Food Premises Inspection Report

Name of business:	Antep Kitchen Turkish Restaurant
Address of food business:	47 Dereham Road Norwich NR2 4HZ
Date of inspection:	20/10/2023
Risk rating reference:	23/00781/FOOD
Premises reference:	22/00120/FD_HS
Type of premises:	Restaurant or cafe
Areas inspected:	All
Records examined:	Pest Control Report, Temperature Control Records, Cleaning Schedule, Training Certificates/records, SFBB
Details of samples procured:	None
Summary of action taken:	Informal
General description of business:	Turkish Restaurant

Relevant Legislation

Food Safety Act 1990 (as amended)

Regulation (EC) No 178/2002 applied by The General Food Regulations 2004 (as amended)

Regulation (EC) No 852/2004 and No 853/2004 applied by Regulation 19 (1) of the Food Safety and Hygiene (England) Regulations 2013

Health and Safety at Work etc. Act 1974 and related regulations

Food Information Regulations 2014

What you must do to comply with the law

The report may include **Contraventions** - matters which do not comply with the law . You must address all of the contraventions identified; failure to do so could result in legal action being taken against you.

As a guide, contraventions relating to cleaning, temperature control and poor practice, should be dealt with straight away.

Contraventions relating to structural repairs, your food safety management system and staff training, should be completed within the next 2 months.

Health and safety contraventions should be dealt with within 3 months unless otherwise stated.

To assist you the report may also include **Observations** of current practice, useful **Information, Recommendations** of good practice and reminders of **Legal Requirements**.

My inspection was not intended to identify every contravention of the law and only covers those areas, practices and procedures examined at the time of the inspection. If the report fails to mention a particular matter this does not mean you have necessarily complied with the law.

FOOD SAFETY

How we calculate your Food Hygiene Rating:

The food safety section has been divided into the three areas which you are scored against for the hygiene rating: 1. food hygiene and safety procedures, 2. structural requirements and 3. confidence in management/control procedures. Each section begins with a summary of what was observed and the score you have been given. Details of how these scores combine to produce your overall food hygiene rating are shown in the table.

Compliance Area	You Score					
Food Hygiene and Safety	0	5	10	15	20	25
Structure and Cleaning	0	5	10	15	20	25
Confidence in management & control systems	0	5	10	15	20	30
Your Total score	0 - 15	20	25 - 30	35 - 40	45 - 50	> 50
Your Worst score	5	10	10	15	20	-
Your Rating is	5	4	3	2	1	0

Your Food Hygiene Rating is 3 - a generally satisfactory standard

1. Food Hygiene and Safety

Food hygiene standards are generally satisfactory and maintained. There is evidence of some non-compliance with legal requirements. Some lapses are evident however generally you have satisfactory food handling practices and procedures and adequate control measures to prevent cross-contamination are in place. The contraventions require your attention; although not critical to food safety they may become so if not addressed.
(Score 10)

Contamination risks

Contravention The following exposed food to the general risk of cross-contamination with bacteria or allergens or its physical contamination with dirt, foreign objects or chemicals:

- food, i.e., red cabbage, was being stored directly on the floor. Food must be stored off the floor where it might be at risk of contamination.

Legal Requirement At all stages of production, processing and distribution, food must be protected from any contamination likely to render it unfit for human consumption, injurious to health or contaminated in such a way that it would be unreasonable to expect it to be consumed in that state.

Hand-washing

Contravention The following indicated that hand-washing was not suitably managed:

- no means for hygienically drying hands was available.
- there was food debris in the wash hand basin.
- wash hand basins were dirty.
- wash hand basin used for storing equipment.

Legal Requirement Wash hand basins must be provided with hot and cold running water and suitable drainage; soap and a hygienic way to dry hands.

Information Handwashing is required:

- * before handling ready-to-eat food
- * after touching raw food and its packaging, including unwashed fruit and vegetables
- * after a break/smoking
- * after going to the toilet
- * after cleaning
- * after removing waste
- * after blowing your nose

Guidance Proper hand-washing is essential to prevent cross-contamination of E.coli 0157 and other harmful bacteria onto food and food contact surfaces. Handwashing should include the following steps:

- * wet hands before applying soap
- * good hand rubbing technique
- * rinsing of hands
- * hygienic drying

Personal Hygiene

Contravention The following are examples of poor personal hygiene or where it was made difficult for food handlers to maintain sufficiently high standards of personal cleanliness:

- staff were not using the wash-hand basin regularly.

