

Public Protection (food & safety)

Food Premises Inspection Report

Name of business:	The Bengal Spice
Address of food business:	38 - 40 St Benedicts Street Norwich NR2 4AQ
Date of inspection:	14/12/2021
Risk rating reference:	21/00416/FOOD
Premises reference:	16/00174/FD_HS
Type of premises:	Restaurant or cafe
Areas inspected:	Main Kitchen, Servery
Records examined:	SFBB
Details of samples procured:	None
Summary of action taken:	Informal
General description of business:	Indian Restaurant/takeaway

Relevant Legislation

Food Safety Act 1990 (as amended)

Regulation (EC) No 178/2002 applied by The General Food Regulations 2004 (as amended)

Regulation (EC) No 852/2004 and No 853/2004 applied by Regulation 19 (1) of the Food Safety and Hygiene (England) Regulations 2013

Health and Safety at Work etc. Act 1974 and related regulations

Food Information Regulations 2014

What you must do to comply with the law

The report may include **Contraventions** - matters which do not comply with the law . You must address all of the contraventions identified; failure to do so could result in legal action being taken against you.

As a guide, contraventions relating to cleaning, temperature control and poor practice, should be dealt with straight away.

Contraventions relating to structural repairs, your food safety management system and staff training, should be completed within the next 2 months.

Health and safety contraventions should be dealt with within 3 months unless otherwise stated.

To assist you the report may also include **Observations** of current practice, useful **Information, Recommendations** of good practice and reminders of **Legal Requirements** .

My inspection was not intended to identify every contravention of the law and only covers those areas, practices and procedures examined at the time of the inspection. If the report fails to mention a particular matter this does not mean you have necessarily complied with the law.

FOOD SAFETY

How we calculate your Food Hygiene Rating:

The food safety section has been divided into the three areas which you are scored against for the hygiene rating: 1. food hygiene and safety procedures, 2. structural requirements and 3. confidence in management/control procedures. Each section begins with a summary of what was observed and the score you have been given. Details of how these scores combine to produce your overall food hygiene rating are shown in the table.

Compliance Area	You Score					
Food Hygiene and Safety	0	5	10	15	20	25
Structure and Cleaning	0	5	10	15	20	25
Confidence in management & control systems	0	5	10	15	20	30
Your Total score	0 - 15	20	25 - 30	35 - 40	45 - 50	> 50
Your Worst score	5	10	10	15	20	-
Your Rating is	5	4	3	2	1	0

Your Food Hygiene Rating is 2 - improvement is necessary

1. Food Hygiene and Safety

Food hygiene standards are generally satisfactory and maintained. There is evidence of some non-compliance with legal requirements. Some lapses are evident however generally you have satisfactory food handling practices and procedures and adequate control measures to prevent cross-contamination are in place. The contraventions require your attention; although not critical to food safety they may become so if not addressed.
(Score 10)

Contamination risks

Contravention The following exposed ready-to-eat food and or its packaging to the risk of cross-contamination with foodborne bacteria from raw meat or unwashed fruits and vegetables:

- raw foods were being stored above ready-to-eat foods in the fridge
- prepared foods i.e onions were being stored on the floor
- using the same storage containers for raw and ready-to-eat foods

Legal requirement At all stages of production, processing and distribution, food must be protected from any contamination likely to render it unfit for human consumption,

injurious to health or contaminated in such a way that it would be unreasonable to expect it to be consumed in that state.

Contravention You could not demonstrate effective disinfection of equipment and utensils used for both raw and ready-to-eat foods, either by heat or an adequate dishwasher cycle. Separate equipment and utensils must be provided. Such equipment should be easily identifiable (e.g. colour coded) and must be stored and washed separately.

Information The FSA has issued guidance on controlling *E.coli* 0157 through:

- the complete separation of raw and ready-to-eat food
- the correct use of wash-hand basins and thorough handwashing
- having dedicated equipment (including complex equipment) for raw and ready-to-eat foods
- thorough 2-stage cleaning and the correct use of sanitisers
- and by controlling the risks posed by soil contaminated vegetables.

Visit: www.food.gov.uk for more information

Guidance If equipment and utensils (for example chopping boards, containers and tongs) are to be used for raw and RTE foods, they should be disinfected by heat or an adequate dishwasher cycle (able to reach 82°C for 15 seconds) between uses.

Guidance If adequate heat disinfection (such as a dishwasher or plunge sink) is not possible, separate equipment and utensils should be used for handling raw and RTE foods. Such equipment should be easily identifiable (colour coded) and must be stored and washed separately.

