

Public Protection (food & safety)

Food Premises Inspection Report

Name of business: Coachmakers Arms

Address of food business: Coachmakers Arms 9 St Stephens Road Norwich NR1

3SP

Date of inspection: 14/07/2023
Risk rating reference: 23/00568/FOOD
Premises reference: 15820/0009/0/000

Type of premises: Public House/Bar Areas inspected: Cellar, Main Kitchen

Records examined: Cleaning Schedule, Pest Control Report, SFBB,

Temperature Control Records

Details of samples procured: None Summary of action taken: Informal

General description of Public House with catering

business:

Relevant Legislation

Food Safety Act 1990 (as amended)

Regulation (EC) No 178/2002 applied by The General Food Regulations 2004 (as amended)

Regulation (EC) No 852/2004 and No 853/2004 applied by Regulation 19 (1) of the Food

Safety and Hygiene (England) Regulations 2013

Health and Safety at Work etc. Act 1974 and related regulations

Food Information Regulations 2014

What you must do to comply with the law

The report may include **Contraventions** - matters which do not comply with the law . You must address all of the contraventions identified; failure to do so could result in legal action being taken against you.

As a guide, contraventions relating to cleaning, temperature control and poor practice, should be dealt with straight away.

Contraventions relating to structural repairs, your food safety management system and staff training, should be completed within the next <u>2 months</u>.

Health and safety contraventions should be dealt with within 3 months unless otherwise stated.

To assist you the report may also include **Observations** of current practice, useful **Information**, **Recommendations** of good practice and reminders of **Legal Requirements**.

My inspection was not intended to identify every contravention of the law and only covers those areas, practices and procedures examined at the time of the inspection. If the report fails to mention a particular matter this does not mean you have necessarily complied with the law.

FOOD SAFETY

How we calculate your Food Hygiene Rating:

The food safety section has been divided into the three areas which you are scored against for the hygiene rating: 1. food hygiene and safety procedures, 2. structural requirements and 3. confidence in management/control procedures. Each section begins with a summary of what was observed and the score you have been given. Details of how these scores combine to produce your overall food hygiene rating are shown in the table.

Compliance Area				You Score					
Food Hygiene and Safety				0	5	10	15	20	25
Structure and Cleaning				0	5	10	15	20	25
Confidence in management & control systems				0	5	10	15	20	30
Your Total score	0 - 15	20	25 - 30		35 - 40		45 - 50		> 50
Your Worst score	5	10	10		15		20		-
Your Rating is	5	4		3	2	2	1		0

Your Food Hygiene Rating is 4 - a good standard

1. Food Hygiene and Safety

Food hygiene standards are high. You demonstrated a very good standard of compliance with legal requirements. You have safe food handling practices and procedures and all the necessary control measures to prevent cross-contamination are in place. Some minor contraventions require your attention. (Score 5)

Contamination risks

Contravention The following exposed food to the general risk of cross-contamination with bacteria or allergens or its physical contamination with dirt, foreign objects or chemicals:

 Frozen packs of raw bacon stored over garlic bread and bags of microwaveable rice.

Legal Requirement At all stages of production, processing and distribution, food must be protected from any contamination likely to render it unfit for human consumption,

injurious to health or contaminated in such a way that it would be unreasonable to expect it to be consumed in that state.

Observation I was pleased to see you were able to demonstrate effective controls to prevent cross-contamination. You have a dishwasher, separate coloured boards and a rack, and no complex equipment.

Hand-washing

Observation I was pleased to see handwashing was well managed.

Personal Hygiene

Observation I was pleased to see that standards of personal hygiene were high.

Temperature Control

Observation I was pleased to see you were able to limit bacterial growth and/or survival by applying appropriate temperature controls at points critical to food safety and that you were monitoring temperatures.

Unfit food

Recommendation You should have a system to identify when open or prepared foods need to be used by or discarded, to ensure the food is fit for consumption. I recommend you apply labels which give a date that is 2 days after the day of production e.g. if food is opened on Monday it should be used by the end of Wednesday (an exception is cooked rice which should not be kept longer than 24 hours)

Poor Practices

Contravention The following matters represented poor practice and if allowed to continue may cause food to become contaminated or lead to its deterioration:

• Raw bacon being stored over ready-to-eat food.

