### **Food Premises Inspection Report**

Name of business: The House Authentic Thai Cuisine

Address of food business: Ground Floor 2 Queens Road Norwich NR1 3PR

Date of inspection: 09/01/2023
Risk rating reference: 23/00025/FOOD
Premises reference: 12/00232/FD\_HS

Type of premises: Restaurant or cafe

Areas inspected: Main Kitchen, Storeroom, Servery

Records examined: Temperature Control Records, Pest Control Report,

SFBB, Cleaning Schedule, Training Certificates/records

Details of samples procured: None Summary of action taken: Informal

General description of business: Thai Restaurant

## **Relevant Legislation**

Food Safety Act 1990 (as amended)

Regulation (EC) No 178/2002 applied by The General Food Regulations 2004 (as amended)

Regulation (EC) No 852/2004 and No 853/2004 applied by Regulation 19 (1) of the Food

Safety and Hygiene (England) Regulations 2013

Health and Safety at Work etc. Act 1974 and related regulations

Food Information Regulations 2014

#### What you must do to comply with the law

The report may include **Contraventions** - matters which do not comply with the law . You must address all of the contraventions identified; failure to do so could result in legal action being taken against you.

As a guide, contraventions relating to cleaning, temperature control and poor practice, should be dealt with <u>straight away</u>.

Contraventions relating to structural repairs, your food safety management system and staff training, should be completed within the next 2 months.

Health and safety contraventions should be dealt with within 3 months unless otherwise stated.

To assist you the report may also include **Observations** of current practice, useful **Information**, **Recommendations** of good practice and reminders of **Legal Requirements**.

My inspection was not intended to identify every contravention of the law and only covers those areas, practices and procedures examined at the time of the inspection. If the report fails to mention a particular matter this does not mean you have necessarily complied with the law.

### **FOOD SAFETY**

# How we calculate your Food Hygiene Rating:

The food safety section has been divided into the three areas which you are scored against for the hygiene rating: 1. food hygiene and safety procedures, 2. structural requirements and 3. confidence in management/control procedures. Each section begins with a summary of what was observed and the score you have been given. Details of how these scores combine to produce your overall food hygiene rating are shown in the table.

Compliance Area				You Score					
Food Hygiene and Safety				0	5	10	15	20	25
Structure and Cleaning				0	5	10	15	20	25
Confidence in management & control systems				0	5	10	15	20	30
Your Total score	0 - 15	20	25 - 30		35 - 40		45 - 50		> 50
Your Worst score	5	10	10		15		20		-
Your Rating is	5	4	3		2		1		0

Your Food Hygiene Rating is 4 - a good standard

## 1. Food Hygiene and Safety

Food hygiene standards are high. You demonstrated a very good standard of compliance with legal requirements. You have safe food handling practices and procedures and all the necessary control measures to prevent cross-contamination are in place. Some minor contraventions require your attention. (Score 5)

#### Contamination risks

**Contravention** The following exposed ready-to-eat food and or its packaging to the risk of cross-contamination with foodborne bacteria from raw meat or unwashed fruits and vegetables:

raw food i.e pork stored on top of ready-to-eat foods in the undercounter fridge

**Legal requirement** At all stages of production, processing and distribution, food must be protected from any contamination likely to render it unfit for human consumption, injurious to health or contaminated in such a way that it would be unreasonable to expect it to be consumed in that state.

### Hand-washing

**Observation** I was pleased to see handwashing was well managed.

# Personal Hygiene

**Observation** I was pleased to see that standards of personal hygiene were high.

## **Temperature Control**

**Recommendation** it is a government recommendation that eggs are stored in the fridge

**Observation** I was pleased to see you were able to limit bacterial growth and/or survival by applying appropriate temperature controls at points critical to food safety and that you were monitoring temperatures.

