used by or discarded, to ensure the food is fit for consumption. I recommend you apply labels which give a date that is 2 days after the day of production e.g. if food is opened on Monday it should be used by the end of Wednesday (an exception is rice which should not be kept longer than 24 hours)

Observation Most foods are made fresh, to order.

2. Structure and Cleaning

The structure facilities and standard of cleaning and maintenance are all excellent and you demonstrated full compliance with the law. There is evidence of effective pest control and procedures are in place to rectify any problems as they arise. There is good provision for waste disposal. **(Score 0)**

Cleaning of Structure

Information A detergent is a chemical used to remove grease, dirt and food and is used in the first cleaning step.

Information Disinfectant: is a chemical that kills bacteria.

Information Different sanitisers require different CONTACT TIMES to be effective. Ensure that you know what the contact time is and that all your staff are trained to use the sanitiser effectively.

Observation The kitchen had been well maintained and the standard of cleaning was good.

Cleaning Chemicals / Materials / Equipment and Methods

Information A surface sanitiser may be rendered ineffective if you are not following the correct dilutions or allowing a sufficient time for the product to work (CONTACT TIME). Always follow the instructions on the product label.

Guidance Disinfectants and sanitisers must at least meet the requirements of one of the following standards: BS EN 1276 or BS EN 13697; or other standards that meet the same conditions and requirements.

Observation I was pleased to see that the premises was kept clean and that your cleaning materials, methods and equipment were able to minimise the spread of harmful bacteria between surfaces.

Facilities and Structural provision

Legal Requirement The facilities for washing food must be separate from the hand-washing facility.

Observation I was pleased to see that adequate facilities had been provided.

Pest Control

Legal Requirement The layout, design, construction, siting and size of food premises must permit good food hygiene practices, including protection against pests.

Observation You have a pest control contract in place and there is no evidence of pest activity on the premises.

If you have a problem with flies in summer you should consider the provision of a Electric Fly Killer.

3. Confidence in Management

A food safety management system is in place and you demonstrate a very good standard of compliance with the law. You have a good track record. There are some minor contraventions which require your attention. **(Score 5)**

Type of Food Safety Management System Required

Legal Requirement Food business operators must put in place, implement and maintain a permanent procedure or procedures based on HACCP principles:

- Identify hazards to food.
- Identify the critical limits (what is acceptable and unacceptable).
- Monitor critical control points to ensure critical limits are met.
- Keep appropriate records to demonstrate control measures are effective.

Legal Requirement Ensure that your food safety management system is available on site so your staff can refer to your procedures and so that daily records of checks can be completed.

Information You can download a Safer Food Better Business pack and refill diary pages from the FSA website: www.food.gov.uk/business-industry/caterers/sfbb

Observation Your SFBB/food safety management system was in place and working well. I was confident you had effective control over hazards to food.

If you use the pack correctly there is no need to maintain additional opening/closing checks, and temperature control records, particularly as your business is low risk. Ensure you review the pack regularly, ensuring all sections are completed.

Observation You were date labelling perishable foods appropriately and could demonstrate effective control over food spoilage organisms.

Observation You had colour-coded equipment and effective separation between raw and ready-to-eat food at all stages in your operation.

Observation You were monitoring (and recording) the temperatures of your fridges and freezers well as the temperature of cooked/hot-held food and could demonstrate effective systems for controlling bacterial growth and survival.

Traceability

Observation Your records were such that food could easily be traced back to its supplier.

Observation Supplies are bought at local supermarkets and brought straight to the premises.

Waste Food and other Refuse

Legal Requirement The Environmental Protection Act 1990 requires all commercial waste to be disposed of properly by authorised persons. Records should be available to show compliance.

Observation You had measures in place to dispose of waste food appropriately and were employing the services of an approved waste contractor.

Training

Legal Requirement Food business operators must ensure that food handlers are supervised and instructed and/or trained in food hygiene matters to an appropriate level for the work they do.

Information You can obtain a list of the training courses we provide on our website www.norwich.gov.uk

Information There are Level 2 Awards in Food Allergen Awareness on offer in Dereham. If you are interested contact 0800 689 3512

Recommendation A Level 2 Award in Food Safety in Catering or its equivalent (a 6-hour course leading to the award of a recognised certificate in food hygiene) would be appropriate for your food handlers. Booking details for the equivalent CIEH course are on our website: www.norwich.gov.uk

Recommendation Catering staff should refresh their food hygiene knowledge every 3 years so that they stay up to date with current legislation and good practice. Booking details for this course are on our website: www.norwich.gov.uk

Observation I was pleased to see that food handlers had been trained to an appropriate level and evidence of their training was made available.

Infection Control / Sickness / Exclusion Policy

Guidance Public Health England recommends that food handlers known or suspected to be suffering from a food-borne infection or gastrointestinal illness stay away from work until symptom-free for 48 hours.

Observation Policies were in place to prevent any infected food handler from contaminating food.

Allergens

Legal Requirement Caterers must provide allergy information on all unpackaged food they sell. Catering businesses include restaurants, takeaways, deli counters, bakeries and sandwich bars etc. The potential for cross-contamination by allergens must also be made known to consumers. In addition food manufacturers must now label allergy causing ingredients on their pre-packed foods. You can obtain more information from the Trading Standards website www.norfolk.gov.uk/abc

Information Advise your customers how to get allergen information. You can display a sign along the lines of ASK OUR STAFF ABOUT ALLERGENS

Information The Food Standards Agency has produced a chart that you may find useful www.food.gov.uk/sites/default/files/media/document/allergen-chart.pdf

Information Allergen information could be written down on a chalk board or chart, or provided orally by a member of staff. Where the specific allergen information is not provided upfront, clear sign posting to where this information could be obtained must be provided.

Information The 14 allergens are:

- cereals containing gluten
- crustaceans, for example prawns, crabs, lobster and crayfish
- eggs
- fish
- peanuts
- soybeans
- milk
- nuts, such as almonds, hazelnuts, walnuts, pecan nuts, Brazil nuts, pistachio, cashew and macadamia (Queensland) nuts
- celery (and celeriac)
- mustard
- sesame
- sulphur dioxide, which is a preservative found in some dried fruit
- lupin
- molluscs, for example clams, mussels, whelks, oysters, snails and squid.

Information The Food Information Regulations require that you know what allergens are in the food you provide. You can no longer claim you don't know what allergens are present. Neither can you simply state that all the foods you serve might contain an allergen:

- Be sure you know exactly what your allergens are
- Convey this information to your customers accurately and consistently.
