

Public Protection (food & safety)

Food Premises Inspection Report

Name of business:	Albaraka
Address of food business:	12 Earlham House Shops Earlham Road Norwich NR2 3PD
Date of inspection:	02/02/2021
Risk rating reference:	21/00001/FOOD
Premises reference:	20/00431/FD_HS
Type of premises:	Convenience Store
Areas inspected:	All
Records examined:	None
Details of samples procured:	None
Summary of action taken:	Informal
General description of business:	Convenience store

Relevant Legislation

Food Safety Act 1990 (as amended)
Regulation (EC) No 178/2002 applied by The General Food Regulations 2004 (as amended)
Regulation (EC) No 852/2004 and No 853/2004 applied by Regulation 19 (1) of the Food Safety and Hygiene (England) Regulations 2013
Health and Safety at Work etc. Act 1974 and related regulations
Food Information Regulations 2014

What you must do to comply with the law

The report may include **Contraventions** - matters which do not comply with the law . You must address all of the contraventions identified; failure to do so could result in legal action being taken against you.

As a guide, contraventions relating to cleaning, temperature control and poor practice, should be dealt with straight away.

Contraventions relating to structural repairs, your food safety management system and staff training, should be completed within the next 2 months.

Health and safety contraventions should be dealt with within 3 months unless otherwise stated.

To assist you the report may also include **Observations** of current practice, useful **Information, Recommendations** of good practice and reminders of **Legal Requirements** .

My inspection was not intended to identify every contravention of the law and only covers those areas, practices and procedures examined at the time of the inspection. If the report fails to mention a particular matter this does not mean you have necessarily complied with the law.

FOOD SAFETY

How we calculate your Food Hygiene Rating:

The food safety section has been divided into the three areas which you are scored against for the hygiene rating: 1. food hygiene and safety procedures, 2. structural requirements and 3. confidence in management/control procedures. Each section begins with a summary of what was observed and the score you have been given. Details of how these scores combine to produce your overall food hygiene rating are shown in the table.

Compliance Area	You Score					
Food Hygiene and Safety	0	5	10	15	20	25
Structure and Cleaning	0	5	10	15	20	25
Confidence in management & control systems	0	5	10	15	20	30

Your Total score	0 - 15	20	25 - 30	35 - 40	45 - 50	> 50
Your Worst score	5	10	10	15	20	-

Your Rating is	5	4	3	2	1	0
----------------	---	---	---	---	---	---

Your Food Hygiene Rating is 3 - a generally satisfactory standard

1. Food Hygiene and Safety

Food hygiene standards are generally satisfactory and maintained. There is evidence of some non-compliance with legal requirements. Some lapses are evident however generally you have satisfactory food handling practices and procedures and adequate control measures to prevent cross-contamination are in place. The contraventions require your attention; although not critical to food safety they may become so if not addressed.
(Score 10)

Contamination risks

Contravention The following exposed ready-to-eat food and or its packaging to the risk of cross-contamination with foodborne bacteria from raw meat or unwashed fruits and vegetables:

- raw meat was being stored next to and above ready-to-eat foods in the walk-in chiller

Contravention The following exposed food to the general risk of cross-contamination with bacteria or allergens or its physical contamination with dirt or foreign objects:

- 2 x containers of olives were being stored on the floor

Hand-washing

Contravention The following indicated that hand-washing was not suitably managed:

- there was no hot water to the dedicated wash hand basin
- there was no soap available to the dedicated wash hand basin

Observation However I was pleased to see on a return visit the following day the hot water was available. Hot water must be available at all times

Legal requirement Washbasins must be available, suitably located and designated for cleaning hands. Wash-hand basins must be provided with hot and cold (or mixed) running water. Soap and hand drying facilities must be located nearby.

Personal Hygiene

Contravention The following are examples of poor personal hygiene or where it was made difficult for food handlers to maintain sufficiently high standards of personal cleanliness:

Legal requirement Regular hand washing is important for personal cleanliness. Remind all food handlers of the need to wash their hands before starting or returning to work, and specifically:

- After using the toilet;
- After handling rubbish;
- After smoking;
- After taking a break;
- After handling raw food

Temperature Control

Contravention The following evidence indicated there was a risk of bacteria growing on food:

- 2 x open containers of olives were being stored at ambient temperatures, once opened these should be stored in the fridge and used within 2 weeks

2. Structure and Cleaning

The structure facilities and standard of cleaning and maintenance are of a generally satisfactory standard but there are some repairs and/or improvements which are required in order for you to comply with the law. Pest control and waste disposal provisions are adequate. The contraventions require your attention; although not critical to food safety they may become so if not addressed. **(Score 10)**

Cleaning of Structure

Contravention The following items were dirty and require more frequent and thorough cleaning:

- walls to the walk-in chiller
- walls to the butchery section
- flooring in the butchery section

Recommendation Housekeeping could be greatly improved. Remove redundant items i.e glass door freezer and equipment from food rooms, tidy away miscellaneous objects into drawers and boxes and keep work surfaces and the floor clear for ease of cleaning and disinfection.