Legal Requirement Washbasins must be available, suitably located and designated for cleaning hands. Wash-hand basins must be provided with hot and cold (or suitably mixed) running water. Soap and hand drying facilities must be located nearby.

Legal Requirement Regular hand washing is important for personal cleanliness.

Remind all food handlers of the need to wash their hands before starting or returning to work, and specifically:

- * After using the toilet;
- * After handling rubbish;
- * After smoking;
- * After taking a break;
- * After handling raw food

Temperature Control

Contravention The following evidence indicated there was a risk of bacteria growing on food:

- foods were not being stored at the temperature directed by the manufacturer.
- open cocktail sauce was being kept at room temperature. The manufacturer states that once opened, the sauce must be refrigerated.

Guidance All food products should be stored in accordance with the manufacturer instructions.

Unfit food

Contravention Cooked rice was being kept for longer than 24 hours. Cooked rice must be refrigerated to below 8°C and used or thrown away after 24 hours.

2. Structure and Cleaning

The structure facilities and standard of cleaning and maintenance are all of a good standard and only minor repairs and/or improvements are required. Pest control and waste disposal provisions are adequate. The minor contraventions require your attention. **(Score 5)**

Cleaning of Structure

Contravention The following items were dirty and require more frequent and thorough cleaning:

- electric fly killer and tray.

Recommendation Your cleaning schedule is there to remind you to clean before an item becomes dirty. If an item is dirty when you go to clean it, increase the frequency of cleaning.

Cleaning of Equipment and Food Contact Surfaces

Contravention The following items are dirty and must be cleaned:

- can opener.
- chopping boards.

Cleaning Chemicals / Materials / Equipment and Methods

Observation I was pleased to see that the premises was kept clean and that your cleaning materials, methods and equipment were able to minimise the spread of harmful bacteria between surfaces.

Facilities and Structural provision

Recommendation Fit plastic diffuser covers to all fluorescent strip lights. These can be removed for cleaning and will help contain glass fragments in the event of a breakage

Recommendation Do not use cardboard on floor surfaces. (If floor surfaces are slippery then action should be taken to improve the non-slip property of the floor surface and the type of shoes worn by staff should be reviewed).

Pest Control

Observation I was pleased to see that the premises was proofed against the entry of pests and that pest control procedures were in place.

Observation You have a pest control contract in place and there is no evidence of pest activity on the premises.

3. Confidence in Management

There are generally satisfactory food safety controls in place although there is evidence of some non-compliance with the law. The contraventions require your attention; although not critical to food safety they may become so if not addressed. **(Score 10)**

Proving Your Arrangements are Working Well

Contravention You are not working to the following safe methods in your SFBB pack:

- 4-weekly checks.
- Chilling / chilled storage / display of chilled food.
- Cloths / cross contamination.
- Daily Diary.
- Food allergies.
- Personal hygiene / handwashing.
- Your daily diary had lapsed. Last dated entry was 6/8/2023.

Recommendation Your SFBB pack should be used as intended so as to guarantee you are fully complying with your legal obligation to have a documented food safety management system in place.

Traceability

Observation Your records were such that food could easily be traced back to its supplier.

Infection Control / Sickness / Exclusion Policy

Guidance UK Health Security Agency recommends that food handlers known or suspected to be suffering from a food-borne infection or gastrointestinal illness stay away from work until symptom-free for 48 hours.

Waste Food and other Refuse

Observation You had measures in place to dispose of waste food appropriately and were employing the services of an approved waste contractor.

Training

Observation I was pleased to see that food handlers had been trained to an appropriate level and evidence of their training was made available.

Allergens

Contravention You are failing to manage allergens properly:

- You do not have a system for informing customers about the presence of allergens in the food you prepare.
- You have not identified the allergens present in the food you prepare.

Information Allergen information could be written down on a chalk board or chart, or provided orally by a member of staff. Where the specific allergen information is not provided upfront, clear signposting to where this information could be obtained must be provided.

Information The Food Information Regulations require that you know what allergens are in the food you provide. You can no longer claim you don't know what allergens are present. Neither can you simply state that all the foods you serve might contain an allergen:

- Be sure you know exactly what your allergens are.
- Convey this information to your customers accurately and consistently.
