

**Public Protection (food & safety)**

**Food Premises Inspection Report**

Name of business:	Love Thy Burger
Address of food business:	349 - 351 Aylsham Road Norwich NR3 2RX
Date of inspection:	12/10/2022
Risk rating reference:	22/00634/FOOD
Premises reference:	22/00060/FD_HS
Type of premises:	Food take away premises
Areas inspected:	Main Kitchen
Records examined:	FSMS
Details of samples procured:	None
Summary of action taken:	Informal
General description of business:	Takeaway

**Relevant Legislation**

Food Safety Act 1990 (as amended)

Regulation (EC) No 178/2002 applied by The General Food Regulations 2004 (as amended)

Regulation (EC) No 852/2004 and No 853/2004 applied by Regulation 19 (1) of the Food Safety and Hygiene (England) Regulations 2013

Health and Safety at Work etc. Act 1974 and related regulations

Food Information Regulations 2014

**What you must do to comply with the law**

The report may include **Contraventions** - matters which do not comply with the law . You must address all of the contraventions identified; failure to do so could result in legal action being taken against you.

As a guide, contraventions relating to cleaning, temperature control and poor practice, should be dealt with straight away.

Contraventions relating to structural repairs, your food safety management system and staff training, should be completed within the next 2 months.

Health and safety contraventions should be dealt with within 3 months unless otherwise stated.

To assist you the report may also include **Observations** of current practice, useful **Information, Recommendations** of good practice and reminders of **Legal Requirements** .

My inspection was not intended to identify every contravention of the law and only covers those areas, practices and procedures examined at the time of the inspection. If the report fails to mention a particular matter this does not mean you have necessarily complied with the law.

## FOOD SAFETY

### How we calculate your Food Hygiene Rating:

The food safety section has been divided into the three areas which you are scored against for the hygiene rating: 1. food hygiene and safety procedures, 2. structural requirements and 3. confidence in management/control procedures. Each section begins with a summary of what was observed and the score you have been given. Details of how these scores combine to produce your overall food hygiene rating are shown in the table.

Compliance Area	You Score					
Food Hygiene and Safety	0	5	<b>10</b>	15	20	25
Structure and Cleaning	0	<b>5</b>	10	15	20	25
Confidence in management & control systems	0	5	<b>10</b>	15	20	30
<b>Your Total score</b>	0 - 15	20	<b>25 - 30</b>	35 - 40	45 - 50	> 50
<b>Your Worst score</b>	5	10	<b>10</b>	15	20	-
<b>Your Rating is</b>	5	4	<b>3</b>	2	1	0

Your Food Hygiene Rating is 3 - a generally satisfactory standard

### 1. Food Hygiene and Safety

Food hygiene standards are generally satisfactory and maintained. There is evidence of some non-compliance with legal requirements. Some lapses are evident however generally you have satisfactory food handling practices and procedures and adequate control measures to prevent cross-contamination are in place. The contraventions require your attention; although not critical to food safety they may become so if not addressed.  
**(Score 10)**

#### Contamination risks

**Contravention** The following exposed food to the general risk of cross-contamination with bacteria or allergens or its physical contamination with dirt, foreign objects or chemicals:

- cooked food i.e pulled pork stored next to raw foods i.e bacon in the fridge

**Contravention** You could not demonstrate effective disinfection of equipment and utensils used for both raw and ready-to-eat foods, either by heat or an adequate dishwasher cycle. Separate equipment and utensils must be provided. Such equipment should be easily identifiable (e.g. colour coded) and must be stored and washed separately.:

- tongs
- food storage containers

**Legal Requirement** At all stages of production, processing and distribution, food must be protected from any contamination likely to render it unfit for human consumption, injurious to health or contaminated in such a way that it would be unreasonable to expect it to be consumed in that state.

**Guidance** The FSA (visit [www.food.gov.uk](http://www.food.gov.uk) for more information) has issued guidance on controlling E.coli 0157 through:

- \* the complete separation of raw and ready-to-eat food
- \* the correct use of wash-hand basins and thorough handwashing
- \* having dedicated equipment (including complex equipment) for raw and ready-to-eat foods
- \* thorough 2-stage cleaning and the correct use of sanitisers
- \* and by controlling the risks posed by soily vegetables.

**Recommendation** Provide separate equipment and utensils designated for use with either raw or ready-to-eat foods, which can be easily identified (e.g. colour coded) and stored and washed separately.

