

# Public Protection (food & safety)

# Food Premises Inspection Report

Name of business:	Tofurei
Address of food business:	10 St Gregorys Alley Norwich NR2 1ER
Date of inspection:	26/01/2022
Risk rating reference:	22/00030/FOOD
Premises reference:	20/00168/FD_HS
Type of premises:	Restaurant or cafe
Areas inspected:	All
Records examined:	SFBB, temperature records
Details of samples procured:	None
Summary of action taken:	Informal
General description of	Vegan cafe and retailer
business:	-

# **Relevant Legislation**

Food Safety Act 1990 (as amended) Regulation (EC) No 178/2002 applied by The General Food Regulations 2004 (as amended) Regulation (EC) No 852/2004 and No 853/2004 applied by Regulation 19 (1) of the Food Safety and Hygiene (England) Regulations 2013 Health and Safety at Work etc. Act 1974 and related regulations Food Information Regulations 2014

# What you must do to comply with the law

The report may include **Contraventions** - matters which do not comply with the law . You must address all of the contraventions identified; failure to do so could result in legal action being taken against you.

As a guide, contraventions relating to cleaning, temperature control and poor practice, should be dealt with <u>straight away</u>.

Contraventions relating to structural repairs, your food safety management system and staff training, should be completed within the next <u>2 months</u>.

Health and safety contraventions should be dealt with within <u>3 months</u> unless otherwise stated.

To assist you the report may also include **Observations** of current practice, useful **Information**, **Recommendations** of good practice and reminders of **Legal Requirements**.

My inspection was not intended to identify every contravention of the law and only covers those areas, practices and procedures examined at the time of the inspection. If the report fails to mention a particular matter this does not mean you have necessarily complied with the law.

# FOOD SAFETY

# How we calculate your Food Hygiene Rating:

The food safety section has been divided into the three areas which you are scored against for the hygiene rating: 1. food hygiene and safety procedures, 2. structural requirements and 3. confidence in management/control procedures. Each section begins with a summary of what was observed and the score you have been given. Details of how these scores combine to produce your overall food hygiene rating are shown in the table.

Compliance Area				You Score					
Food Hygiene and Safety				0	5	10	15	20	25
Structure and Cleaning				0	5	10	15	20	25
Confidence in management & control systems			0	5	10	15	20	30	
Your Total score	0 15	20	05 00		35 - 40		45 - 50		. 50
Four Total score	0 - 15	20	25 - 30		35 - 40		45 - 50		> 50
Your Worst score	5	10	10		15		20		-
Your Rating is	5	4		3			1		0
	5	4		5	2				0

Your Food Hygiene Rating is 5 - a very good standard

# 1. Food Hygiene and Safety

Food hygiene standards are high. You demonstrated a very good standard of compliance with legal requirements. You have safe food handling practices and procedures and all the necessary control measures to prevent cross-contamination are in place. Some minor contraventions require your attention. (Score 5)

# Contamination risks

**Contravention** The following exposed food to the general risk of cross-contamination with bacteria or allergens or its physical contamination with dirt, foreign objects or chemicals::

• Staff food in fridge. Although labelled this may pose a contamination risk. Consider storing in a labelled container.

**Guidance** The FSA (visit www.food.gov.uk for more information) has issued guidance on controlling E.coli 0157 through:

\* the complete separation of raw and ready-to-eat food

\* the correct use of wash-hand basins and thorough handwashing

\* having dedicated equipment (including complex equipment) for raw and ready-to-eat foods

\* through 2-stage cleaning and the correct use of sanitisers

\* and by controlling the risks posed by soily vegetables.

The principle of this guidance is good to follow, even though your food is vegan.

**Observation** I was pleased to see you were able to demonstrate effective controls to prevent contamination.

# Hand-washing

**Observation** I was pleased to see hand washing was well managed.

# Personal Hygiene

**Observation** I was pleased to see that standards of personal hygiene were high.

# Temperature Control

**Contravention** The following evidence indicated there was a risk of bacteria growing on food:

- cold foods, for service, such as vegan sandwiches were being kept above 8 degrees Celsius for over 4 hours ie all day. Many vegan products may be high risk, and therefore subject to temperature control requirements. Unless you are able to demonstrate that they are not, you should store below 8 degrees Celcius, or follow the once only 4 hour exemption.
- in order to demonstrate adequate temperature monitoring increase fridge and freezer checks to twice daily.

