

**Public Protection (food & safety)**

**Food Premises Inspection Report**

Name of business:	Hop Rocket
Address of food business:	152A Unthank Road Norwich NR2 2RS
Date of inspection:	15/04/2024
Risk rating reference:	24/00189/FOOD
Premises reference:	23/00378/FD_HS
Type of premises:	Public House/Bar
Areas inspected:	Main Kitchen, Cellar, Servery
Records examined:	None
Details of samples procured:	None
Summary of action taken:	Informal
General description of business:	Public House with catering

**Relevant Legislation**

Food Safety Act 1990 (as amended)

Regulation (EC) No 178/2002 applied by The General Food Regulations 2004 (as amended)

Regulation (EC) No 852/2004 and No 853/2004 applied by Regulation 19 (1) of the Food Safety and Hygiene (England) Regulations 2013

Health and Safety at Work etc. Act 1974 and related regulations

Food Information Regulations 2014

**What you must do to comply with the law**

The report may include **Contraventions** - matters which do not comply with the law . You must address all of the contraventions identified; failure to do so could result in legal action being taken against you.

As a guide, contraventions relating to cleaning, temperature control and poor practice, should be dealt with straight away.

Contraventions relating to structural repairs, your food safety management system and staff training, should be completed within the next 2 months.

Health and safety contraventions should be dealt with within 3 months unless otherwise stated.

To assist you the report may also include **Observations** of current practice, useful **Information, Recommendations** of good practice and reminders of **Legal Requirements** .

My inspection was not intended to identify every contravention of the law and only covers those areas, practices and procedures examined at the time of the inspection. If the report fails to mention a particular matter this does not mean you have necessarily complied with the law.

## FOOD SAFETY

### How we calculate your Food Hygiene Rating:

The food safety section has been divided into the three areas which you are scored against for the hygiene rating: 1. food hygiene and safety procedures, 2. structural requirements and 3. confidence in management/control procedures. Each section begins with a summary of what was observed and the score you have been given. Details of how these scores combine to produce your overall food hygiene rating are shown in the table.

Compliance Area	You Score					
Food Hygiene and Safety	0	5	<b>10</b>	15	20	25
Structure and Cleaning	0	5	<b>10</b>	15	20	25
Confidence in management & control systems	0	5	<b>10</b>	15	20	30
<b>Your Total score</b>	0 - 15	20	<b>25 - 30</b>	35 - 40	45 - 50	> 50
<b>Your Worst score</b>	5	10	<b>10</b>	15	20	-
<b>Your Rating is</b>	5	4	<b>3</b>	2	1	0

Your Food Hygiene Rating is 3 - a generally satisfactory standard

### 1. Food Hygiene and Safety

Food hygiene standards are generally satisfactory and maintained. There is evidence of some non-compliance with legal requirements. Some lapses are evident however generally you have satisfactory food handling practices and procedures and adequate control measures to prevent cross-contamination are in place. The contraventions require your attention; although not critical to food safety they may become so if not addressed.  
**(Score 10)**

#### Hand-washing

**Contravention** The following indicated that hand-washing was not suitably managed:

- no soap to wash hand basin behind bar
- wash hand basin was obstructed in kitchen

**Information** Handwashing is required:

- before handling ready-to-eat food
- after touching raw food and its packaging, including unwashed fruit and vegetables
- after a break/smoking
- after going to the toilet
- after cleaning
- after removing waste

- after blowing your nose

**Information** Proper hand-washing is essential in preventing the spread of E. coli 0157 and other harmful bacteria onto food and food contact surfaces. Proper hand washing must include the following steps:

- wet hands before applying soap
- good hand rubbing technique
- rinsing of hands
- hygienic drying

### Personal Hygiene

**Contravention** The following are examples of poor personal hygiene or where it was made difficult for food handlers to maintain sufficiently high standards of personal cleanliness:

- staff were not wearing suitable protective clothing while preparing food in the kitchen

**Legal requirement** All persons in food handling areas must wear suitable, clean, and where appropriate protective clothing

### Temperature Control

**Contravention** The following evidence indicated there was a risk of bacteria growing on food:

- high risk food was being left in the danger zone (8-63°C) for long periods of time.

