

**Public Protection (food & safety)**

**Food Premises Inspection Report**

Name of business:	The StreetFood Box @ Castle Social
Address of food business:	Kiosk 1B Mall Kitchen 99 Castle Quarter Norwich NR1 3DD
Date of inspection:	06/12/2022
Risk rating reference:	22/00665/FOOD
Premises reference:	22/00266/FD_HS
Type of premises:	Food take away premises
Areas inspected:	Main Kitchen, Servery
Records examined:	SFBB
Details of samples procured:	None
Summary of action taken:	Informal
General description of business:	Fast food takeaway

**Relevant Legislation**

Food Safety Act 1990 (as amended)

Regulation (EC) No 178/2002 applied by The General Food Regulations 2004 (as amended)

Regulation (EC) No 852/2004 and No 853/2004 applied by Regulation 19 (1) of the Food Safety and Hygiene (England) Regulations 2013

Health and Safety at Work etc. Act 1974 and related regulations

Food Information Regulations 2014

**What you must do to comply with the law**

The report may include **Contraventions** - matters which do not comply with the law . You must address all of the contraventions identified; failure to do so could result in legal action being taken against you.

As a guide, contraventions relating to cleaning, temperature control and poor practice, should be dealt with straight away.

Contraventions relating to structural repairs, your food safety management system and staff training, should be completed within the next 2 months.

Health and safety contraventions should be dealt with within 3 months unless otherwise stated.

To assist you the report may also include **Observations** of current practice, useful **Information, Recommendations** of good practice and reminders of **Legal Requirements** .

My inspection was not intended to identify every contravention of the law and only covers those areas, practices and procedures examined at the time of the inspection. If the report fails to mention a particular matter this does not mean you have necessarily complied with the law.

## **FOOD SAFETY**

### **How we calculate your Food Hygiene Rating:**

The food safety section has been divided into the three areas which you are scored against for the hygiene rating: 1. food hygiene and safety procedures, 2. structural requirements and 3. confidence in management/control procedures. Each section begins with a summary of what was observed and the score you have been given. Details of how these scores combine to produce your overall food hygiene rating are shown in the table.

Compliance Area	You Score					
Food Hygiene and Safety	0	5	10	15	20	25
Structure and Cleaning	0	5	10	15	20	25
Confidence in management & control systems	0	5	10	15	20	30
<b>Your Total score</b>	0 - 15	20	25 - 30	35 - 40	45 - 50	> 50
<b>Your Worst score</b>	5	10	10	15	20	-
<b>Your Rating is</b>	5	4	3	2	1	0

Your Food Hygiene Rating is 3 - a generally satisfactory standard

### **1. Food Hygiene and Safety**

Food hygiene standards are generally satisfactory and maintained. There is evidence of some non-compliance with legal requirements. Some lapses are evident however generally you have satisfactory food handling practices and procedures and adequate control measures to prevent cross-contamination are in place. The contraventions require your attention; although not critical to food safety they may become so if not addressed.  
**(Score 10)**

#### **Contamination risks**

**Contravention** You could not demonstrate effective disinfection of equipment and utensils used for both raw and ready-to-eat foods, either by heat or an adequate dishwasher cycle. Separate equipment and utensils must be provided. Such equipment should be easily identifiable (e.g. colour coded) and must be stored and washed separately.:

- Spatulas used for raw and ready-to-eat foods

**Legal Requirement** At all stages of production, processing and distribution, food must be protected from any contamination likely to render it unfit for human consumption,

injurious to health or contaminated in such a way that it would be unreasonable to expect it to be consumed in that state.

**Guidance** The FSA (visit [www.food.gov.uk](http://www.food.gov.uk) for more information) has issued guidance on controlling E.coli 0157 through:

- \* the complete separation of raw and ready-to-eat food
- \* the correct use of wash-hand basins and thorough handwashing
- \* having dedicated equipment (including complex equipment) for raw and ready-to-eat foods
- \* thorough 2-stage cleaning and the correct use of sanitisers
- \* and by controlling the risks posed by soily vegetables.

**Guidance** If equipment and utensils (for example chopping boards, containers and tongs) are to be used for raw and RTE foods, they should be disinfected by heat or an adequate dishwasher cycle (able to reach 82°C for 15 seconds) between uses.