**Legal Requirement** If you rely on selling COLD food (displayed over 8°CC) within four hours you must be able to demonstrate your system for ensuring food is either sold, placed under refrigeration, or discarded, before the four hours have elapsed.

**Recommendation** Infrared thermometers can be used as a simple and speedy way of checking the surface temperatures of hot and cold food. When using them you need to remember that they measure the surface temperature of the food or wrapping rather than the core temperature.

If any hot held items, that you have kept to above 63 degrees Celcius, are cooled and reheated, I recommend that these are reheated to order.

**Observation** I was pleased to see you were generally able to limit bacterial growth and/or survival by applying appropriate temperature controls at points critical to food safety and that you were monitoring temperatures.

#### Unfit food/poor practices

**Contravention** The following matters represented poor practice and if allowed to continue may cause food to become contaminated or lead to its deterioration:

• shelf life of perishable items at 5 days.

**Recommendation** You should have a system to identify when open or prepared foods need to be used by or discarded, to ensure the food is fit for consumption. I recommend you apply labels which give a date that is 2 days after the day of production e.g. if food is opened on Monday it should be used by the end of Wednesday (an exception is rice which should not be kept longer than 24 hours)

# 2. Structure and Cleaning

The structure facilities and standard of cleaning and maintenance are all excellent and you demonstrated full compliance with the law. There is evidence of effective pest control and procedures are in place to rectify any problems as they arise. There is good provision for waste disposal. (Score 0)

#### **Cleaning of Structure**

**Observation** The kitchens had been well maintained and the standard of cleaning was exceptionally high.

#### Cleaning of Equipment and Food Contact Surfaces

**Observation** You had dedicated equipment for the preparation of raw and ready-to-eat foods.

# Cleaning Chemicals / Materials / Equipment and Methods

**Information** You must ensure that the sanitisers you use are effective against bacteria. Ensure hat they meet the following standards BS EN 1276:1997 and 13697:2001. Your product was compliant.

**Observation** I was pleased to see that the premises was kept clean and that your cleaning materials, methods and equipment were able to minimise the spread of harmful bacteria between surfaces.

#### **Maintenance**

**Observation** I was pleased to see the kitchen had recently been refurbished.

#### Facilities and Structural provision

**Observation** I was pleased to see the premises had been well maintained and that adequate facilities had been provided.

# Pest Control

**Recommendation** Ensure staff are trained to recognise the signs of pests and that they undertake regular checks of the premises

Recommendation Provide an electric fly killer.

**Observation** I was pleased to see that the premises was proofed against the entry of pests and that pest control procedures were in place.

# 3. Confidence in Management

A food safety management system is in place and you demonstrate a very good standard of compliance with the law. You have a good track record. There are some minor contraventions which require your attention. **(Score 5)** 

# Type of Food Safety Management System Required

**Observation** Your SFBB/food safety management system was in place and generallyworking well. I was confident you generally had effective control over hazards to food. You are maintaining additional weekly checks.

#### Food Hazard Identification and Control

**Contravention** The control methods you have put in place at the following critical control points are not sufficient:

- bacteria growing on food
- 5 day shelf

#### **Traceability**

**Observation** Your records were such that food could easily be traced back to its supplier.

#### Waste Food and other Refuse

**Observation** You had measures in place to dispose of waste food appropriately and were employing the services of an approved waste contractor.

#### <u>Training</u>

**Recommendation** Catering staff should refresh their food hygiene knowledge every 3 years so that they stay up to date with current legislation and good practice. Booking details for this course are on our website: www.norwich.gov.uk

**Observation** I was pleased to see that food handlers had been trained to an appropriate level and evidence of their training was made available.

#### Infection Control / Sickness / Exclusion Policy

**Observation** Policies were in place to prevent any infected food handler from contaminating food.

#### Allergens

**Information** The Food Standards Agency has produced a chart that you may find useful www.food.gov.uk/sites/default/files/media/document/allergen-chart.pdf

**Information** There are Level 2 Awards in Food Allergen Awareness on offer in Dereham. If you are interested contact 0800 689 3512

**Information** Prepacked for direct sale (PPDS) food, is food that is packaged at the same place it is offered or sold to consumers, and is in this packaging before it is ordered or selected by your customers. The new PPDS allergen labelling will help protect consumers by providing potentially life-saving allergen information on the packaging.

**Observation** You had identified the presence of allergens in your non-prepacked food and had brought this to the attention of your customers. A sign highlights to customers to ask for information. Staff have been trained and allergens identified.
