

### **Public Protection (food & safety)**

### **Food Premises Inspection Report**

Name of business: Cherry Leaf

Address of food business: 50 St Giles Street Norwich NR2 1LW

Date of inspection: 30/07/2025
Risk rating reference: 25/00644/FOOD
Premises reference: 25/00198/FD\_HS

Type of premises: Restaurant or cafe

Areas inspected: Main Kitchen, Servery, Basement Records examined: SFBB, Training Certificates/records

Details of samples procured: None
Summary of action taken: Informal
General description of business: Restaurant

### **Relevant Legislation**

Food Safety Act 1990 (as amended)

Regulation (EC) No 178/2002 applied by The General Food Regulations 2004 (as amended)

Regulation (EC) No 852/2004 and No 853/2004 applied by Regulation 19 (1) of the Food

Safety and Hygiene (England) Regulations 2013

Health and Safety at Work etc. Act 1974 and related regulations

Food Information Regulations 2014

## What you must do to comply with the law

The report may include **Contraventions** - matters which do not comply with the law. You must address all of the contraventions identified; failure to do so could result in legal action being taken against you.

As a guide, contraventions relating to cleaning, temperature control and poor practice, should be dealt with <u>straight away</u>.

Contraventions relating to structural repairs, your food safety management system and staff training, should be completed within the next 2 months.

Health and safety contraventions should be dealt with within 3 months unless otherwise stated.

To assist you the report may also include **Observations** of current practice, useful **Information**, **Recommendations** of good practice and reminders of **Legal Requirements**.

My inspection was not intended to identify every contravention of the law and only covers those areas, practices and procedures examined at the time of the inspection. If the report fails to mention a particular matter this does not mean you have necessarily complied with the law.

### **FOOD SAFETY**

# How we calculate your Food Hygiene Rating:

The food safety section has been divided into the three areas which you are scored against for the hygiene rating: 1. food hygiene and safety procedures, 2. structural requirements and 3. confidence in management/control procedures. Each section begins with a summary of what was observed and the score you have been given. Details of how these scores combine to produce your overall food hygiene rating are shown in the table.

Compliance Area				You Score					
Food Hygiene and Safety				0	5	10	15	20	25
Structure and Cleaning				0	5	10	15	20	25
Confidence in management & control systems				0	5	10	15	20	30
Your Total score	0 - 15	20	25 - 30		35 - 40		45 - 50		> 50
Your Worst score	5	10	10		15		20		-
		F	_		_				
Your Rating is	5	4	3		2		1		0

Your Food Hygiene Rating is 3 - a generally satisfactory standard

### 1. Food Hygiene and Safety

Food hygiene standards are high. You demonstrated a very good standard of compliance with legal requirements. You have safe food handling practices and procedures and all the necessary control measures to prevent cross-contamination are in place. Some minor contraventions require your attention. **(5)** 

### Contamination risks

**Contravention** Food was not protected from general sources of contamination:

- uncovered foods stored in the fridge
- open cans of food stored in the fridge

**Legal requirement** At all stages of production, processing and distribution, food must be protected from any contamination likely to render it unfit for human consumption, injurious to health or contaminated in such a way that it would be unreasonable to expect it to be consumed in that state.

**Legal requirement** Once opened, canned food which is to be stored should be transferred to plastic covered containers, designed for the storage of food, to prevent chemical contamination of the food

## Hand washing

**Observation** I was pleased to see hand washing was well managed.

**Recommendation** I recommend that that you keep paper towel near sink for hand drying

## Personal Hygiene

**Contravention** The following are examples of poor personal hygiene or where it was made difficult for food handlers to maintain sufficiently high standards of personal cleanliness:

staff were not wearing suitable protective clothing

**Legal Requirement** All persons in food handling areas must wear suitable, clean, and where appropriate protective clothing.

### Temperature Control

**Observation** I was pleased to see you were able to limit bacterial growth and/or survival by applying appropriate temperature controls at points critical to food safety and that you were monitoring temperatures.

### **Poor Practices**

**Contravention** The following matters represented poor practice and if allowed to continue may cause food to become contaminated or lead to its deterioration:

no dates of when opened on open jars and sauces stored in the fridge

### 2. Structure and Cleaning

The structure facilities and standard of cleaning and maintenance are of a generally satisfactory standard but there are some repairs and/or improvements which are required in order for you to comply with the law. Pest control and waste disposal provisions are adequate. The contraventions require your attention; although not critical to food safety they may become so if not addressed. (10)

## Cleaning of Structure

**Contravention** The following items were dirty and require more frequent and thorough cleaning:

- flooring underneath equipment
- grout to floor tiles
- electric fly killer

### Cleaning of Equipment and Food Contact Surfaces

**Contravention** The following items are dirty and must be cleaned:

- seals to fridges/freezers
- interior bottom to fridges
- interior tray to fridge door
- handle to fridge
- interior to dishwasher door
- electric fly killer
- legs to equipment

### Cleaning Chemicals / Materials / Equipment and Methods

**Contravention** The following evidence demonstrated your cleaning materials, equipment and methods were not sufficient to control the spread of harmful bacteria between surfaces:

 surface sanitisers do not to conform to British Standards EN 1276:1997 or BS EN 13697:2001

**Information** Ensure you use a surface sanitiser that conforms to BS EN 1276:1997 or BS EN 13697:2001. This information should be available on the label or by contacting the manufacturer.

#### Maintenance

**Contravention** The following had not been suitably maintained and must be repaired or replaced:

- damage to fridge drawer
- holes to kitchen cupboards
- tray missing to electric fly killer
- gap to flooring behind kitchen cupboards

### Facilities and Structural provision

**Observation** I was pleased to see the premises had been well maintained and that adequate facilities had been provided.

### Pest Control

**Observation** I was pleased to see that the premises was proofed against the entry of pests and that pest control procedures were in place.

**Recommendation** Install the Electric Fly Killer in a suitable position away from natural light sources and food and food preparation surfaces and keep it clean

## 3. Confidence in Management

There are generally satisfactory food safety controls in place although there is evidence of some non-compliance with the law. The contraventions require your attention; although not critical to food safety they may become so if not addressed. (10)

# Type of Food Safety Management System Required

**Recommendation** You had a Safer Food Better Business pack. However this had been filled in by the previous food business operator. I recommend you purchase your own pack and fill it in

**Observation** You were date labelling perishable foods appropriately and could demonstrate effective control over food spoilage organisms.

Recommendation I recommend that you record your fridge and freezer temperatures

### Food Hazard Identification and Control

**Contravention** You have not identified these food hazards or the methods of control at critical points in your operation:

cross-contamination

## **Traceability**

**Observation** Your records were such that food could easily be traced back to its supplier.

## Waste Food and other Refuse

**Observation** You had measures in place to dispose of waste food appropriately and were employing the services of an approved waste contractor.
