Food Premises Inspection Report

Name of business:	Good World Chinese Takeaway
Address of food business:	144 Constitution Hill Norwich NR3 4BB
Date of inspection:	11/04/2022
Risk rating reference:	22/00253/FOOD
Premises reference:	13/00060/FD_HS
Type of premises:	Food take away premises
Areas inspected:	Main Kitchen, Storeroom
Records examined:	Temperature Control Records, SFBB
Details of samples procured:	None
Summary of action taken:	Informal
General description of business:	Chinese takeaway

Relevant Legislation

Food Safety Act 1990 (as amended)

Regulation (EC) No 178/2002 applied by The General Food Regulations 2004 (as amended)

Regulation (EC) No 852/2004 and No 853/2004 applied by Regulation 19 (1) of the Food Safety and Hygiene (England) Regulations 2013

Health and Safety at Work etc. Act 1974 and related regulations

Food Information Regulations 2014

What you must do to comply with the law

The report may include **Contraventions** - matters which do not comply with the law . You must address all of the contraventions identified; failure to do so could result in legal action being taken against you.

As a guide, contraventions relating to cleaning, temperature control and poor practice, should be dealt with straight away.

Contraventions relating to structural repairs, your food safety management system and staff training, should be completed within the next 2 months.

Health and safety contraventions should be dealt with within 3 months unless otherwise stated.

To assist you the report may also include **Observations** of current practice, useful **Information, Recommendations** of good practice and reminders of **Legal Requirements** .

My inspection was not intended to identify every contravention of the law and only covers those areas, practices and procedures examined at the time of the inspection. If the report fails to mention a particular matter this does not mean you have necessarily complied with the law.

FOOD SAFETY

How we calculate your Food Hygiene Rating:

The food safety section has been divided into the three areas which you are scored against for the hygiene rating: 1. food hygiene and safety procedures, 2. structural requirements and 3. confidence in management/control procedures. Each section begins with a summary of what was observed and the score you have been given. Details of how these scores combine to produce your overall food hygiene rating are shown in the table.

Compliance Area	You Score					
Food Hygiene and Safety	0	5	10	15	20	25
Structure and Cleaning	0	5	10	15	20	25
Confidence in management & control systems	0	5	10	15	20	30
Your Total score	0 - 15	20	25 - 30	35 - 40	45 - 50	> 50
Your Worst score	5	10	10	15	20	-
Your Rating is	5	4	3	2	1	0

Your Food Hygiene Rating is 3 - a generally satisfactory standard

1. Food Hygiene and Safety

Food hygiene standards are generally satisfactory and maintained. There is evidence of some non-compliance with legal requirements. Some lapses are evident however generally you have satisfactory food handling practices and procedures and adequate control measures to prevent cross-contamination are in place. The contraventions require your attention; although not critical to food safety they may become so if not addressed.
(Score 10)

Contamination risks

Contravention The following exposed ready-to-eat food and or its packaging to the risk of cross-contamination with foodborne bacteria from raw meat or unwashed fruits and vegetables:

- food containers were in direct contact with food below
- green cutting board was badly scored and needs replacing
- same containers used for raw and ready-to-eat foods
- jug and spoon was being stored in dried ingredients

Legal requirement At all stages of production, processing and distribution, food must be protected from any contamination likely to render it unfit for human consumption,

injurious to health or contaminated in such a way that it would be unreasonable to expect it to be consumed in that state.

Contravention You could not demonstrate effective disinfection of equipment and utensils used for both raw and ready-to-eat foods, either by heat or an adequate dishwasher cycle. Separate equipment and utensils must be provided. Such equipment should be easily identifiable (e.g. colour coded) and must be stored and washed separately.