### **Poor Practices**

**Contravention** The following matters represented poor practice and if allowed to continue may cause food to become contaminated or lead to its deterioration:

- food i.e coconut milk stored in open can in fridge
- old date labels were still on food storage containers in the fridge

**Legal requirement** once opened, canned food which is to be stored should be transferred to plastic lidded containers, designed for the storage of food, to prevent chemical contamination of the food

**Recommendation** I recommend that cans which are dented should not be used because the contents could be unfit or of poor quality, as air may have gained entry into the can

### 2. Structure and Cleaning

The structure facilities and standard of cleaning and maintenance are all of a good standard and only minor repairs and/or improvements are required. Pest control and waste disposal provisions are adequate. The minor contraventions require your attention. (Score 5)

#### Cleaning of Structure

**Contravention** The following items were dirty and require more frequent and thorough cleaning:

- floor/wall junctions
- flooring underneath equipment
- pipework
- pooled water was seen underneath the dishwasher and washing up sink

- rear door
- shelving where dried goods are stored
- · air vents to ceiling

**Information** Covering surfaces with aluminium foil leads to a potential contamination risk as the foil breaks up into smaller shards

**Contravention** The following items could not be effectively cleaned and must be covered, made non-absorbent or replaced:

architrave to door

### Cleaning of Equipment and Food Contact Surfaces

**Contravention** The following items are dirty and must be cleaned:

- underneath towel dispenser
- lid to rice cooker
- lids to food storage containers
- lever and spout to deep fat fryer
- side to door to fridge
- interior door to upright freezer
- seals to fridges and freezers
- build up of ice to chest freezer
- cutlery tray

#### Cleaning Chemicals / Materials / Equipment and Methods

**Contravention** The following evidence demonstrated your cleaning materials, equipment and methods were not sufficient to control the spread of harmful bacteria between surfaces:

worn scourer

#### Maintenance

**Contravention** The following had not been suitably maintained and must be repaired or replaced:

peeling paint to wall under the wash hand basin

#### Facilities and Structural provision

**Observation** I was pleased to see the premises had been well maintained and that adequate facilities had been provided.

#### Pest Control

**Observation** You have a pest control contract in place and there is no evidence of pest activity on the premises.

**Observation** I was pleased to see that the premises was proofed against the entry of pests and that pest control procedures were in place.

#### 3. Confidence in Management

There are generally satisfactory food safety controls in place although there is evidence of some non-compliance with the law. The contraventions require your attention; although not critical to food safety they may become so if not addressed. (Score 10)

### Type of Food Safety Management System Required

**Observation** Your SFBB/food safety management system was in place and working well. I was confident you had effective control over hazards to food.

**Observation** You were date labelling perishable foods appropriately and could demonstrate effective control over food spoilage organisms.

**Observation** You had colour-coded equipment and effective separation between raw and ready-to-eat food at all stages in your operation.

**Observation** You were monitoring (and recording) the temperatures of your fridges and freezers well as the temperature of cooked/hot-held food and could demonstrate effective systems for controlling bacterial growth and survival.

#### Food Hazard Identification and Control

**Contravention** You have not identified these food hazards or the methods of control at critical points in your operation:

cross-contamination

#### Proving Your Arrangements are Working Well

**Contravention** You are not working to the following safe methods in your SFBB pack:

- cleaning schedule
- cloths / cross contamination
- cross contamination/ physical or chemical contamination

#### Traceability

**Observation** Your records were such that food could easily be traced back to its supplier.

# Infection Control / Sickness / Exclusion Policy

**Guidance** UK Health Security Agency recommends that food handlers known or suspected to be suffering from a food-borne infection or gastrointestinal illness stay away from work until symptom-free for 48 hours.

## Waste Food and other Refuse

**Observation** You had measures in place to dispose of waste food appropriately and were employing the services of an approved waste contractor.

### **Training**

**Observation** I was pleased to see that food handlers had been trained to an appropriate level and evidence of their training was made available.

## <u>Allergens</u>

**Information** The Food Information Regulations require that you know what allergens are in the food you provide. You can no longer claim you don't know what allergens are present. Neither can you simply state that all the foods you serve might contain an allergen:

- be sure you know exactly what your allergens are
- convey this information to your customers accurately and consistently