**Legal Requirement** If you rely on selling COLD food (displayed over 8°C) within four hours you must be able to demonstrate your system for ensuring food is either sold, placed under refrigeration, or discarded, before the four hours have elapsed.

**Legal requirement** Raw materials, ingredients, intermediate products and finished products likely to support the reproduction of pathogenic micro-organisms or the formation of toxins must not be kept at temperatures that might result in a risk to health

**Recommendation** I recommend that you record the times the prepared rolls and sausage rolls are put out on display and adhere to the four hour rule

## **2. Structure and Cleaning**

The structure facilities and standard of cleaning and maintenance are of a generally satisfactory standard but there are some repairs and/or improvements which are required in order for you to comply with the law. Pest control and waste disposal provisions are adequate. The contraventions require your attention; although not critical to food safety they may become so if not addressed. **(Score 10)**

### Cleaning of Structure

**Contravention** The following items were dirty and require more frequent and thorough cleaning:

- flooring to kitchen

#### Cleaning of Equipment and Food Contact Surfaces

**Contravention** The following surfaces and equipment in contact with food were dirty and/or could not be cleaned and require cleaning or discarding:

- seals to fridge
- wooden cutting boards were frayed and cannot be properly cleaned

#### Cleaning Chemicals / Materials / Equipment and Methods

**Observation** I was pleased to see that the premises was kept clean and that your cleaning materials, methods and equipment were able to minimise the spread of harmful bacteria between surfaces.

#### Facilities and Structural provision

**Observation** I was pleased to see the premises had been well maintained and that adequate facilities had been provided.

### **3. Confidence in Management**

There are generally satisfactory food safety controls in place although there is evidence of some non-compliance with the law. The contraventions require your attention; although not critical to food safety they may become so if not addressed. **(Score 10)**

#### Type of Food Safety Management System Required

**Contravention** Your documented Food Safety Management System or Safer Food Better Business pack was not available for inspection. As a consequence you could not demonstrate an effective system for managing food safety hazards.

**Recommendation** Choose 'Safer Food Better Business' (SFBB) as your food safety management system. It is simple to implement and requires a minimum amount of record keeping.

**Information** You can download a Safer Food Better Business pack and refill diary pages from the FSA website: [www.food.gov.uk/business-industry/caterers/sfbb](http://www.food.gov.uk/business-industry/caterers/sfbb)

**Information.** As you are a new business you have been given the benefit of the doubt despite your food safety management system not fully complying with the law. You

must act on this now as your hygiene rating score will be reduced to a maximum of 1 if there is a similar situational at the next visit

**Information** The absence of any documentation has resulted in a poor score for confidence in management and this, in turn, has had an adverse effect on your Food Hygiene Rating.

### Infection Control / Sickness / Exclusion Policy

**Observation** Policies were in place to prevent any infected food handler from contaminating food.

### Waste Food and other Refuse

**Observation** You had measures in place to dispose of waste food appropriately and were employing the services of an approved waste contractor.

### Training

**Recommendation** A Level 2 Award in Food Safety in Catering or its equivalent (a 6-hour course leading to the award of a recognised certificate in food hygiene) would be appropriate for your food handlers. Booking details for the equivalent CIEH course are on our website: [www.norwich.gov.uk](http://www.norwich.gov.uk)

### Allergens

**Contravention** You are failing to manage allergens properly:

- you do not have a system for informing customers about the presence of allergens in the food you prepare
- you have not identified the allergens present in the food you prepare

**Legal requirement** Caterers must provide allergy information on all unpackaged food they sell. Catering businesses include restaurants, takeaways, deli counters, bakeries and sandwich bars etc. The potential for cross-contamination by allergens must also be made known to consumers. You can obtain more information from the Trading Standards website: [www.norfolk.gov.uk/abc](http://www.norfolk.gov.uk/abc)

**Information** Loose (also called non pre-packed) foods are:

- foods served at restaurants and canteens
- takeaway foods that are placed into containers and sold at the same premises

- any foods sold loose, e.g. meat or cheese at a deli counter, unpackaged bread or pick and mix sweets (including individually wrapped sweets)

**Recommendation** Make a chart listing all your meals together with the 14 allergens (if present). Bring the chart to the attention of your customers and your staff.

**Information** The Food Standards Agency run free allergen courses at <https://allergytraining.food.gov.uk/>