**Guidance** If adequate heat disinfection (such as a dishwasher or plunge sink) is not possible, separate equipment and utensils should be used for handling raw and RTE foods. Such equipment should be easily identifiable (colour coded) and must be stored and washed separately.

**Recommendation** Provide separate equipment and utensils designated for use with either raw or ready-to-eat foods, which can be easily identified (e.g. colour coded) and stored and washed separately.

**Information** Acrylamide is a carcinogenic chemical that is formed when some foods containing carbohydrate e.g. potatoes and bread, are cooked at high temperatures (i.e. above 120°C). Cooking methods that often exceed this temperature include frying, roasting, baking, grilling and toasting. All have the potential to produce acrylamide in concentrations which could be harmful.

### Hand-washing

**Contravention** The following indicated that hand-washing was not suitably managed:

- staff were not seen washing their hands when I visited
- no towel to towel dispenser

**Information** Handwashing is required:

- \* before handling ready-to-eat food
- \* after touching raw food and its packaging, including unwashed fruit and vegetables
- \* after a break/smoking
- \* after going to the toilet
- \* after cleaning
- \* after removing waste
- \* after blowing your nose

### Unfit food

**Contravention** The following food was unfit because it was past its USE BY date:

- 5 x packets of raw minced beef were being stored passed its use by date of 5/12

### Poor Practices

**Contravention** The following matters represented poor practice and if allowed to continue may cause food to become contaminated or lead to its deterioration:

- no date of when opened on cooked sliced chicken meat in the walk-in fridge

## **2. Structure and Cleaning**

The structure facilities and standard of cleaning and maintenance are of a generally satisfactory standard but there are some repairs and/or improvements which are required in order for you to comply with the law. Pest control and waste disposal provisions are adequate. The contraventions require your attention; although not critical to food safety they may become so if not addressed. **(Score 10)**

### Cleaning of Structure

**Contravention** The following items were dirty and require more frequent and thorough cleaning:

- floor/wall junctions
- flooring behind and under equipment
- skirting boards
- filters to extraction canopy
- pipework
- wall behind deep fat fryer
- architrave to door
- flooring to walk-in fridge and freezer

**Recommendation** Housekeeping could be greatly improved. Remove redundant items and equipment from food rooms, tidy away miscellaneous objects into drawers and boxes and keep work surfaces and the floor clear for ease of cleaning and disinfection.

### Cleaning of Equipment and Food Contact Surfaces

**Contravention** The following items are dirty and must be cleaned:

- interior to cake display fridge

- framework to stainless steel equipment
- heads to taps to wash hand basin
- underneath towel dispenser
- interior ceiling to microwave

#### Cleaning Chemicals / Materials / Equipment and Methods

**Observation** I was pleased to see that your cleaning materials, methods and equipment were able to minimise the spread of harmful bacteria between surfaces.

#### Maintenance

**Contravention** The following had not been suitably maintained and must be repaired or replaced:

- broken storage containers

#### Facilities and Structural provision

**Observation** I was pleased to see the premises had been well maintained and that adequate facilities had been provided.

#### Pest Control

**Observation** You have a pest control contract in place and there is no evidence of pest activity on the premises.

### **3. Confidence in Management**

There are generally satisfactory food safety controls in place although there is evidence of some non-compliance with the law. The contraventions require your attention; although not critical to food safety they may become so if not addressed. **(Score 10)**

#### Food Hazard Identification and Control

**Contravention** You have not identified these food hazards or the methods of control at critical points in your operation:

- cross-contamination

#### Safer Food Better Business/Food Safety Management System that works

**Contravention** The Management sections in your Safer food Better Business (SFBB) pack are intended to demonstrate you are in day-to-day control of the hazards to food. The following Management sections were either missing, incomplete or not up-to-date:

- suppliers list
- contacts list
- staff SFBB training records

**Contravention** The following are examples of where your documented procedures said one thing but you were doing another.

- It states in your pack that you have a dishwasher

#### Traceability

**Observation** Your records were such that food could easily be traced back to its supplier.

#### Infection Control / Sickness / Exclusion Policy

**Observation** Policies were in place to prevent any infected food handler from contaminating food.

#### Waste Food and other Refuse

**Observation** You had measures in place to dispose of waste food appropriately and were employing the services of an approved waste contractor.
