

Public Protection (food & safety)

Food Premises Inspection Report

Name of business: Kings Kebabs

Address of food business: 121 Mile Cross Lane Norwich NR6 6RQ

Date of inspection: 04/04/2022
Risk rating reference: 22/00244/FOOD
Premises reference: 06/00122/FD HS

Type of premises: Food take away premises

Areas inspected: Main Kitchen

Records examined: SFBB
Details of samples procured: None
Summary of action taken: Informal

General description of business: Pizza/Kebab takeaway

Relevant Legislation

Food Safety Act 1990 (as amended)

Regulation (EC) No 178/2002 applied by The General Food Regulations 2004 (as amended)

Regulation (EC) No 852/2004 and No 853/2004 applied by Regulation 19 (1) of the Food

Safety and Hygiene (England) Regulations 2013

Health and Safety at Work etc. Act 1974 and related regulations

Food Information Regulations 2014

What you must do to comply with the law

The report may include **Contraventions** - matters which do not comply with the law . You must address all of the contraventions identified; failure to do so could result in legal action being taken against you.

As a guide, contraventions relating to cleaning, temperature control and poor practice, should be dealt with <u>straight away</u>.

Contraventions relating to structural repairs, your food safety management system and staff training, should be completed within the next 2 months.

Health and safety contraventions should be dealt with within 3 months unless otherwise stated.

To assist you the report may also include **Observations** of current practice, useful **Information**, **Recommendations** of good practice and reminders of **Legal Requirements**.

My inspection was not intended to identify every contravention of the law and only covers those areas, practices and procedures examined at the time of the inspection. If the report fails to mention a particular matter this does not mean you have necessarily complied with the law.

FOOD SAFETY

How we calculate your Food Hygiene Rating:

The food safety section has been divided into the three areas which you are scored against for the hygiene rating: 1. food hygiene and safety procedures, 2. structural requirements and 3. confidence in management/control procedures. Each section begins with a summary of what was observed and the score you have been given. Details of how these scores combine to produce your overall food hygiene rating are shown in the table.

| Compliance Area | | | | You Score | | | | | |
|--|--------|----|---------|-----------|---------|----|---------|----|------|
| Food Hygiene and Safety | | | | 0 | 5 | 10 | 15 | 20 | 25 |
| Structure and Cleaning | | | | 0 | 5 | 10 | 15 | 20 | 25 |
| Confidence in management & control systems | | | | 0 | 5 | 10 | 15 | 20 | 30 |
| | | | | | | | | | |
| Your Total score | 0 - 15 | 20 | 25 - 30 | | 35 - 40 | | 45 - 50 | | > 50 |
| Your Worst score | 5 | 10 | 10 | | 15 | | 20 | | - |
| | r | r | F | | | | | | |
| Your Rating is | 5 | 4 | 3 | | 2 | | 1 | | 0 |

Your Food Hygiene Rating is 3 - a generally satisfactory standard

1. Food Hygiene and Safety

Food hygiene standards are high. You demonstrated a very good standard of compliance with legal requirements. You have safe food handling practices and procedures and all the necessary control measures to prevent cross-contamination are in place. Some minor contraventions require your attention. (Score 5)

Contamination risks

Contravention The following exposed food to the general risk of physical contamination with dirt or foreign objects:

- open food i.e chicken was being stored next to dirty scourers on draining board
- utensils i.e tongs used for raw and ready-to-eat foods were being stored touching at the griddle
- uncovered foods i.e cucumber and a green pepper were being stored on a dirty surface in the pizza fridge

Legal requirement At all stages of production, processing and distribution, food must be protected from any contamination likely to render it unfit for human consumption, injurious to health or contaminated in such a way that it would be unreasonable to expect it to be consumed in that state.

Hand-washing

Observation I was pleased to see handwashing was well managed.

Personal Hygiene

Observation I was pleased to see that standards of personal hygiene were high.

Temperature Control

Information Frozen foods were being defrosted at room temperature. There is a risk that bacteria will begin to grow in the food once it has defrosted. It is therefore recommended that frozen foods are placed in a fridge to defrost. You must ensure that any run-off liquid does not present a risk e.g. defrost foods in a container.

