

**Public Protection (food & safety)**

**Food Premises Inspection Report**

Name of business:	Deb's Tea Stall
Address of food business:	Stalls 116 And 119 Market Place Norwich NR2 1ND
Date of inspection:	14/02/2023
Risk rating reference:	23/00153/FOOD
Premises reference:	22/00285/FD_HS
Type of premises:	Food take away premises
Areas inspected:	All
Records examined:	SFBB
Details of samples procured:	None
Summary of action taken:	Informal
General description of business:	Food stall on Norwich market.

**Relevant Legislation**

Food Safety Act 1990 (as amended)

Regulation (EC) No 178/2002 applied by The General Food Regulations 2004 (as amended)

Regulation (EC) No 852/2004 and No 853/2004 applied by Regulation 19 (1) of the Food Safety and Hygiene (England) Regulations 2013

Health and Safety at Work etc. Act 1974 and related regulations

Food Information Regulations 2014

**What you must do to comply with the law**

The report may include **Contraventions** - matters which do not comply with the law . You must address all of the contraventions identified; failure to do so could result in legal action being taken against you.

As a guide, contraventions relating to cleaning, temperature control and poor practice, should be dealt with straight away.

Contraventions relating to structural repairs, your food safety management system and staff training, should be completed within the next 2 months.

Health and safety contraventions should be dealt with within 3 months unless otherwise stated.

To assist you the report may also include **Observations** of current practice, useful **Information, Recommendations** of good practice and reminders of **Legal Requirements** .

My inspection was not intended to identify every contravention of the law and only covers those areas, practices and procedures examined at the time of the inspection. If the report fails to mention a particular matter this does not mean you have necessarily complied with the law.

## FOOD SAFETY

### How we calculate your Food Hygiene Rating:

The food safety section has been divided into the three areas which you are scored against for the hygiene rating: 1. food hygiene and safety procedures, 2. structural requirements and 3. confidence in management/control procedures. Each section begins with a summary of what was observed and the score you have been given. Details of how these scores combine to produce your overall food hygiene rating are shown in the table.

Compliance Area	You Score					
Food Hygiene and Safety	0	5	10	15	20	25
Structure and Cleaning	0	5	10	15	20	25
Confidence in management & control systems	0	5	10	15	20	30

  

Your Total score	0 - 15	20	25 - 30	35 - 40	45 - 50	> 50
Your Worst score	5	10	10	15	20	-

  

Your Rating is	5	4	3	2	1	0
----------------	---	---	---	---	---	---

Your Food Hygiene Rating is 4 - a good standard

### 1. Food Hygiene and Safety

Food hygiene standards are high. You demonstrated a very good standard of compliance with legal requirements. You have safe food handling practices and procedures and all the necessary control measures to prevent cross-contamination are in place. Some minor contraventions require your attention. **(Score 5)**

#### Hand-washing

**Contravention** The following indicated that hand-washing was not suitably managed:

- the hot water was too hot for comfortable hand washing
- using gloves without suitable procedures to ensure they remain hygienic

**Legal Requirement** The way gloves are used in your premises was unhygienic and likely to give rise to a risk of cross contamination. Ensure that hands are always washed thoroughly before putting gloves on and after taking them off. Gloves should be disposable and should always be changed between the handling of raw and ready-to-eat foods. Gloves should also be changed before handling ready-to-eat food if they have come in contact with any surface or objects not designated as clean (e.g. money), and also at every break.

**Recommendation** After washing hands food handlers should turn the taps off using paper towel to prevent them from recontaminating their hands

**Contravention** Ensure a plug is available at all times to place in the dedicated wash hand basin to mix boiling water in with cold water supply so water is more comfortable to wash hands

### Temperature Control

**Contravention** The following evidence indicated there was a risk of bacteria growing on food:

- food temperatures were not being monitored in your fridge's. Use an independent shelf thermometers or an infra red thermometer to check foods are stored under 8 degree's celsius. Ideally you should be recording the temperature of your fridge's or the food contained within them each day as evidence they are kept below the legal requirement.

## **2. Structure and Cleaning**

The structure facilities and standard of cleaning and maintenance are all of a good standard and only minor repairs and/or improvements are required. Pest control and waste disposal provisions are adequate. The minor contraventions require your attention. **(Score 5)**

### Cleaning of Structure

**Contravention** The following items were dirty and require more frequent and thorough cleaning:

- pipe work next to wash hand basin

## **3. Confidence in Management**

There are generally satisfactory food safety controls in place although there is evidence of some non-compliance with the law. Some minor issues were identified relating to staff supervision and training. The contraventions require your attention; although not critical to food safety they may become so if not addressed. **(Score 10)**

### Type of Food Safety Management System Required

**Legal Requirement** Food business operators must put in place, implement and maintain a permanent procedure or procedures based on HACCP principles:

- Identify hazards to food.
- Identify the critical limits (what is acceptable and unacceptable).
- Monitor critical control points to ensure critical limits are met.
- Keep appropriate records to demonstrate control measures are effective.

### Proving Your Arrangements are Working Well

**Contravention** You are not working to the following safe methods in your SFBB pack:

- food allergies

### Traceability

**Observation** Your records were such that food could easily be traced back to its supplier.

### Training

**Contravention** The following evidence indicates there is a staff training need as food handlers:

- did not appreciate allergen risks
- did not know the critical temperature for cooking foods
- were unaware of the contact time for the sanitiser
- staff training records were not completed. You therefore had no record that staff had been trained on your safe methods i.e proper hand washing

**Legal Requirement** Food business operators must ensure that food handlers are supervised and instructed and/or trained in food hygiene matters to an appropriate level for the work they do. The male food handler I spoke with requires dedicated food hygiene training or supervision when you are not at the stall.

### Allergens

**Contravention** You are failing to manage allergens properly:

- you have not identified the allergens present in the food you prepare

**Recommendation** Make a chart listing all your meals together with the 14 allergens (if present). Bring the chart to the attention of your customers and your staff.

**Recommendation** Add allergy information to your menu
