

Public Protection (food & safety)

Food Premises Inspection Report

Name of business:	Simply The Best
Address of food business:	9 Bowthorpe Main Centre Wendene Norwich NR5
	9HA
Date of inspection:	21/12/2021
Risk rating reference:	21/00430/FOOD
Premises reference:	21/00358/FD_HS
Type of premises:	Food take away premises
Areas inspected:	Servery, Main Kitchen
Records examined:	Training Certificates/records, Temperature Control
	Records, SFBB
Details of samples procured:	None
Summary of action taken:	Informal
General description of business:	Pizza/kebab takeaway

Relevant Legislation

Food Safety Act 1990 (as amended) Regulation (EC) No 178/2002 applied by The General Food Regulations 2004 (as amended) Regulation (EC) No 852/2004 and No 853/2004 applied by Regulation 19 (1) of the Food Safety and Hygiene (England) Regulations 2013 Health and Safety at Work etc. Act 1974 and related regulations Food Information Regulations 2014

What you must do to comply with the law

The report may include **Contraventions** - matters which do not comply with the law . You must address all of the contraventions identified; failure to do so could result in legal action being taken against you.

As a guide, contraventions relating to cleaning, temperature control and poor practice, should be dealt with <u>straight away</u>.

Contraventions relating to structural repairs, your food safety management system and staff training, should be completed within the next <u>2 months</u>.

Health and safety contraventions should be dealt with within <u>3 months</u> unless otherwise stated.

To assist you the report may also include **Observations** of current practice, useful **Information**, **Recommendations** of good practice and reminders of **Legal Requirements**.

My inspection was not intended to identify every contravention of the law and only covers those areas, practices and procedures examined at the time of the inspection. If the report fails to mention a particular matter this does not mean you have necessarily complied with the law.

FOOD SAFETY

How we calculate your Food Hygiene Rating:

The food safety section has been divided into the three areas which you are scored against for the hygiene rating: 1. food hygiene and safety procedures, 2. structural requirements and 3. confidence in management/control procedures. Each section begins with a summary of what was observed and the score you have been given. Details of how these scores combine to produce your overall food hygiene rating are shown in the table.

Compliance Area				You Score					
Food Hygiene and Safety				0	5	10	15	20	25
Structure and Cleaning				0	5	10	15	20	25
Confidence in management & control systems				0	5	10	15	20	30
Your Total score	0 - 15	20	25	25 - 30		35 - 40			> 50
							45 - 50		> 50
Your Worst score	5	10		10	15		20		-
Your Rating is	5	4		3		2	1		0

Your Food Hygiene Rating is 3 - a generally satisfactory standard

1. Food Hygiene and Safety

Food hygiene standards are generally satisfactory and maintained. There is evidence of some non-compliance with legal requirements. Some lapses are evident however generally you have satisfactory food handling practices and procedures and adequate control measures to prevent cross-contamination are in place. The contraventions require your attention; although not critical to food safety they may become so if not addressed. **(Score 10)**

0 1 2 3 4 5

Contamination risks

Contravention The following exposed ready-to-eat food and or its packaging to the risk of cross-contamination with foodborne bacteria from raw meat or unwashed fruits and vegetables:

- same containers were being used for raw foods i.e chicken and ready-to-eat foods i.e garlic mayonnaise
- cutting boards were badly scoured and need replacing

Legal requirement At all stages of production, processing and distribution, food must be protected from any contamination likely to render it unfit for human consumption,

injurious to health or contaminated in such a way that it would be unreasonable to expect it to be consumed in that state.

Information The FSA has issued guidance on controlling *E.coli* 0157 through:

- the complete separation of raw and ready-to-eat food
- the correct use of wash-hand basins and thorough handwashing
- having dedicated equipment (including complex equipment) for raw and ready-to-eat foods
- thorough 2-stage cleaning and the correct use of sanitisers
- and by controlling the risks posed by soil contaminated vegetables.
 Visit: www.food.gov.uk for more information

Guidance If equipment and utensils (for example chopping boards, containers and tongs) are to be used for raw and RTE foods, they should be disinfected by heat or an adequate dishwasher cycle (able to reach 82°C for 15 seconds) between uses.

Guidance If adequate heat disinfection (such as a dishwasher or plunge sink) is not possible, separate equipment and utensils should be used for handling raw and RTE foods. Such equipment should be easily identifiable (colour coded) and must be stored and washed separately.

Hand-washing

Contravention The following indicated that hand-washing was not suitably managed::

• no towel to towel dispenser

Legal requirement Washbasins must be available, suitably located and designated for cleaning hands. Wash-hand basins must be provided with hot and cold (or mixed) running water. Soap and hand drying facilities must be located nearby.

Personal Hygiene

Observation I was pleased to see that standards of personal hygiene were high.

Temperature Control

Contravention The following evidence indicated there was a risk of bacteria growing on food:

 high risk food i.e doner kebab meat was being stored at 18.4°C in the bain marie, You informed me that this had been there since the previous evening

Legal requirement Food which has been cooked or reheated and is intended to be kept hot until it is sold, must either be held at or above 63°C or it can be kept for service or on display for sale for a single period of less than 2 hours; at the end of the 2 hour

period the food should be cooled as quickly as possible and kept at or below 8°C or discarded.

