

Public Protection (food & safety)

Food Premises Inspection Report

Name of business:	Brownies & Coffee
Address of food business:	2 Guildhall Hill Norwich NR2 1JH
Date of inspection:	01/11/2021
Risk rating reference:	21/00306/FOOD
Premises reference:	20/00400/FD_HS
Type of premises:	Restaurant or cafe
Areas inspected:	Servery, Basement, Main Kitchen
Records examined:	Temperature Control Records, Cleaning Schedule, Training Certificates/records
Details of samples procured:	None
Summary of action taken:	Informal
General description of business:	Coffee shop

Relevant Legislation

Food Safety Act 1990 (as amended)

Regulation (EC) No 178/2002 applied by The General Food Regulations 2004 (as amended)

Regulation (EC) No 852/2004 and No 853/2004 applied by Regulation 19 (1) of the Food Safety and Hygiene (England) Regulations 2013

Health and Safety at Work etc. Act 1974 and related regulations

Food Information Regulations 2014

What you must do to comply with the law

The report may include **Contraventions** - matters which do not comply with the law . You must address all of the contraventions identified; failure to do so could result in legal action being taken against you.

As a guide, contraventions relating to cleaning, temperature control and poor practice, should be dealt with straight away.

Contraventions relating to structural repairs, your food safety management system and staff training, should be completed within the next 2 months.

Health and safety contraventions should be dealt with within 3 months unless otherwise stated.

To assist you the report may also include **Observations** of current practice, useful **Information, Recommendations** of good practice and reminders of **Legal Requirements** .

My inspection was not intended to identify every contravention of the law and only covers those areas, practices and procedures examined at the time of the inspection. If the report fails to mention a particular matter this does not mean you have necessarily complied with the law.

FOOD SAFETY

How we calculate your Food Hygiene Rating:

The food safety section has been divided into the three areas which you are scored against for the hygiene rating: 1. food hygiene and safety procedures, 2. structural requirements and 3. confidence in management/control procedures. Each section begins with a summary of what was observed and the score you have been given. Details of how these scores combine to produce your overall food hygiene rating are shown in the table.

Compliance Area	You Score					
Food Hygiene and Safety	0	5	10	15	20	25
Structure and Cleaning	0	5	10	15	20	25
Confidence in management & control systems	0	5	10	15	20	30

Your Total score	0 - 15	20	25 - 30	35 - 40	45 - 50	> 50
Your Worst score	5	10	10	15	20	-

Your Rating is	5	4	3	2	1	0
-----------------------	---	---	---	----------	---	---

Your Food Hygiene Rating is 2 - improvement is necessary

1. Food Hygiene and Safety

Food hygiene standards are high. You demonstrated a very good standard of compliance with legal requirements. You have safe food handling practices and procedures and all the necessary control measures to prevent cross-contamination are in place. Some minor contraventions require your attention. **(Score 5)**

Contamination risks

Contravention The following exposed food to the general risk of cross-contamination with bacteria or allergens or its physical contamination with dirt, foreign objects or chemicals:

- dough hook hanging on cupboard unit door
- miscellaneous clutter due to poor housekeeping

Hand-washing

Contravention The following indicated that hand-washing was not suitably managed::

- the drainage to the wash hand basin was inadequate
- no towel to towel dispenser

Personal Hygiene

Contravention The following are examples of poor personal hygiene or where it was made difficult for food handlers to maintain sufficiently high standards of personal cleanliness:

- staff were not using the wash-hand basin regularly
- staff were not wearing suitable protective clothing

Legal Requirement All persons in food handling areas must wear suitable, clean, and where appropriate protective clothing.

Legal Requirement Regular hand washing is important for personal cleanliness. Remind all food handlers of the need to wash their hands before starting or returning to work, and specifically:

- * After using the toilet;
- * After handling rubbish;
- * After smoking;
- * After taking a break;
- * After handling raw food

Temperature Control

Observation I was pleased to see you were able to limit bacterial growth and/or survival by applying appropriate temperature controls at points critical to food safety and that you were monitoring temperatures.

