

Public Protection (food & safety)

Food Premises Inspection Report

Name of business: Mumbai Kitchen

Address of food business: 229 Queens Road

Norwich Norfolk NR1 3AE

Date of inspection: 13/11/2019
Risk rating reference: 19/00778/FOOD
Premises reference: 13510/0229/0/000

Type of premises:

Areas inspected:

Records examined:

Food take away premises

Main Kitchen, Storeroom

Temperature control records

Details of samples procured: None Summary of action taken: Informal

General description of business: Indian Takeaway

Relevant Legislation

Food Safety Act 1990 (as amended)

Regulation (EC) No 178/2002 applied by The General Food Regulations 2004 (as amended)

Regulation (EC) No 852/2004 and No 853/2004 applied by Regulation 19 (1) of the Food

Safety and Hygiene (England) Regulations 2013

Health and Safety at Work etc. Act 1974 and related regulations

Food Information Regulations 2014

What you must do to comply with the law

The report may include **Contraventions** - matters which do not comply with the law . You must address all of the contraventions identified; failure to do so could result in legal action being taken against you.

As a guide, contraventions relating to cleaning, temperature control and poor practice, should be dealt with straight away.

Contraventions relating to structural repairs, your food safety management system and staff training, should be completed within the next <u>2 months</u>.

Health and safety contraventions should be dealt with within 3 months unless otherwise stated.

To assist you the report may also include **Observations** of current practice, useful **Information**, **Recommendations** of good practice and reminders of **Legal Requirements**.

My inspection was not intended to identify every contravention of the law and only covers those areas, practices and procedures examined at the time of the inspection. If the report fails to mention a particular matter this does not mean you have necessarily complied with the law.

FOOD SAFETY

How we calculate your Food Hygiene Rating:

The food safety section has been divided into the three areas which you are scored against for the hygiene rating: 1. food hygiene and safety procedures, 2. structural requirements and 3. confidence in management/control procedures. Each section begins with a summary of what was observed and the score you have been given. Details of how these scores combine to produce your overall food hygiene rating are shown in the table.

| Compliance Area | | | | You Score | | | | | |
|--|--------|----|---------|-----------|---------|----|---------|----|------|
| Food Hygiene and Safety | | | | 0 | 5 | 10 | 15 | 20 | 25 |
| Structure and Cleaning | | | | 0 | 5 | 10 | 15 | 20 | 25 |
| Confidence in management & control systems | | | | 0 | 5 | 10 | 15 | 20 | 30 |
| | | | | | | | | | |
| Your Total score | 0 - 15 | 20 | 25 - 30 | | 35 - 40 | | 45 - 50 | | > 50 |
| Your Worst score | 5 | 10 | 10 | | 15 | | 20 | | - |
| | | | | | | | | | |
| Your Rating is | 5 | 4 | 3 | | 2 | | 1 | | 0 |

Your Food Hygiene Rating is 3 - a generally satisfactory standard

1. Food Hygiene and Safety

Food hygiene standards are high. You demonstrated a very good standard of compliance with legal requirements. You have safe food handling practices and procedures and all the necessary control measures to prevent cross-contamination are in place. Some minor contraventions require your attention. (Score 5)

Contamination risks

Observation I was pleased to see you were able to demonstrate effective controls to prevent cross-contamination.

Recommendation Chopping/cutting boards were held stable with tea towels/cloths and could contaminate the board. Use silicone board mats to stabilise your cutting boards. These can be placed in the dishwasher and /or can be sterilised

Hand-washing

Contravention The following indicated that hand-washing was not suitably managed:

• no soap to the wash hand basin in WC

Personal Hygiene

Observation I was pleased to see that standards of personal hygiene were high

Temperature Control

Recommendation I recommend that you purchase a probe thermometer and probe wipes

Poor Practices

Contravention The following matters represented poor practice and if allowed to continue may cause food to become contaminated or lead to its deterioration:

food e.g cabbage was being stored on floor in the storeroom

Legal Requirement food must be stored off the floor where it might be at risk of contamination

2. Structure and Cleaning

The structure facilities and standard of cleaning and maintenance are of a generally satisfactory standard but there are some repairs and/or improvements which are required in order for you to comply with the law. Pest control and waste disposal provisions are adequate. The contraventions require your attention; although not critical to food safety they may become so if not addressed. (Score 10)

Cleaning of Structure

Contravention The following items were dirty and require more frequent and thorough cleaning:

- flooring underneath equipment
- walls in storeroom
- walls behind cooking range

Recommendation Housekeeping could be greatly improved. Remove redundant items and equipment from food rooms, tidy away miscellaneous objects into drawers and boxes and keep work surfaces and the floor clear for ease of cleaning and disinfection.

