

Public Protection (food & safety)

Food Premises Inspection Report

Name of business:	Rishi Restaurant
Address of food business:	26 Mousehold Lane Norwich NR7 8HE
Date of inspection:	30/10/2019
Risk rating reference:	19/00754/FOOD
Premises reference:	10/00230/FD_HS
Type of premises:	Restaurant or cafe
Areas inspected:	All
Records examined:	SFBB, Pest control report
Details of samples procured:	None
Summary of action taken:	Informal
General description of business:	Indian restaurant serving local community

Relevant Legislation

Food Safety Act 1990 (as amended)

Regulation (EC) No 178/2002 applied by The General Food Regulations 2004 (as amended)

Regulation (EC) No 852/2004 and No 853/2004 applied by Regulation 19 (1) of the Food Safety and Hygiene (England) Regulations 2013

Health and Safety at Work etc. Act 1974 and related regulations

Food Information Regulations 2014

What you must do to comply with the law

The report may include **Contraventions** - matters which do not comply with the law . You must address all of the contraventions identified; failure to do so could result in legal action being taken against you.

As a guide, contraventions relating to cleaning, temperature control and poor practice, should be dealt with straight away.

Contraventions relating to structural repairs, your food safety management system and staff training, should be completed within the next 2 months.

Health and safety contraventions should be dealt with within 3 months unless otherwise stated.

To assist you the report may also include **Observations** of current practice, useful **Information, Recommendations** of good practice and reminders of **Legal Requirements** .

My inspection was not intended to identify every contravention of the law and only covers those areas, practices and procedures examined at the time of the inspection. If the report fails to mention a particular matter this does not mean you have necessarily complied with the law.

FOOD SAFETY

How we calculate your Food Hygiene Rating:

The food safety section has been divided into the three areas which you are scored against for the hygiene rating: 1. food hygiene and safety procedures, 2. structural requirements and 3. confidence in management/control procedures. Each section begins with a summary of what was observed and the score you have been given. Details of how these scores combine to produce your overall food hygiene rating are shown in the table.

Compliance Area	You Score					
Food Hygiene and Safety	0	5	10	15	20	25
Structure and Cleaning	0	5	10	15	20	25
Confidence in management & control systems	0	5	10	15	20	30
Your Total score	0 - 15	20	25 - 30	35 - 40	45 - 50	> 50
Your Worst score	5	10	10	15	20	-
Your Rating is	5	4	3	2	1	0

Your Food Hygiene Rating is 3 - a generally satisfactory standard

1. Food Hygiene and Safety

Food hygiene standards are generally satisfactory and maintained. There is evidence of some non-compliance with legal requirements. Some lapses are evident however generally you have satisfactory food handling practices and procedures and adequate control measures to prevent cross-contamination are in place. The contraventions require your attention; although not critical to food safety they may become so if not addressed.
(Score 10)

Contamination risks

Contravention The following exposed food to the general risk of cross-contamination with bacteria or allergens or its physical contamination with dirt, foreign objects or chemicals:

- a container of food was stacked directly on the surface of another prepared food below. This gave the risk of any contaminants on the base of the container contaminating the surface of the uncovered food it was placed on
- numerous uncovered foods in kitchen
- uncovered foods under an open window with damaged fly screen
- brown chopping knife used for chopping vegetables was sited on top of a yellow chopping board used for cooked meats
- cooking staff were not fully aware of food allergens they handled or are within ingredients used in food they cooked.

- staff members bicycle in rear store room
- large numbers of loose raw whole chickens in bulk freezer

Hand-washing

Observation I was pleased to see hand washing was well managed.