2. Structure and Cleaning

The structure facilities and standard of cleaning and maintenance are less than satisfactory and you are failing to comply with the law in many respects. Contraventions require your immediate attention as some are critical to food safety. We may revisit your business and if standards have not improved take formal enforcement action. **(Score 15)**

Cleaning of Structure

Contravention The following items were dirty and require more frequent and thorough cleaning

- floor/wall junctions
- behind and under equipment
- high level cleaning
- hand contact surfaces such as light switches and door handles
- mastic joints behind sinks

- cobwebs seen to high areas and sink unit
- wall paper to walls was peeling
- damp to walls in downstairs kitchen
- walls
- area behind work surfaces

Contravention The following structural items could not be effectively cleaned and must be covered or made non-absorbent:

- untreated mdf or wooden shelving
- uncovered light fitting
- holes in wall

Recommendation Housekeeping could be greatly improved. Remove redundant items and equipment from food rooms, tidy away miscellaneous objects into drawers and boxes and keep work surfaces and the floor clear for ease of cleaning and disinfection.

Cleaning of Equipment and Food Contact Surfaces

Contravention The following items are dirty and must be cleaned::

- fridge and freezer seals
- weighing scales
- interior to oven
- interior to top of chest freezer
- grill to side of chest freezer
- interior to fridge
- dirty water to mop bucket
- woodwork behind servery

Recommendation I recommend that items such as mops, buckets and rooms are stored in an area, room or cupboard separate from a food preparation or storage area so that the risk of food contamination is minimised

Maintenance

Contravention The following had not been suitably maintained and must be repaired or replaced:

- rotten woodwork
- loose taps to wash hand basin behind servery
- loose wooden panel behind servery

Facilities and Structural provision

Contravention The following facilities were inadequate and must be improved:

- the ventilation was inadequate in the downstairs kitchen
- the drainage is deficient

Legal Requirement All food preparation and storage areas must have adequate ventilation either by natural or mechanical means. This is to reduce high humidity, room temperature, cooking odours and airborne particles.

3. Confidence in Management

There are generally satisfactory food safety controls in place although there is evidence of some non-compliance with the law. The contraventions require your attention; although not critical to food safety they may become so if not addressed. **(Score 10)**

Type of Food Safety Management System Required

Contravention You are a low risk business and do not have a food safety management system or what you have in place is not suitable given the food risks associated with your business. You still require a minimum amount of documentation. This might include your hygiene rules, pest control reports, a staff illness and exclusion policy, a cleaning schedule, date coding, temperature checks of display chillers, and handover diary etc.:

Observation You had colour-coded equipment and effective separation between raw and ready-to-eat food at all stages in your operation.

Observation You were monitoring (and recording) the temperatures of your fridges and freezers as well as the temperature of cooked/hot-held food and could demonstrate effective systems for controlling bacterial growth and survival.

Food Hazard Identification and Control

Contravention The following pre-requisites have not been met and this means that your food safety management system will be ineffective::

- cleaning and sanitation are poor

Information Before implementing a food safety management system such as Safer Food Better Business, basic good hygiene conditions and practices called prerequisites must be in place. Only then will your food safety management system be effective in ensuring the preparation of safe food.

Proving Your Arrangements are Working Well

Contravention You are not working to your cleaning schedule

- personal hygiene / handwashing
- cleaning / clear and clean as you go

Traceability

Observation Your records were such that food could easily be traced back to its supplier.

Waste Food and other Refuse

Observation You had measures in place to dispose of waste food appropriately and were employing the services of an approved waste contractor.

Training

Observation I was pleased to see that food handlers had been trained to an appropriate level and evidence of their training was made available.

Infection Control / Sickness / Exclusion Policy

Guidance Public Health England recommends that food handlers known or suspected to be suffering from a food-borne infection or gastrointestinal illness stay away from work until symptom-free for 48 hours.

Allergens

Observation You had identified the presence of allergens in your non-prepacked food and had brought this to the attention of your customers.
