

Public Protection (food & safety)

Food Premises Inspection Report

Name of business:	Best Gyros Norwich
Address of food business:	76E Catton Grove Road Norwich NR3 3AA
Date of inspection:	12/05/2023
Risk rating reference:	23/00409/FOOD
Premises reference:	23/00086/FD_HS
Type of premises:	Food take away premises
Areas inspected:	All
Records examined:	SFBB
Details of samples procured:	None
Summary of action taken:	Informal
General description of business:	Greek restaurant/takeaway

Relevant Legislation

Food Safety Act 1990 (as amended)

Regulation (EC) No 178/2002 applied by The General Food Regulations 2004 (as amended)

Regulation (EC) No 852/2004 and No 853/2004 applied by Regulation 19 (1) of the Food Safety and Hygiene (England) Regulations 2013

Health and Safety at Work etc. Act 1974 and related regulations

Food Information Regulations 2014

What you must do to comply with the law

The report may include **Contraventions** - matters which do not comply with the law. You must address all of the contraventions identified; failure to do so could result in legal action being taken against you.

As a guide, contraventions relating to cleaning, temperature control and poor practice, should be dealt with straight away.

Contraventions relating to structural repairs, your food safety management system and staff training, should be completed within the next 2 months.

Health and safety contraventions should be dealt with within 3 months unless otherwise stated.

To assist you the report may also include **Observations** of current practice, useful **Information, Recommendations** of good practice and reminders of **Legal Requirements**.

My inspection was not intended to identify every contravention of the law and only covers those areas, practices and procedures examined at the time of the inspection. If the report fails to mention a particular matter this does not mean you have necessarily complied with the law.

FOOD SAFETY

How we calculate your Food Hygiene Rating:

The food safety section has been divided into the three areas which you are scored against for the hygiene rating: 1. food hygiene and safety procedures, 2. structural requirements and 3. confidence in management/control procedures. Each section begins with a summary of what was observed and the score you have been given. Details of how these scores combine to produce your overall food hygiene rating are shown in the table.

Compliance Area	You Score					
Food Hygiene and Safety	0	5	10	15	20	25
Structure and Cleaning	0	5	10	15	20	25
Confidence in management & control systems	0	5	10	15	20	30
Your Total score	0 - 15	20	25 - 30	35 - 40	45 - 50	> 50
Your Worst score	5	10	10	15	20	-
Your Rating is	5	4	3	2	1	0

Your Food Hygiene Rating is 4 - a good standard

1. Food Hygiene and Safety

Food hygiene standards are high. You demonstrated a very good standard of compliance with legal requirements. You have safe food handling practices and procedures and all the necessary control measures to prevent cross-contamination are in place. Some minor contraventions require your attention. **(Score 5)**

Contamination risks

Contravention The following exposed ready-to-eat food and or its packaging to the risk of cross-contamination with foodborne bacteria from raw meat or unwashed fruits and vegetables:

- Raw meat was being stored above pitta bread in the chest freezer.

Legal Requirement At all stages of production, processing and distribution, food must be protected from any contamination likely to render it unfit for human consumption, injurious to health or contaminated in such a way that it would be unreasonable to expect it to be consumed in that state.

Hand-washing

Contravention The following indicated that hand-washing was not suitably managed:

- staff were not seen washing their hands regularly when I visited.
- the wash hand basin was obstructed.
- wash hand basins were dirty.
- using gloves without suitable procedures to ensure they remain hygienic.

Information Handwashing is required:

- * before handling ready-to-eat food
- * after touching raw food and its packaging, including unwashed fruit and vegetables
- * after a break/smoking
- * after going to the toilet
- * after cleaning
- * after removing waste
- * after blowing your nose

Information Proper hand-washing is essential to prevent cross-contamination of E.coli 0157 and other harmful bacteria onto food and food contact surfaces. Handwashing should include the following steps:

- wet hands before applying soap
- good hand rubbing technique
- rinsing of hands
- hygienic drying

Personal Hygiene

Contravention The following are examples of poor personal hygiene or where it was made difficult for food handlers to maintain sufficiently high standards of personal cleanliness:

- staff were not using the wash-hand basin regularly.