Observation I was pleased to see you were able to limit bacterial growth and/or survival by applying appropriate temperature controls at points critical to food safety and that you were monitoring temperatures.

Poor Practices

Contravention The following matters represented poor practice and if allowed to continue may cause food to become contaminated or lead to its deterioration:

defrosting food at ambient temperatures

2. Structure and Cleaning

The structure facilities and standard of cleaning and maintenance are of a generally satisfactory standard but there are some repairs and/or improvements which are required in order for you to comply with the law. Pest control and waste disposal provisions are adequate. The contraventions require your attention; although not critical to food safety they may become so if not addressed. (Score 10)

Cleaning of Structure

Contravention The following items were dirty and require more frequent and thorough cleaning:

- extraction canopy
- electric fly killer and tray
- floor/wall junctions

Cleaning of Equipment and Food Contact Surfaces

Contravention The following items are dirty and must be cleaned:

- fridge and freezer seals
- interior to door compartments to fridges
- cabinet to chest freezer
- can opener

Cleaning Chemicals / Materials / Equipment and Methods

Observation I was pleased to see that your cleaning materials, and equipment were able to minimise the spread of harmful bacteria between surfaces.

Maintenance

Contravention The following had not been suitably maintained and must be repaired or replaced:

- split seals to fridge
- damage to wall in washing up area
- handle to chest freezer
- grill to side of chest freezer

Facilities and Structural provision

Contravention The following facilities were inadequate and must be improved:

 filters were missing from their position in the canopy. Appropriate filters must be installed immediately to reduce nuisance from odours and avoid grease accumulation in inaccessible parts of the ducting

Pest Control

Observation I was pleased to see that the premises was proofed against the entry of pests and that pest control procedures were in place.

3. Confidence in Management

There are generally satisfactory food safety controls in place although there is evidence of some non-compliance with the law. Your records are appropriate and generally maintained but some deficiencies were identified. The contraventions require your attention; although not critical to food safety they may become so if not addressed. (**Score 10**)

Type of Food Safety Management required

Observation You had a Safer Food Better Business pack. However this was very dated I recommend you purchase a new pack

Observation You had colour-coded equipment and effective separation between raw and ready-to-eat food at all stages in your operation.

Hazard ID and control.

Contravention you have not identified theses food hazards or the methods of control at critical points in your operation

- bacteria growing on food
- cross-contamination

Traceability

Observation Your records were such that food could easily be traced back to its supplier.

Waste Food and other Refuse

Observation You had measures in place to dispose of waste food appropriately and were employing the services of an approved waste contractor.

Infection Control / Sickness / Exclusion Policy

Guidance Public Health England recommends that food handlers known or suspected to be suffering from a food-borne infection or gastrointestinal illness stay away from work until symptom-free for 48 hours.

Allergens

Contravention You are failing to manage allergens properly:

- You have not identified the allergens present in the food you prepare
- You do not have a system for informing customers about the presence of allergens in the food you prepare

Legal Requirement Caterers must provide allergy information on all unpackaged food they sell. Catering businesses include restaurants, takeaways, deli counters, bakeries and sandwich bars etc. The potential for cross-contamination by allergens must also be made known to consumers. In addition food manufacturers must now label allergy causing ingredients on their pre-packed foods. You can obtain more information from the Trading Standards website www.norfolk.gov.uk/abc

Information The 14 allergens are:

- cereals containing gluten
- crustaceans, for example prawns, crabs, lobster and crayfish
- eggs
- fish
- peanuts
- soybeans
- milk
- nuts, such as almonds, hazelnuts, walnuts, pecan nuts, Brazil nuts, pistachio, cashew and macadamia (Queensland) nuts
- celery (and celeriac)
- mustard
- sesame
- sulphur dioxide, which is a preservative found in some dried fruit
- lupin
- molluscs, for example clams, mussels, whelks, oysters, snails and squid

Information The Food Information Regulations require that you know what allergens are in the food you provide. You can no longer claim you don't know what allergens are present. Neither can you simply state that all the foods you serve might contain an allergen:

- Be sure you know exactly what your allergens are
- Convey this information to your customers accurately and consistently

Recommendation Make a chart listing all your meals together with the 14 allergens (if present). Bring the chart to the attention of your customers and your staff.