2. Structure and Cleaning

The structure facilities and standard of cleaning and maintenance are of a generally satisfactory standard but there are some repairs and/or improvements which are required in order for you to comply with the law. Pest control and waste disposal provisions are adequate. The contraventions require your attention; although not critical to food safety they may become so if not addressed. **(Score 10)**

Cleaning of Structure

Contravention The following items were dirty and require more frequent and thorough cleaning:

- floor/wall junctions
- around equipment feet
- behind and under equipment
- walls particularly behind food preparation surfaces
- hand contact surfaces such as light switches and door handles
- mastic joints behind sinks
- fly screens
- de-scale the staff WC pan

Contravention The following items could not be effectively cleaned and must be covered or made non-absorbent:

- wood pallets under dishwasher and ice machine behind bar

Cleaning of Equipment and Food Contact Surfaces

Contravention The following items are dirty and must be cleaned:

- fridge and freezer seals
- hand contact surfaces on food equipment

Maintenance

Contravention The following had not been suitably maintained and must be repaired or replaced:

- damage metal trim on entry to walk-in fridge
- flaking to walls in cellar
- damaged fly screen to window in main kitchen
- damaged wall under wash hand basin in upstairs staff sink lobby area
- damaged/missing display panel to bulk freezer in dry store

Pest Control

Contravention Pest proofing is inadequate particularly in the following areas:

- no fly screens to open windows
- damaged fly screen to window in main kitchen

3. Confidence in Management

There are generally satisfactory food safety controls in place although there is evidence of some non-compliance with the law. All the significant food hazards are understood and controls are in place. Your records are appropriate and generally maintained but some deficiencies were identified. Some minor issues were identified relating to staff supervision and training. You have a satisfactory track record. The contraventions require your attention; although not critical to food safety they may become so if not addressed. **(Score 10)**

Proving Your Arrangements are Working Well

Contravention You are not working to the following safe methods in your SFBB pack:

- 4-weekly checks
- cleaning schedule
- maintenance / pest control
- cross contamination/ physical or chemical contamination
- food allergies
- cleaning / clear and clean as you go

Traceability

Observation Your records were such that food could easily be traced back to its supplier.

Waste Food and other Refuse

Observation You had measures in place to dispose of waste food appropriately and were employing the services of an approved waste contractor.

Training

Contravention The following evidence indicates there is a staff training need as food handlers:

- were not cleaning properly
- did not appreciate allergen risks

Allergens

Contravention You are failing to manage allergens properly:

- you have not identified the allergens present in the food you prepare

- you are not informing customers about the risk of cross contamination with allergens.

Legal Requirement Caterers must provide allergy information on all unpackaged food they sell. Catering businesses include restaurants, takeaways, deli counters, bakeries and sandwich bars etc. The potential for cross-contamination by allergens must also be made known to consumers. In addition food manufacturers must now label allergy causing ingredients on their pre-packed foods. You can obtain more information from the Trading Standards website www.norfolk.gov.uk/abc

Information Advise your customers how to get allergen information. You can display a sign along the lines of ASK OUR STAFF ABOUT ALLERGENS

Information Allergen information could be written down on a chalk board or chart, or provided orally by a member of staff. Where the specific allergen information is not provided upfront, clear signposting to where this information could be obtained must be provided.

Information The 14 allergens are:

- cereals containing gluten
- crustaceans, for example prawns, crabs, lobster and crayfish
- eggs
- fish
- peanuts
- soybeans
- milk
- nuts, such as almonds, hazelnuts, walnuts, pecan nuts, Brazil nuts, pistachio, cashew and macadamia (Queensland) nuts
- celery (and celeriac)
- mustard
- sesame
- sulphur dioxide, which is a preservative found in some dried fruit
- lupin
- molluscs, for example clams, mussels, whelks, oysters, snails and squid

Information The Food Information Regulations require that you know what allergens are in the food you provide. You can no longer claim you don't know what allergens are present. Neither can you simply state that all the foods you serve might contain an allergen:

- Be sure you know exactly what your allergens are
- Convey this information to your customers accurately and consistently

Recommendation Make a chart listing all your meals together with the 14 allergens (if present). Bring the chart to the attention of your customers and your staff.

Recommendation Add allergy information to your menu