**Recommendation** Chopping/cutting boards were being stored directly touching. Chopping/cutting boards must be stored in a rack properly divided to stop cross-contamination and to allow aeration

**Recommendation** Chopping/cutting boards were held stable with tea towels/cloths and could contaminate the board. Use silicone board mats to stabilise your cutting boards. These can be placed in the dishwasher and /or can be sterilised.

**Information** Acrylamide is a carcinogenic chemical that is formed when some foods containing carbohydrate e.g. potatoes and bread, are cooked at high temperatures (i.e. above 120°C). Cooking methods that often exceed this temperature include frying, roasting, baking, grilling and toasting. All have the potential to produce acrylamide in concentrations which could be harmful.

### Hand-washing

**Contravention** The following indicated that hand-washing was not suitably managed:

- no towel to wash hand basin I was offered a napkin to dry my hands
- use anti bacterial soap for hand washing as scented soap could taint the food

**Legal requirement** Washbasins must be available, suitably located and designated for cleaning hands. Wash-hand basins must be provided with hot and cold (or mixed) running water. Soap and hand drying facilities must be located nearby.

### Personal Hygiene

**Contravention** The following are examples of poor personal hygiene or where it was made difficult for food handlers to maintain sufficiently high standards of personal cleanliness:

- staff were not wearing suitable protective clothing. Aprons were put on in my presence

**Legal requirement** All persons in food handling areas must wear suitable, clean, and where appropriate protective clothing

### Temperature Control

**Observation** I was pleased to see you were able to limit bacterial growth and/or survival by applying appropriate temperature controls at points critical to food safety and that you were monitoring temperatures.

**Recommendation** it is a government recommendation that eggs are stored in the fridge

### Poor Practices

**Contravention** The following matters represented poor practice and if allowed to continue may cause food to become contaminated or lead to its deterioration:

- carrots were being stored beyond their 'Best before' date of 26/11

**Guidance** It is an offence to use food which is not of the nature, substance or quality demanded by the consumer. Food used passed its 'best before' date could be of a reduced quality so you must check it is OK before you use it.

## **2. Structure and Cleaning**

The structure facilities and standard of cleaning and maintenance are all of a good standard and only minor repairs and/or improvements are required. Pest control and waste disposal provisions are adequate. The minor contraventions require your attention. **(Score 5)**

### Cleaning of Structure

**Contravention** The following items were dirty and require more frequent and thorough cleaning:

- floor/wall junctions

### Cleaning of Equipment and Food Contact Surfaces

**Contravention** The following items are dirty and must be cleaned:

- seals to fridge
- interior to top of chest freezer
- remove protective plastic film from fridge and shelving to aid easy cleaning
- food storage containers
- interior to bottom of fridge

### Cleaning Chemicals / Materials / Equipment and Methods

**Contravention** The following evidence demonstrated your cleaning materials, equipment and methods were not sufficient to control the spread of harmful bacteria between surfaces:

- worn scourer
- food handler unaware of contact time of sanitizer

**Information** A surface sanitiser may be rendered ineffective if you are not following the correct dilutions or allowing a sufficient time for the product to work (contact time). Always follow the instructions on the product label.

### Maintenance

**Contravention** The following had not been suitably maintained and must be repaired or replaced:

- handle to chest freezer storing chips and ice cream

### Facilities and Structural provision

**Observation** I was pleased to see the premises had been well maintained and that adequate facilities had been provided.

### **3. Confidence in Management**

There are generally satisfactory food safety controls in place although there is evidence of some non-compliance with the law. The contraventions require your attention; although not critical to food safety they may become so if not addressed. **(Score 10)**

#### Type of Food Safety Management System required.

**Legal requirement** Your food safety management system must be available on site so that your staff can refer to procedures and record checks daily

#### Hazard ID and control

**Contravention** The Safe Methods in your Safer Food Better Business (SFBB) pack are intended to show you have identified the hazards to food and what you must do to control them. You are not working to these safe methods

- cross-contamination

#### Traceability

**Observation** Your records were such that food could easily be traced back to its supplier.

#### Infection Control / Sickness / Exclusion Policy

**Guidance** UK Health Security Agency recommends that food handlers known or suspected to be suffering from a food-borne infection or gastrointestinal illness stay away from work until symptom-free for 48 hours.

#### Waste Food and other Refuse

**Observation** You had measures in place to dispose of waste food appropriately and were employing the services of an approved waste contractor.