Cleaning of Equipment and Food Contact Surfaces

Contravention The following items are dirty and must be cleaned:

- blade to band saw
- door to the walk-in chiller

Cleaning Chemicals / Materials / Equipment and Methods

Contravention The following evidence demonstrated your cleaning materials, equipment and methods were not sufficient to control the spread of harmful bacteria between surfaces:

- scourer was very worn and needs replacing
- your sanitiser did not conform to British standards

Information Proper cleaning and disinfection is essential in preventing the spread of E.coli 0157 and other harmful bacteria onto food and food contact surfaces.

Guidance Taps can be a source of contamination so use a paper towel to turn off the tap after washing and drying your hands.

Information Ensure you use a surface sanitiser that conforms to BS EN 1276:1997 or BS EN 13697:2001. This information should be available on the label or by contacting the manufacturer.

Maintenance

Contravention The following had not been suitably maintained and must be repaired or replaced:

- holes were seen to shop flooring
- holes to interior lid to chest freezer
- bare wood was seen to the shelving to the stainless steel table in the butchery section

Legal requirement You need to seal/paint the wood to leave a smooth impervious surface that can be easily cleaned

Pest Control

Observation I was pleased to see that the premises was proofed against the entry of pests and that pest control procedures were in place.

3. Confidence in Management

There are generally satisfactory food safety controls in place although there is evidence of some non-compliance with the law. The contraventions require your attention; although not critical to food safety they may become so if not addressed. **(Score 10)**

Type of Food Safety Management System Required

Contravention Your documented Food Safety Management System or Safer Food Better Business pack was not available for inspection. As a consequence you could not demonstrate an effective system for managing food safety hazards.:

Legal Requirement Food business operators must put in place, implement and maintain a permanent procedure or procedures based on HACCP principles:

- Identify hazards to food.
- Identify the critical limits (what is acceptable and unacceptable).
- Monitor critical control points to ensure critical limits are met.
- Keep appropriate records to demonstrate control measures are effective.

Legal Requirement Ensure that your food safety management system is available on site so your staff can refer to your procedures and so that daily records of checks can be completed.

Information You can download a Safer Food Better Business pack (for retailers) and refill diary pages from the FSA website:
www.food.gov.uk/business-industry/caterers/sfbb

Information The absence of any documentation has resulted in a poor score for confidence in management and this, in turn, has had an adverse effect on your Food Hygiene Rating.

Information As you are a new business you have been given the benefit of the doubt despite your food safety management system not fully complying with the law. You must act on this now as your hygiene rating score will be reduced to a maximum of 1 if there is a similar situational at the next visit.

Recommendation Choose Safer Food Better Business (for retailers) as your food safety management system. It is simple to implement and requires a minimum amount of record keeping.

Recommendation You can buy a printed copy of Safer Food Better Business (for retailers) or a diary refill pack via our website www.norwich.gov.uk/sfbb

Food Hazard Identification and Control

Contravention The following pre-requisites have not been met and this means that your food safety management system will be ineffective:

- services and facilities are inadequate
- No hot water

Traceability

Observation Your records were such that food could easily be traced back to its supplier.

Waste Food and other Refuse

Observation You had measures in place to dispose of waste food appropriately and were employing the services of an approved waste contractor.

Training

Contravention The following evidence indicates there is a staff training need as food handlers:

- were not washing their hands often enough

- did not know how long to stay off work after illness.

Recommendation A Level 2 Award in Food Safety in Catering or its equivalent (a 6-hour course leading to the award of a recognised certificate in food hygiene) would be appropriate for your food handlers. Booking details for the equivalent CIEH course are on our website: www.norwich.gov.uk

Recommendation Catering staff should refresh their food hygiene knowledge every 3 years so that they stay up to date with current legislation and good practice. Booking details for this course are on our website: www.norwich.gov.uk

Infection Control / Sickness / Exclusion Policy

Guidance Public Health England recommends that food handlers known or suspected to be suffering from a food-borne infection or gastrointestinal illness stay away from work until symptom-free for 48 hours.

Allergens

Observation You had identified the presence of allergens in your non-prepacked food and had brought this to the attention of your customers.

HEALTH, SAFETY AND WELFARE

Matters of evident concern

Contravention The following matters were of immediate concern:

- no guard to the band saw blade
- no release button to the interior door of the walk-in chiller