Poor Practices

Contravention The following matters represented poor practice and if allowed to continue may cause food to become contaminated or lead to its deterioration:

- storing chips on floor in walk-in freezer
- storing food in cardboard boxes in the stainless steel double door fridge

Information Cardboard cannot be properly cleaned so do not use as food storage containers. Use clean lidded plastic containers.

2. Structure and Cleaning

The structure facilities and standard of cleaning and maintenance are of a generally satisfactory standard but there are some repairs and/or improvements which are required in order for you to comply with the law. Pest control and waste disposal provisions are adequate. The contraventions require your attention; although not critical to food safety they may become so if not addressed. **(Score 10)**

Cleaning of Structure

Contravention The following items were dirty and require more frequent and thorough cleaning:

- floor/wall junctions
- around equipment feet
- behind and under equipment
- pipework

Cleaning of Equipment and Food Contact Surfaces

Contravention The following items are dirty and must be cleaned:

- fridge and freezer seals
- can opener
- food storage containers
- red storage container under stainless steel workbench
- small chest freezer needs defrosting
- grease trays to griddle and kebab grill

Contravention The following structural items could not be effectively cleaned and must be covered or made non-absorbent:

• untreated mdf or wooden shelving/structure

Cleaning Chemicals / Materials / Equipment and Methods

Contravention The following evidence demonstrated your cleaning materials, equipment and methods were not sufficient to control the spread of harmful bacteria between surfaces:

- contact time of 60 seconds for the sanitiser not known
- scourer was worn and dirty

Maintenance

Contravention The following had not been suitably maintained and must be repaired or replaced:

• split seals to double door stainless steel fridge

Facilities and Structural provision

Observation I was pleased to see that adequate facilities had been provided.

Pest Control

Observation I was pleased to see that the premises was proofed against the entry of pests and that pest control procedures were in place.

3. Confidence in Management

There are generally satisfactory food safety controls in place although there is evidence of some non-compliance with the law. The contraventions require your attention; although not critical to food safety they may become so if not addressed. **(Score 10)**

Your Food Safety Management System

Observation You were monitoring (and recording) the temperatures of your fridges and freezers

Food Hazard Identification and Control

Contravention You have not identified these food hazards or the methods of control at critical points in your operation:

- cross-contamination
- bacterial growth

Contravention The following Safer Food Better Business SAFE METHODS are incomplete:

- Cross-contamination
- Cleaning

- Chilling
- Cooking

Information You need to complete all the relevant sections of the pack. If sections are not relevant, you need to write n/a (not applicable) to show you have read and understood if the safe methods are relevant to your business activity

Information Before implementing a food safety management system such as Safer Food Better Business, basic good hygiene conditions and practices called prerequisites must be in place. Only then will your food saferty management system be effective in ensuring the preparation of safe food.

Proving Your Arrangements are Working Well

Contravention You are not working to the following safe methods in your SFBB pack:

- cross contamination/ physical or chemical contamination
- food allergies
- 4-weekly checks
- training records /supplier lists
- cleaning schedule

Traceability

Observation Your records were such that food could easily be traced back to its supplier.

Waste Food and other Refuse

Observation You had measures in place to dispose of waste food appropriately and were employing the services of an approved waste contractor.

Training

Observation I was pleased to see that food handlers had been trained to an appropriate level and evidence of their training was made available.

Infection Control / Sickness / Exclusion Policy

Guidance Public Health England recommends that food handlers known or suspected to be suffering from a food-borne infection or gastro-intestinal illness stay away from work until symptom-free for 48 hours.

<u>Allergens</u>

Contravention You are failing to manage allergens properly:

• You have not identified the allergens present in the food you prepare

Legal Requirement Caterers must provide allergy information on all unpackaged food they sell. Catering businesses include restaurants, takeaways, deli counters, bakeries and sandwich bars etc. The potential for cross-contamination by allergens must also be made known to consumers. In addition food manufacturers must now label allergy causing ingredients on their pre-packed foods. You can obtain more information from the Trading Standards website www.norfolk.gov.uk/abc

Information The Food Standards Agency has produced a chart that you may find useful www.food.gov.uk/sites/default/files/media/document/allergen-chart.pdf

Information Allergen information could be written down on a chalk board or chart, or provided orally by a member of staff. Where the specific allergen information is not provided upfront, clear signposting to where this information could be obtained must be provided.

Information The 14 allergens are:

- cereals containing gluten
- crustaceans, for example prawns, crabs, lobster and crayfish
- eggs
- fish
- peanuts
- soybeans
- milk
- nuts, such as almonds, hazelnuts, walnuts, pecan nuts, Brazil nuts, pistachio, cashew and macadamia (Queensland) nuts
- celery (and celeriac)
- mustard
- sesame
- sulphur dioxide, which is a preservative found in some dried fruit
- lupin
- molluscs, for example clams, mussels, whelks, oysters, snails and squid

Information The Food Information Regulations require that you know what allergens are in the food you provide. You can no longer claim you don?t know what allergens are present. Neither can you simply state that all the foods you serve might contain an allergen:

- Be sure you know exactly what your allergens are
- Convey this information to your customers accurately and consistently

Recommendation Make a chart listing all your meals together with the 14 allergens (if present). Bring the chart to the attention of your customers and your staff.