Hand-washing

Contravention The following evidence indicated hand-washing was not suitably managed:

- there was no means to hygienically dry hands

Legal requirement Washbasins must be available, suitably located and designated for cleaning hands. Wash-hand basins must be provided with hot and cold (or mixed) running water. Soap and hand drying facilities must be located nearby.

Temperature Control

Observation I was pleased to see you were able to limit bacterial growth and/or survival by applying appropriate temperature controls at points critical to food safety and that you were monitoring temperatures.

Poor Practices

Contravention The following matters represented poor practice and if allowed to continue may cause food to become contaminated or lead to its deterioration:

- no date labels on prepared foods or when to use by making stock rotation poor

Recommendation You should have a system to identify when open or prepared foods need to be used by or discarded, to ensure the food is fit for consumption. I recommend you apply labels which give a day or date that is 2 days after the day of production e.g. if food is opened on Monday it should be used by the end of Wednesday

2. Structure and Cleaning

The structure facilities and standard of cleaning and maintenance are less than satisfactory and you are failing to comply with the law in many respects. Contraventions require your immediate attention as some are critical to food safety. We may revisit your business and if standards have not improved take formal enforcement action. **(Score 15)**

Cleaning of Structure

Contravention The following items were dirty and require more frequent and thorough cleaning:

- floor/wall junctions
- around equipment feet
- behind and under equipment
- walls particularly behind food preparation surfaces
- hand contact surfaces such as light switches and door handles
- pipework to sinks
- door/door surround

Cleaning of Equipment and Food Contact Surfaces

Contravention The following items are dirty and must be cleaned::

- fridge and freezer seals
- fridge shelving
- microwave
- food storage containers
- container storing poppadums
- side of door to upright fridge to fridge/freezer
- doors to fridge/freezer
- legs/feet and wheels to equipment
- underneath towel dispenser
- underneath soap dispenser

- interior to hot cupboard

Cleaning Chemicals / Materials / Equipment and Methods

Contravention The following evidence demonstrated your cleaning materials, equipment and methods were not sufficient to control the spread of harmful bacteria between surfaces:

- scourers were worn and dirty

Information Cardboard cannot be properly cleaned. Do not use it to cover the floor/ shelves of work surfaces in food rooms

Pest Control

Observation I was pleased to see that the premises was proofed against the entry of pests and that pest control procedures were in place.

3. Confidence in Management

There are generally satisfactory food safety controls in place although there is evidence of some non-compliance with the law. The contraventions require your attention; although not critical to food safety they may become so if not addressed. **(Score 10)**

Food Hazard Identification and Control

Contravention The following pre-requisites have not been met and this means that your food safety management system will be ineffective:

- cleaning and sanitation are poor
- staff training is inadequate

Contravention You have not identified these food hazards or the methods of control at critical points in your operation:

- cross-contamination using the same storage containers used for raw and ready-to-eat foods
- storing raw food next to and above ready-to-eat foods

Contravention The following Safer Food Better Business SAFE METHODS are incomplete:

- cooking
- cleaning schedule

Proving Your Arrangements are Working Well

Contravention You are not working to the following safe methods in your SFBB pack:

- cross contamination/ physical or chemical contamination
- cleaning

Contravention The Management sections in your Safer food Better Business (SFBB) pack are intended to demonstrate you are in day-to-day control of the hazards to food. The following Management sections were either missing, incomplete or not up-to-date:

- daily diary entries not up to date
- four-weekly reviews
- staff training
- contacts list

Infection Control / Sickness / Exclusion Policy

Guidance Public Health England recommends that food handlers known or suspected to be suffering from a food-borne infection or gastro-intestinal illness stay away from work until symptom-free for 48 hours.

Training

Contravention The following evidence indicated there was a staff training need:

- food handlers were not sufficiently knowledgeable about your food safety procedures
- food handlers were not sufficiently knowledgeable about food hygiene
- standard of cleaning was poor
- using poor food storage practices

Legal requirement Food business operators must ensure that food handlers are supervised and instructed and/or trained in food hygiene matters to an appropriate level for the work they do

Information You can obtain a list of the training courses we provide on our website: www.norwich.gov.uk.

Recommendation A Level 3 Award for Supervising Food Safety in Catering would be appropriate for your supervisory staff and those with managerial responsibility.

Recommendation Catering staff should refresh their food hygiene knowledge every 3 years so that they stay up to date with current legislation and good practice. Booking details for this course are on our website: www.norwich.gov.uk