Cleaning of Equipment and Food Contact Surfaces

Contravention The following items are dirty and must be cleaned:

- fridge and freezer seals
- blade to table top can opener
- food containers
- seals to chest freezer numbered 2
- interior bottom to fridge

- wheels to equipment
- sides to equipment
- · green cutting board had visible mould to it
- mastic to the washing up sink

Cleaning Chemicals / Materials / Equipment and Methods

Contravention The following evidence demonstrated your cleaning materials, equipment and methods were not sufficient to control the spread of harmful bacteria between surfaces:

- you are not using the 2-stage cleaning technique
- you did not have appropriate cleaning chemicals available e.g there was no sanitiser on the premises. However sanitiser was purchased from the local shop during my visit

Guidance Even when using a surface sanitiser you should be following the 'two-stage' cleaning method. Apply the sanitiser once to remove visible dirt and food debris and then a second time to ensure effective disinfection. Make sure you follow the correct contact time for the product.

Maintenance

Contravention The following had not been suitably maintained and must be repaired or replaced:

- split seals to chest freezer
- bare wood to the door frame and threshold in the storeroom
- shelving to stainless steel table had rust on it

Facilities and Structural provision

Recommendation A plastic diffuser cover is recommended on all fluorescent strip lighting. These can be removed for cleaning and will help contain glass fragments in the event of a breakage

Pest Control

Contravention Pest proofing is inadequate particularly in the following areas:

gap around window

Legal Requirement any gaps and holes to external doors, windows, pipes, drains etc. must be filled or covered with a solid, durable material in order to minimise pest entry points into food preparation and storage areas

3. Confidence in Management

There are generally satisfactory food safety controls in place although there is evidence of some non-compliance with the law. The contraventions require your attention; although not critical to food safety they may become so if not addressed. (Score 10)

Type of Food Safety Management System Required

Contravention You do not have a food safety management system. Implement Safer Food Better Business or an equivalent food safety management system.:

Information You can download a Safer Food Better Business pack and refill diary pages from the FSA website: www.food.gov.uk/business-industry/caterers/sfbb

Information As you are a new business you have been given the benefit of the doubt despite your food safety management system not fully complying with the law. You must act on this now as your hygiene rating score will be reduced to a maximum of 1 if there is a similar situational at the next visit.

Traceability

Observation Your records were such that food could easily be traced back to its supplier.

Waste Food and other Refuse

Observation You had measures in place to dispose of waste food appropriately and were employing the services of an approved waste contractor.

Infection Control / Sickness / Exclusion Policy

Observation Policies were in place to prevent any infected food handler from contaminating food.

<u>Allergens</u>

Contravention You are failing to manage allergens properly:

• You have not identified the allergens present in the food you prepare

Legal Requirement Caterers must provide allergy information on all unpackaged food they sell. Catering businesses include restaurants, takeaways, deli counters, bakeries and sandwich bars etc. The potential for cross-contamination by allergens must also be made known to consumers. In addition food manufacturers must now label allergy causing ingredients on their pre-packed foods. You can obtain more information from the Trading Standards website www.norfolk.gov.uk/abc

Information The 14 allergens are:

- cereals containing gluten
- crustaceans, for example prawns, crabs, lobster and crayfish
- eggs
- fish
- peanuts
- soybeans
- milk
- nuts, such as almonds, hazelnuts, walnuts, pecan nuts, Brazil nuts, pistachio, cashew and macadamia (Queensland) nuts
- celery (and celeriac)
- mustard
- sesame
- sulphur dioxide, which is a preservative found in some dried fruit
- lupin
- molluscs, for example clams, mussels, whelks, oysters, snails and squid

Information There are Level 2 Awards in Food Allergen Awareness on offer in Dereham. If you are interested contact 0800 689 3512

Recommendation Make a chart listing all your meals together with the 14 allergens (if present). Bring the chart to the attention of your customers and your staff.