2. Structure and Cleaning

The structure facilities and standard of cleaning and maintenance are of a generally satisfactory standard but there are some repairs and/or improvements which are required in order for you to comply with the law. Pest control and waste disposal provisions are

adequate. The contraventions require your attention; although not critical to food safety they may become so if not addressed. (**Score 10**)

Cleaning of Structure

Contravention The following items were dirty and require more frequent and thorough cleaning:

- behind and under equipment
- electric fly killer and tray
- high level cleaning in the lobby area
- high level cleaning in cellar.
- · cellar walls and ceiling.
- behind and under equipment in the lobby area.

Recommendation Although the filters within the mechanical canopy are regularly cleaned, the mesh located within the filter unit are heavily encrusted in carbon/grease build up cannot be adequately cleaned. I recommend that you renew the filters to allow for adequate cleaning.

Cleaning of Equipment and Food Contact Surfaces

Contravention The following items are dirty and must be cleaned:

- fridge and freezer seals
- plastic film covering on the ice machine which needs to be removed to allow for adequate cleaning.

Maintenance

Contravention The following had not been suitably maintained and must be repaired or replaced:

- The lobby area off the kitchen was not suitable as a food store room. The ceiling was damaged and was observed to be leaking at the time of my visit.
- Damaged seal to chilled units behind bar.
- damaged flyscreen to the kitchen door.

Pest Control

Contravention There is evidence of pest activity on the premises:

• Flying insects in the cellar indicating poor cleaning.

Contravention Pest proofing is inadequate particularly in the following areas:

damaged fly screens

Contravention Your staff are unaware how to protect your premises from the threat of pests. Ensure that your staff are adequately trained.:

 There was evidence of pest activity (flying insects) and you had not taken any action to rid the cellar of the flying insects.

Recommendation Ensure staff are trained to recognise the signs of pests and that they undertake regular checks of the premises

Recommendation Employ the services of your pest controller

3. Confidence in Management

A food safety management system is in place and you demonstrate a very good standard of compliance with the law. You have a good track record. There are some minor contraventions which require your attention. (**Score 5**)

Type of Food Safety Management System Required

Observation Your SFBB/food safety management system was in place and working well. I was confident you had effective control over hazards to food.

Observation You were monitoring (and recording) the temperatures of your fridges and freezers as well as the temperature of cooked/hot-held food and could demonstrate effective systems for controlling bacterial growth and survival.

Food Hazard Identification and Control

Contravention The following pre-requisites have not been met and this means that your food safety management system will be ineffective:

- cleaning and sanitation are poor
- maintenance is poor
- pest control is inadequate

Information Before implementing a food safety management system such as Safer Food Better Business, basic good hygiene conditions and practices called prerequisites must be in place. Only then will your food safety management system be effective in ensuring the preparation of safe food.

Proving Your Arrangements are Working Well

Contravention You are not working to the following safe methods in your SFBB pack:

- 4-weekly checks
- Daily Diary

Recommendation Your SFBB pack should be used as intended so as to guarantee you are fully complying with your legal obligation to have a documented food safety management system in place.

Traceability

Observation Your records were such that food could easily be traced back to its supplier.

Infection Control / Sickness / Exclusion Policy

Guidance UK Health Security Agency recommends that food handlers known or suspected to be suffering from a food-borne infection or gastrointestinal illness stay away from work until symptom-free for 48 hours.

Observation Policies were in place to prevent any infected food handler from contaminating food.

Waste Food and other Refuse

Observation You had measures in place to dispose of waste food appropriately and were employing the services of an approved waste contractor.

Training

Recommendation Catering staff should refresh their food hygiene knowledge every 3 years so that they stay up to date with current legislation and good practice. Booking details for this course are on our website: www.norwich.gov.uk

Allergens

Observation You had devised a chart listing all the food you provide with the allergens present in each and had brought this to the attention of your staff and customers.