Personal Hygiene

Contravention The following are examples of poor personal hygiene or where it was made difficult for food handlers to maintain sufficiently high standards of personal cleanliness:

- staff were not wearing suitable protective clothing

Legal requirement All persons in food handling areas must wear suitable, clean, and where appropriate protective clothing

Temperature Control

Observation I was pleased to see you were able to limit bacterial growth and/or survival by applying appropriate temperature controls at points critical to food safety and that you were monitoring temperatures.

Poor Practices

Contravention The following matters represented poor practice and if allowed to continue may cause food to become contaminated or lead to its deterioration::

- tomatoes were being stored beyond their 'best before' date of 8/4

Guidance It is permitted to use food after its BEST BEFORE date, but becomes an offence if it is not of the nature, substance or quality demanded by the consumer. You must check the food and make sure it is ok before you use it

2. Structure and Cleaning

The structure facilities and standard of cleaning and maintenance are of a generally satisfactory standard but there are some repairs and/or improvements which are required in order for you to comply with the law. Pest control and waste disposal provisions are

adequate. The contraventions require your attention; although not critical to food safety they may become so if not addressed. **(Score 10)**

Cleaning of Structure

Contravention The following items were dirty and require more frequent and thorough cleaning:

- floor/wall junctions
- flooring behind and under equipment

Recommendation Housekeeping could be greatly improved. Remove redundant items and equipment from food rooms, tidy away miscellaneous objects into drawers and boxes and keep work surfaces and the floor clear for ease of cleaning and disinfection.

Cleaning of Equipment and Food Contact Surfaces

Contravention The following items are dirty and must be cleaned:

- fridge and freezer seals
- fridge shelving
- microwave
- food storage containers
- lids to food storage containers
- wooden knife block. Do not use as this cannot be properly cleaned

Information personal items such as phones radios in the kitchen must be kept clean and stored so that they do not contaminate the food

Cleaning Chemicals / Materials / Equipment and Methods

Contravention The following evidence demonstrated your cleaning materials, equipment and methods were not sufficient to control the spread of harmful bacteria between surfaces:

- scourers were badly worn and need replacing

Contravention Cardboard cannot be properly cleaned. Do not use it to cover the floor/ shelves of work surfaces in food rooms. Replace the cardboard boxes used for storing prawn crackers with a plastic container that can be cleaned

Maintenance

Contravention The following had not been suitably maintained and must be repaired or replaced:

- condenser in walk-in fridge was leaking

- crack to wall/ceiling joints
- holes to ceiling
- damaged lids to food storage containers
- rust seen to shelving unit storing food

Facilities and Structural provision

Recommendation I recommend that you fit a self closing door mechanism to wc door

Pest Control

Observation I was pleased to see that the premises was proofed against the entry of pests and that pest control procedures were in place.

3. Confidence in Management

There are generally satisfactory food safety controls in place although there is evidence of some non-compliance with the law. The contraventions require your attention; although not critical to food safety they may become so if not addressed. **(Score 10)**

Type of Food Safety Management System Required

Information Your Safer Food Better Business pack was disorganised and very dated I recommend you purchase a new up to date pack

Food Hazard Identification and Control

Contravention You have not identified these food hazards or the methods of control at critical points in your operation:

- cross-contamination

Proving Your Arrangements are Working Well

Contravention You are not working to the following safe methods in your SFBB pack:

- cross contamination/ physical or chemical contamination
- personal hygiene / handwashing
- cleaning schedule
- daily diary
- 4-weekly checks

Traceability

Observation Your records were such that food could easily be traced back to its supplier.

Waste Food and other Refuse

Observation You had measures in place to dispose of waste food appropriately and were employing the services of an approved waste contractor.

Training

Observation I was pleased to see that food handlers had been trained to an appropriate level and evidence of their training was made available.

Infection Control / Sickness / Exclusion Policy

Guidance Public Health England recommends that food handlers known or suspected to be suffering from a food-borne infection or gastrointestinal illness stay away from work until symptom-free for 48 hours.

Allergens

Observation You had identified the presence of allergens in your non-prepacked food and had brought this to the attention of your customers.
