business:

Relevant Legislation

Food Safety Act 1990 (as amended)

Regulation (EC) No 178/2002 applied by The General Food Regulations 2004 (as amended) Regulation (EC) No 852/2004 and No 853/2004 applied by Regulation 19 (1) of the Food

Safety and Hygiene (England) Regulations 2013

Health and Safety at Work etc. Act 1974 and related regulations

Food Information Regulations 2014

What you must do to comply with the law

The report may include **Contraventions** - matters which do not comply with the law. You must address all of the contraventions identified; failure to do so could result in legal action being taken against you.

As a guide, contraventions relating to cleaning, temperature control and poor practice, should be dealt with straight away.

Contraventions relating to structural repairs, your food safety management system and staff training, should be completed within the next <u>2 months</u>.

Health and safety contraventions should be dealt with within 3 months unless otherwise stated.

To assist you the report may also include **Observations** of current practice, useful **Information**, **Recommendations** of good practice and reminders of **Legal Requirements**.

My inspection was not intended to identify every contravention of the law and only covers those areas, practices and procedures examined at the time of the inspection. If the report fails to mention a particular matter this does not mean you have necessarily complied with the law.

FOOD SAFETY

How we calculate your Food Hygiene Rating:

The food safety section has been divided into the three areas which you are scored against for the hygiene rating: 1. food hygiene and safety procedures, 2. structural requirements and 3. confidence in management/control procedures. Each section begins with a summary of what was observed and the score you have been given. Details of how these scores combine to produce your overall food hygiene rating are shown in the table.

Compliance Area				You Score					
Food Hygiene and Safety				0	5	10	15	20	25
Structure and Cleaning				0	5	10	15	20	25
Confidence in management & control systems				0	5	10	15	20	30
Your Total score	0 - 15	20	25 - 30		35 - 40		45 - 50		> 50
Your Worst score	5	10	10		15		20		-
		Г						ſ	
Your Rating is	5	4		3	2	2	1		0

Your Food Hygiene Rating is 3 - a generally satisfactory standard

1. Food Hygiene and Safety

Food hygiene standards are high. You demonstrated a very good standard of compliance with legal requirements. You have safe food handling practices and procedures and all the necessary control measures to prevent cross-contamination are in place. Some minor contraventions require your attention. (5)

Contamination risks

Contravention The following exposed food to the general risk of cross-contamination with bacteria or allergens or its physical contamination with dirt, foreign objects or chemicals:

- personal items (such as mobile phones) close to food in food areas
- personal items i.e vapes sited on green salad board

Legal Requirement At all stages of production, processing and distribution, food must be protected from any contamination likely to render it unfit for human consumption, injurious to health or contaminated in such a way that it would be unreasonable to expect it to be consumed in that state.

2. Structure and Cleaning

The structure facilities and standard of cleaning and maintenance are of a generally satisfactory standard but there are some repairs and/or improvements which are required in order for you to comply with the law. Pest control and waste disposal provisions are adequate. The contraventions require your attention; although not critical to food safety they may become so if not addressed. (10)

Cleaning of Structure

Contravention The following items were dirty and require more frequent and thorough cleaning:

- ceiling
- floor wall junctions
- · walls particularly behind food preparation surfaces
- clear all places
- storage contains under the work surfaces
- metal urn mounted on work top posed store cold water
- mastic joints behind sinks
- around equipment feet
- behind and under equipment

Contravention The following items could not be effectively cleaned and must be covered, made non-absorbent or replaced:

- chipped dented wooden architrave
- floors

Maintenance

Contravention The following had not been suitably maintained and must be repaired or replaced:

- work tops damaged or worn
- silicon sealant damaged

Facilities and Structural provision

Contravention The following facilities were inadequate and must be improved:

- the ventilation was inadequate. There were vents to ceiling, however these had been boxed in due a leaking roof
- hot water supply in-adequate. Your hot water supply, by using your griddle is not a suitable means produce hot water for both hand washing and cleaning equipment

Information You do have a dedicated hot water urn on site which you reformed me is useable. However you stopped using it to boil water as you felt unsafe from passing cars. You were concerned there is a risk of hot water scolding you in the vent of passing traffic coming into contact with your mobile.

Information I was pleased to note that you are to shortly move and trade from a new static unit on private land opposite your current location.

3. Confidence in Management

There are generally satisfactory food safety controls in place although there is evidence of some non-compliance with the law. Your records are appropriate and generally maintained but some deficiencies were identified. Some minor issues were identified relating to staff supervision and training. You have a satisfactory track record. The contraventions require your attention; although not critical to food safety they may become so if not addressed. (10)

Type of Food Safety Management System Required

Legal Requirement Food business operators must put in place, implement and maintain a permanent procedure or procedures based on HACCP principles:

- identify hazards to food
- identify the critical limits (what is acceptable and unacceptable)
- monitor critical control points to ensure critical limits are met
- keep appropriate records to demonstrate control measures are effective

Recommendation Choose Safer Food Better Business as your food safety management system. It is simple to implement and requires a minimum amount of record keeping.

Recommendation MyHACCP is a free web tool that will guide you through the process of developing a food safety management system based on Hazard Analysis and Critical Control Point (HACCP) www.myhaccp.food.gov.uk

Recommendation You can buy a printed copy of Safer Food Better Business or a diary refill pack via our website www.norwich.gov.uk/sfbb

Food Hazard Identification and Control

Contravention The following pre-requisites have not been met and this means that your food safety management system will be ineffective:

- services and facilities are inadequate
- cleaning and sanitation are poor

Traceability

Observation Your records were such that food could easily be traced back to its supplier.

Training

Observation I was pleased to see that food handlers had been trained to an appropriate level and evidence of their training was made available.

<u>Allergens</u>

Observation You had identified the presence of allergens in your non-prepacked food and had brought this to the attention of your customers.

Observation You had clearly shown the presence of allergens in your food on your menu.

Observation You had devised a chart listing all the food you provide with the allergens present in each and had brought this to the attention of your staff and customers.