Guidance Regular hand washing is important for personal cleanliness. Remind all food handlers of the need to wash their hands before starting or returning to work, and specifically:

- * After using the toilet;
- * After handling rubbish;
- * After smoking;
- * After taking a break;
- * After handling raw food

Temperature Control

Contravention The following evidence indicated there was a risk of bacteria growing on food:

- cold foods were being stored above 8°C
- cold foods, for service, were being kept above 8°C for over 4 hours.

Recommendation Due to the amount of heat within the kitchen area, it is recommended that small amount of food be kept in the chilled make table counter at any one time.

2. Structure and Cleaning

The structure facilities and standard of cleaning and maintenance are all of a good standard and only minor repairs and/or improvements are required. Pest control and waste disposal provisions are adequate. The minor contraventions require your attention. **(Score 5)**

Cleaning of Structure

Observation The kitchen had been well maintained and the standard of cleaning was good.

Cleaning Chemicals / Materials / Equipment and Methods

Information You must ensure that the sanitisers you use are effective against bacteria. Ensure that they meet the following standards BS EN 1276:1997 and 13697:2001.

Maintenance

Contravention The following had not been suitably maintained and must be repaired or replaced:

- Silicon sealant damaged.

- Seals to the stainless steel undercounter fridge were damaged. Renew or replace the seals.
- The hot water tap to the wash hand basin was stiff and did not allow for adequate flow of hot water from the tap.
- One of the floor tiles within the food preparation area was cracked.

Facilities and Structural provision

Legal Requirement The facilities for washing food must be separate from the hand-washing facility.

Pest Control

Observation I was pleased to see that the premises was proofed against the entry of pests and that pest control procedures were in place.

3. Confidence in Management

There are generally satisfactory food safety controls in place although there is evidence of some non-compliance with the law. The contraventions require your attention; although not critical to food safety they may become so if not addressed. **(Score 10)**

Type of Food Safety Management System Required

Observation You had colour-coded equipment and effective separation between raw and ready-to-eat food at all stages in your operation.

Food Hazard Identification and Control

Contravention The following pre-requisites have not been met and this means that your food safety management system will be ineffective:

- staff training is inadequate.

Proving Your Arrangements are Working Well

Contravention You are not working to the following safe methods in your SFBB pack:

- chilling / chilled storage / display of chilled food
- cross contamination/ physical or chemical contamination
- daily diary
- personal hygiene / handwashing

Recommendation Your SFBB pack should be used as intended so as to guarantee you are fully complying with your legal obligation to have a documented food safety management system in place.

Traceability

Observation Your records were such that food could easily be traced back to its supplier.

Infection Control / Sickness / Exclusion Policy

Guidance UK Health Security Agency recommends that food handlers known or suspected to be suffering from a food-borne infection or gastrointestinal illness stay away from work until symptom-free for 48 hours.

Observation Policies were in place to prevent any infected food handler from contaminating food.

Training

Contravention The following evidence indicates there is a staff training need as food handlers:

- did not appreciate allergen risks.
- were not washing their hands often enough.

Recommendation A Level 2 Award in Food Safety in Catering or its equivalent (a 6-hour course leading to the award of a recognised certificate in food hygiene) would be appropriate for your food handlers. Booking details for the equivalent CIEH course are on our website: www.norwich.gov.uk

Recommendation Catering staff should refresh their food hygiene knowledge every 3 years so that they stay up to date with current legislation and good practice. Booking details for this course are on our website: www.norwich.gov.uk

Allergens

Contravention You are failing to manage allergens properly:

- You have not identified the allergens present in the food you prepare.

Information Allergen information could be written down on a chalk board or chart, or provided orally by a member of staff. Where the specific allergen information is not provided upfront, clear signposting to where this information could be obtained must be provided.

HEALTH, SAFETY AND WELFARE

Matters of evident concern

Contravention The wash hand basin was located too close to the gyros / kebab grill and creates a risk of burns to staff from hot surfaces while carrying out the task of handwashing. I strongly recommend that you assess the potential burn risk to staff and identify what controls are necessary.
